# One. Letter to Shareholders

Dear Shareholders,

This year marks the 30th anniversary of Stark Technology. It has gone through challenges in different stages and it has never been easy. Thank you to all our partners - the management team, employees, customers, suppliers, and shareholders. We look forward to the next 30 years, and we must still stay true to our original intention - “Maintaining the entrepreneurial spirit and pursuing customer satisfaction” to continue to deepen our core business, increase core competitiveness, research and develop new technologies, and provide professional services to win the trust and support of customers and suppliers, and to fulfill corporate social responsibilities. Hereby, thank you for the efforts of all employees. Stark Technology has in 2022 delivered better operating results, with a consolidated operating revenue of NT\$6.729 billion, a net income of NT\$735 million and an EPS of NT\$6.91. The report on the business position of 2022 and the business plan for the current year is as follows :

- I. 2022 Business Report
- (I) Business plan implementation result
- 1. Consolidated

The Company’s 2022 consolidated net operating revenue was NT\$6.729 billion, an increase of 2.27% compared to 2021 at NT\$6.58 billion. The 2022 consolidated net income for the period was NT\$735,171 thousand, an increase of 15.20% compared to 2021 at NT\$638,162 thousand, earnings per share after tax was NT\$6.91.

Unit: NTD thousand

| Item                              | 2022      | 2021      | Increase (decrease) amount | Change ratio % |
|-----------------------------------|-----------|-----------|----------------------------|----------------|
| Operating revenue                 | 6,728,995 | 6,579,554 | 149,441                    | 2.27%          |
| Operating cost                    | 4,994,017 | 4,980,918 | 13,099                     | 0.26%          |
| Operating margin                  | 1,734,978 | 1,598,636 | 136,342                    | 8.53%          |
| Operating income                  | 803,612   | 760,533   | 43,079                     | 5.66%          |
| Non-operating income and expenses | 105,698   | 37,814    | 67,884                     | 179.52%        |
| Income before income tax          | 909,310   | 798,347   | 110,963                    | 13.90%         |
| Net income                        | 735,171   | 638,162   | 97,009                     | 15.20%         |

- 2. Parent Company Only

The Company’s 2022 net operating revenue was NT\$5.795 billion, an increase of 13.11% compared to 2021 at NT\$5.123 billion. The 2022 net income for the period was NT\$735,171 thousand, an increase of 15.20% compared to 2021 at NT\$638,162 thousand, earnings per share after tax was NT\$6.91.

Unit: NTD thousand

| Item                              | 2022      | 2021      | Increase (decrease) amount | Change ratio % |
|-----------------------------------|-----------|-----------|----------------------------|----------------|
| Operating revenue                 | 5,794,860 | 5,123,089 | 671,771                    | 13.11%         |
| Operating cost                    | 4,289,958 | 3,821,276 | 468,682                    | 12.27%         |
| Operating margin                  | 1,504,902 | 1,301,813 | 203,089                    | 15.60%         |
| Operating income                  | 679,965   | 580,393   | 99,572                     | 17.16%         |
| Non-operating income and expenses | 201,407   | 176,126   | 25,281                     | 14.35%         |
| Income before income tax          | 881,372   | 756,519   | 124,853                    | 16.50%         |
| Net income                        | 735,171   | 638,162   | 97,009                     | 15.20%         |

(II) Status of budget implementation: The Company did not release its financial projection for 2022. Thus, it is not applicable.

(III) Financial income, expenditure, and profitability analysis

1. Consolidated

Unit: NTD thousand

| Analysis                         | Item   | 2022   | 2021   |
|----------------------------------|--|--------|--------|
| Financial income and expenditure | Interest income                                    | 13,382 | 12,889 |
|                                  | Interest expense                                   | 1,714  | 1,451  |
| Profitability                    | Return on assets (%)                               | 11.98  | 11.09  |
|                                  | Return on equity (%)                               | 23.93  | 21.82  |
|                                  | Net profit before tax to paid-in capital ratio (%) | 85.49  | 75.06  |
|                                  | Net profit rate (%)                                | 10.93  | 9.70   |
|                                  | Earnings per share (NTD)                           | 6.91   | 6.00   |

2. Parent Company Only

Unit: NTD thousand

| Analysis                         | Item   | 2022  | 2021  |
|----------------------------------|--|-------|-------|
| Financial income and expenditure | Interest income                                    | 6,957 | 8,202 |
|                                  | Interest expense                                   | 1,658 | 1,417 |
| Profitability                    | Return on assets (%)                               | 13.06 | 12.46 |
|                                  | Return on equity (%)                               | 23.93 | 21.82 |
|                                  | Net profit before tax to paid-in capital ratio (%) | 82.87 | 71.13 |
|                                  | Net profit rate (%)                                | 12.69 | 12.46 |
|                                  | Earnings per share (NTD)                           | 6.91  | 6.00  |

#### (IV) R&D Status

Limitations of hardware computing capabilities in the past have created restrictions on many software functions. Up till today, the hardware computing capabilities continue to advance and boost developments whether in mobile device application developments, the number of connections to Internet-of-Things, and its applications in various industries. The rapid growth of big data and the utilization of data mining and AI calculation has led to innovation put into practice, cloud computing becomes universal and the containerization of software development, responding to factory automation of Industry 4.0. All types of business and industry can develop innovative applications and increase business opportunities. The commercial use of 5G has expedite innovations and applications by all industries to raise industry competition. The Company has for many years continued its professional technological research and development and application software research and development which have won good reviews from customers. Concurrently, the technology team has researched and developed, and designed suitable structure and various services for the IT, CT, OT and cloud computing platforms with the industry knowledge that they have learned from their development experiences for customers' projects. The focus for this year is continuous new product research, and development of new functions for existing products. Some of the Company's key R&D are as follows:

1. Manufacturing business:  
R&D for the digital transformation of automated High Performance Computing (HPC) for intelligence platform.
2. Telecommunications business:  
R&D in Artificial intelligence for IT operations (AIOps).
3. Financial Services Business:  
R&D in auxiliary mechanisms for AI in fraud detection and investigation.
4. All sectors:
  - (1) R&D in hidden anti-encryption mechanism.
  - (2) Practice and expansion of highly flexible AIoT technology platform and field application validation.

## II. Summary of Business Plan 2023

### (I) Business Policy

1. To cope with the enormous amount of data easily generated by various cloud services and smart mobile devices applications, the AI application model for different fields is constructed from the diverse and huge amount of data analytical applications for different industries and the utilization of deep learning algorithm that has gradually become more mature over the years. We will propose suitable solution plans for industries based on the company's experiences in high-tech manufacturing, telecommunications, financial services and retail sectors from the

big data analysis, AI deep learning algorithm and so on applications. This includes consultation, platforms, and analytical tools (automatic modeling).

2. Promote cross-industry alliance

The application software and hardware of the cloud services are mostly based on shared mechanism. This is supportive in reaching the goal of energy saving and carbon reduction which further reduces costs. Therefore, cross-industry alliance will be one of the success factor for cloud services on the condition of finding a suitable business model for the cross-industry alliance. The Company is preparing to promote cross-industry alliance and to develop a suitable business model to realize a profit model based on an added-value chain (such as jointly construct a B2C service operation model for O2O - Virtual/physical mall with shopping media, physical stores and logistics). Telecommunications operators who have made heavy investments in 5G construction would inevitably have to include added-value service income other than telecommunications services. Among those, the extension is based on connecting with the system integration suppliers, such as, Stark Technology, to add information service income that are more relevant to customers besides the original telecommunications services.

3. Expand software integration and cloud service

The coverage of business applications and technical services can be easily expanded through cloud services. The key businesses of the Company include e-commerce platforms (e.g. shop management, integrated order management, personalized customer management, customer browsing behavior tracking analysis, operation data dashboard), AI digital transformation (e.g. providing digital platform to customers, commercial smart data analysis, enterprises collaborations and production applications, video and audio streaming, AI photo editing services), AI interactive marketing platforms, AI data science platforms, AI robots applications, microservices (containers) development management platform, and Managed Detection and Response (MDR).

4. Promoting Next Generation Data Center (NGDC)

Businesses are receiving sufficient support in the handling of different types of data as the software and hardware of information technology evolve. Concurrently, it gradually increases the complexity of data center and unfolds the never before seen challenges in management. Examples are: Computing environment includes standalone/cluster, virtual machine/cluster, microservices@container, data processing includes WebService@CPU, DataAntlytics@CPU/GPU, HPC/DL/ML@CPU/GPU. The control and management of data center has also extended to the linked external cloud service data center. All of the above shows the

rigorous challenges faced by the Next Generation Data Center (NGDC). The NGDC management structure needs to be able to concurrently manage and allocate the standalone machine, virtualization, container, and so on control system resources, supporting enormous data mining, machine learning, deep learning and general IT application execution for the CPU or GPU computing resources. At the same time, it has to possess flexibility in cloud service interface and quantify information system resource utilization ratio, and more functions.

5. Expand application software developments of core businesses

The Company's core businesses are: Large IT integration projects across sectors in manufacturing, finance, telecommunications, government institution, and education and research units. We have already developed application software in these core businesses (such as, ERP, MES, PLM, AML, CEM). In the future, we will continue to expand developing more types of application software and services for the customers. Simultaneously, in coping with huge demands for innovative services, such as, 5G/AI/IoT/edge computing, the Company is planning to join hands with specialized manufacturers in various fields to provide a more diverse and complete service for the customers.

6. The telecommunication sector is providing quicker data services and wider bandwidth usage. In recent period within ten years time, the entire mobile industry has officially entered into the Big Data era developing machine learning and artificial intelligence. The Company has been coping with this trend early on in the previous few years, began big data related application R&D and establishment. Related indicator projects include the major telecommunications operators' Big Data Solution to conduct customer core system availability data collection and statistical analysis. This leads to the increase in the overall core system availability, accelerating various trouble repair and system effectiveness planning. It also utilizes Data Analysis Expression. It is hoped to achieve the various recommended mechanism of Omni Channel. Various telecommunications companies have begun related 5G construction in 2020. The Company continues to provide the required 4G/5G backbone OTN capacity expansion and pursue business opportunities in the construction of Small Cell base stations that are required for raising signal coverage conducted after the 5G-based backbone construction completion of the six cities. Concurrently, it coordinates the telecommunications company planning and provides IT services to its customers.

7. With the advancement of the transmission technology and the rapid development of the Internet-of-Things (IoT), business models based on IoT have been proposed and tested for market acceptance. The Industry, Science and Technology International

Strategy Center stated that the global IoT market has exceeded USD1 trillion for the first time in 2021 from USD631.4 billion in 2017 with growth till 2022. The Company utilizes its experiences accrued over the years in core IT technology and related software and hardware construction for different industries. It aggressively develops business opportunities relating to IoT application in professional fields.

(II) Expected sales volume and its basis and important production and sales policies

In December last year, with the efforts of all of our management and employees, the Company has completed the 2022 Business Plan:

- Government Organizations: Government units enhance information security and continue to promote digital economy, Internet of Things, innovation and entrepreneurship and other related projects , including network communication construction (for example: 5G private network), mobile bandwidth services, e-commerce, smart logistics, smart medical care, smart commerce, testing sites, industry-academia cooperation, training of digital talents, and regulatory adjustment, and so on.
- Manufacturing: There are well-known domestic and foreign manufacturers driven by the trend of Industry 4.0 and successful cases of using big data and AI calculation to improve the yield of production lines. It is one of the important investment projects for the manufacturing industry to upgrade its competitiveness by introducing big data and AI analysis applications. In the field of AI (GPU Computing), in addition to the high-speed and parallel (CUDA) computation performed by the GPUs, how to deliver the data to the cluster of GPUs at higher speed is another field we invest in for construction. As more AI-related data require processing, the throughput is highly demanded, and the GPU cluster can be closer to the storage and file system access. This is a technology and current trend. However, the first investment into Industry 4.0 is to complete the introduction of factory automation. Big data will drive the growth of flash drives. The cooperation between domestic manufacturers and the international manufacturers is getting more and more frequent, and the security of information access and protection capability has also become an important indicator of the manufacturing industry. The impact of accessing such data through the network will also drive the specification replacement of network information security equipment. In addition, in response to the market application of big data, the manufacturing industry begins to develop IoT products vigorously, and automotive electronics will be an important part of this. According to the regulations governing automotive electronics, the data retention period in the manufacturing industry will be extended from 3 years to 15 years. This demand will accelerate the elimination of tape backup equipment and increase the growth of enterprise hard disks. In addition to the growth of data volume, the speed of data is also one of the focuses of big data. In recent years, under the protectionism and trade, technology wars, the trade or economic sanctions that have been imposed on enterprises and individuals due to disputes and conflicts of interest between countries, all B2B and B2C transactions must confirm whether the transaction counterparty is blacklisted. The Company made use of our experience in AML projects for over 50% of the financial service industries in Taiwan to research and develop the anti-fraud cloud service for name checking. This service can assist many domestic and overseas manufacturers to meet the extended international regulations in conducting review of business partners and counterparties with a complete verification mechanism.

- Financial industry: The financial service industry is actively adopting Fintech, which will bring about many innovations and subversions, and allow enterprises to start using new technologies to compete. Therefore, the Regtech must exist at the same time for companies or organizations to confirm compliance issues. For example, the use of technologies such as smart analysis and machine learning can automatically identify the presence of a particular regulation. In particular, it is to detect new changes to the laws and regulations that cross disciplines helping companies adapt to these changes. According to the forecast of international business research organization, the RegTech Market is expected to grow and the compound annual growth rate would be 24.4% by 2025, from US\$6.26 billion in 2020 to US\$18.89 billion in 2025. Anti-money laundering and anti-fraud demands are the major growth. In particular, the demands for anti-fraud, the Bank has been fined nearly NT\$ 200 million by the Financial Supervisory Commission for fraud involving customers in the most recent 5 years. In addition to the recent prevalence of online transactions, there is an endless stream of phishing SMS or website frauds. The FSC has also announced the 21 Commandments. However, traditional rule-based methods cannot detect frauds efficiently. They require a great deal of manpower to detect fraud, and increase the risk of being fined by the FSC, as well as the loss of reputation of the bank. The Company has been involved with bank customers for many years, and deeply understands the needs of customers. The Company has introduced Netguardians-Prevent fraud with smarter AI, a well-known Swiss anti-fraud software. Through 3D AI technology, it can detect the transaction activities of customers/employees/groups/the entire bank using Unsupervised Machine Learning, and the Supervised Machine Learning uses various AI algorithms to distinguish abnormal but legitimate activities from fraudulent activities. Finally, using Adaptive Feedback so that the entire AI model can fully match the bank's transactions; coupled with the fastest and the latest big data software, including Elastic Search, Spark, Mesos, Kafka, and more, to greatly improve the efficiency of fraud detection, and quickly catch the fraudulent to reduce the burden on human resources and raise the bank's reputation. Currently, a well-known financial holding company in Taiwan has already implemented this system. We hope to become the best provider of financial crime prevention management system and continue to serve our customers! Financial institutions, banks in particular, have been committed to the protection of consumers and have also begun to develop anti-fraud systems. Using AI and big data, financial institutions can analyze customers' daily trading behaviors and patterns and identify them when their accounts are deviating from the ordinary. The system will issue an alarm immediately to remind if there is any fraudulent activity, by utilizing AI and big data.
- Telecom industry: Due to the increase in 5G OTN subscribers, capacity expansion continues as planned. The industry begins to build small cell bases in order to improve 5G signal coverage. With the explosive growth of smart mobile devices, the explosive growth of various mobile APPs, including data processing, multimedia applications, and APPs related to food, clothing, housing, transportation, education, and entertainment will also be expected. The combination of personal devices (customers of operators), smart mobile devices, and mobile APPs is expected to generate big data—;Telecommunications companies are given such unique customer experience data, and are bound to improve customer satisfaction through the introduction of Customer Experience Management (CEM) platform, thereby increasing sales opportunities of telecommunications products. Applications developed by large developers, such as AR, VR, self-driving cars, and climate control, must be combined with the back-end cloud system through Mobile Edge Computing (MEC) built in telecommunication companies. Meanwhile, under the competition of cable TV industry's upgrading of DOCSIS 3.1 (providing the internet access speed for terminal

cable subscribers up to 500Gbps-1Gbps), CHT must speed up the construction of NGPON. In response to the implementation of 5G, the Company's telecommunications technology team will focus on the expansion of the backbone OTN network and the signal amplification provided by 5G CPE and Small Cell in various fields. Applications that require ultra-low latency and fast response can be expected to be realized through 5G and edge computing. By then, there will be more innovative applications and other demands to flourish in various industries.

- Education and research: With the coming of the era of big data and the technology upgrade and application of big data cloud storage, the big data storage in various professional fields of various academic institutions will be different from the previous thinking framework, in which data storage, statistics, analysis, and prediction will become the direction that each academic and research unit will pursue and deploy in the future, not only to improve the overall quality of teaching and research, but also to further cultivate new professional talents. In the next few years, due to the government's strong promotion of AI deep learning application innovation, the "State Grid Cloud and Big Data Computing Facility Construction Project" led by the National Science and Technology Council will require the procurement of a large number of software and hardware equipment and systems related to AI deep learning computing. Relevant budgets will also be allocated for teaching and research units to execute academic and teaching-related projects, and Stark Technology will be able to act as a bridge between industry and academia. In terms of network infrastructure, there will be more requirements than ever before, and related network hardware equipment upgrades will also raise more demands than ever. In particular, with the wireless network becoming popular, there will be a new wave of demand for device speed upgrades. The related wireless network management becomes more and more important due to the increasing demand. In terms of system infrastructure construction, the cloud infrastructure is gradually saturated, except for the new project development of microservices and containers which will increase. With the cloud management mechanism, the development will move toward the hybrid cloud. With the increasing demand for cloud-based mobile services, the related system monitoring and management will be developed towards mobile device APP. Due to the growing threat of information security and the extreme shortage of professional information security talents, academic and research units will consider network and information security remote monitoring and maintenance services, and promote network management requirements, which will be the focus.
- Healthcare: Develop a smart healthcare platform that integrates telecommunications, medical institutions, and medical units to apply healthcare information to better implement healthcare services. Using this platform, Stark Technology can branch out to district hospitals and clinics that we have less involvements in the past, and apply our past experiences at medical centers and regional hospitals to provide to hospitals that are closer to the public. Furthermore, in the medical field, AI deep learning continues to provide more accurate assistance to doctor consultation than actual clinical practice. In addition, with the collaborative R&D such as National Taiwan University, Yang Ming Chiao Tung University, and National Cheng Kung University in the medical field, we can anticipate the introduction of related hardware and software solutions. The introduction is bound to be one of the projects actively invested by all medical institutions and medical units.
- E-commerce and retail industry: With more than 10 years of experience in telecom and e-commerce, and the support of global information technology manufacturers, the Company has branched into the retail application system service and is committed to the development of highly flexible AIoT smart retail for the payment and donation of the retail terminal, and the construction of end-to-end services including payment, collection, bill payment, use of service, suggestions, and receipt storage. In addition

to the system development, we also introduce system application tools to help customers perform routine store management, integrated order management, personalized customer operation, customer browsing behavior tracking and analysis, operational data dashboard, and AI business intelligence data analysis from customer data platform, and marketing interaction design.

- All industries: As mobile applications and cloud services mature, the demand for electronic data storage and applications will grow rapidly and significantly. The management, search and utilization of large amounts of structured and unstructured data has become an important IT development direction. At present, the use of unstructured data such as text, video, and audio has become very common in various industries, and the amount of data has increased rapidly. The demand for search and subsequent application of data has also arisen greatly. At the same time, information security issues are those that would never cease from generation to generation. Fortunately, the rise of blockchain technology and its feature with complete prevention of data tampering during transmission have enabled various fields to begin R&D and verification, and the start of introducing applications. It is foreseeable that there will be more and more related innovative applications developed in the field of information exchange in the future. In addition, from the perspective of the R&D trend of the major information security manufacturers, the new generation of information security defense technology will use the big data analysis, User Behavior Analytics, Deception, and Isolation technologies to develop products with machine learning and cognitive capabilities. It is predicted that large enterprises will adopt this new technology; the above are potential business opportunities of the Company.

### III. Future development strategies of the Company

The Company's long-term development strategy remains unchanged. Based on "speed" and "talent," more value-added and application software will be developed. We will satisfy the needs of enterprise customers for large-scale integrated systems with the fastest "speed" and recruit and train outstanding IT talents. The short-term strategy is to maintain the existing business and focus on "cloud service", "new generation data center management framework", "big data", "AI", "Industry 4.0", "Internet of Things", and explore new business opportunities from the issue of "cyber security". Looking at the booming development of "cloud" and "devices", the business opportunities that the Company sees are: There are potential innovative user experiences (app) that are to be developed for the different sectors. There is a considerable demand for many device manufacturers to combine the Company's experiences in various industries and related integration of cloud computing developing opportunities together.

### IV. Impacts of the competitive environment, the regulatory environment, and the overall economic environment

Currently, the Company is one of the largest system integrators in Taiwan in terms of revenue, profit or company size. Therefore, the impact from the external competition is positive, as we are better at system integration than other competitors. More stable finances, more talents, more products, and more popularity with the customers. At the same time, we will continue to explore new business opportunities in content supply and service.

In terms of the industry, the technology industry has continued to build fabs and expand production, telecommunication companies have continued to expand capacity in OTN, 5G has begun to increase signal penetration (Small cell implementation), the competition between telecommunication companies and cable operators in bandwidth supply to terminal users (G-PON vs. DOCSIS 3.1), the financial service industry continues to invest in Fintech and Regtech, while the original telecommunication service revenue is shrinking rapidly, it has developed into a variety of services. Most of which are related to information services. This development brings opportunities for Stark Technologies to branch out to various disciplines and collaborate with the telecommunications operators. Many domestic banks have set up branches overseas; the Financial Supervisory Commission has included Money Laundering Control Act (AML) into its administrative rule; companies start to use AML platforms to avoid enterprises that are sanctioned; the retail industry is responding to the strong development of China. Taiwan is bound to go on this retail road. The question is how to provide a sales model that is small-scale yet comprehensive and this would become the development trend in recent years. Information security threats (such as file encryption and DDoS-type extortion attacks) are getting more serious. Endpoint protection and monitoring (EDR/MDR) has become the last mile in the decisive battle of information security offense and defense; there are more successful cases of big data technology (using AI deep learning and machine learning) and applications; blockchain applications in various fields; the beginning of introduction for Industry 4.0 by manufacturing industry; the more diversified development of the Internet of Things (IoT) (e.g.: wearable devices, in-vehicle systems, home automation, professional fields such as airport and port monitoring and disaster prevention monitoring); the work from home method (such as at home office) driven by the COVID-19 pandemic; and changes in lifestyle habits (e.g. digitization and networking), these have resulted in a surge in demand for the global ICT industry, all of which clearly demonstrate positive impacts to the Company. We will still have many opportunities and new markets for development.

We wish you all good health and prosperity.

Chairman      Liang, Hsiu-Chung

## Two. Company Profile

I. Date of Incorporation: March 24, 1993

II. Organization and Operations

1. Stark Technology Inc. was incorporated on March 24, 1993 with a registered capital of NT\$10,000,000. At present, it is mainly engaged in the distribution of computer mainframes and peripheral equipment, spare parts, and computer books. Design, research, development and sales of computer software and hardware, maintenance of computer mainframes and peripherals, corporate computer design, import and export of the preceding related products, agency of quotation and bidding for products of above-mentioned manufacturers at home and abroad, and computer equipment Installation business, book wholesale, transactional machinery and equipment wholesale, international trading, business management consulting, information software service, data processing service, leasing business, intermediary service, electronic information supply service, general advertising service business, and so on.

March 1993 Stark Technology Inc. was created.

Obtains reseller agreement of SUN Micro System for computer software and hardware product solutions.

July 1993 Established Chiayi branch office.

January 1994 Increased cash injection NT\$13,750,000 and total capital = NT\$23,750,000.

May 1995 Established Taipei branch office.

June 1996 Established Tainan branch office.

July 1996 Established Kaohsiung branch office.

Obtained reseller agreement of Adobe systems for multi-media software products.

Increased cash injection NT\$47,250,000 and total capital = NT\$71,000,000.

September 1996 Purchased the twelfth floor of King-Din business building and land in Hsinchu City due to business expansion.

October 1996 Obtained reseller contract of Oracle Corporation for software solutions.  
Obtains software reseller agreement of US BroadVision Inc.

March 1997 Established subsidiary of the USA Stark Technology Inc.

June 1997 Obtained reseller agreement for networking software and hardware products of Cabletron Company.

Purchased the thirteenth floor of King-Din business building and land in Hsinchu City due to business expansion.

July 1997 Established the first and second business unit with major focus on IBM computer server, IBM PSG product line, SUN computer workstation, mainframe and peripheral equipment for business distribution, installation, integration, warranty and after services.  
Obtained one of the major authorized reseller contracts of Microsoft Corporation for large enterprise projects, windows software packages and distribution of AER software.

Increased cash injection NT\$84,000,000 and total capital = NT\$155,000,000.

August 1997 Obtained reseller agreement of Sybase Inc. for Sybase software, database and middleware solutions.

- October 1997 Established the third business unit with major focus on business development and distribution for computer peripherals and application software solutions.  
Established Hualien and Taichung branch offices.  
Purchased the eleventh floor of King-Din business building and land in Hsinchu City due to business expansion.
- January 1998 Obtained printer server reseller agreement of Hong Kong Axis Communications Company.
- March 1998 Increased cash injection NT\$40,000,000 and total capital = NT\$195,000,000.
- May 1998 Established a fourth business unit with major focuses on Computer System Integration, Software and Hardware distribution businesses and provides business development for other business units.
- June 1998 Applied to become a public company and capitalization of retained earnings, and capitalization of capital surplus which had been approved by an official letter issued by Securities and Futures Commission, Ministry of Finance, Ref. (1998) Tai-Cai-Zheng (I) No. 53805. Increased Capital = NT\$297,250,000.  
Obtained Reseller Agreement of UGS CORP. for Solid Edge software products.  
Obtained Reseller Agreement of Axis Communications Company for Printer Server, Networking CD, DVD Server product lines.
- July 1998 Obtained Reseller Agreement of UGS Group for UG software products.  
Obtained Reseller Contract of Institute for Information Industry for SeedNet WAN Leased Line Business.  
Obtained Reseller Agreement of OKNet Company for Translating Machine of Enterprise Networking Solutions.  
Obtained Reseller Agreement of Microsoft Corporation for MCSP Software product lines.  
Purchased the seventh floor of King-Din business building and land in Hsinchu City due to business expansion.
- August 1998 Obtained reseller agreement of Yu-Jin Computer Company for ISO DCS software products.
- September 1998 Obtained reseller agreement of Synchronous Communication Corp. for ISDN Networking Back-Up Systems.
- October 1998 Obtained service reseller agreement of Digital United Inc. for SeedNet Enterprise Networking Solutions.
- November 1998 Established the fifth business unit with major focuses on R&D, development and business distribution for Information management, E-Business and WAN system solutions. Establishes the sixth business unit that focuses on managing individual branch offices for product selling and after-service solutions.  
Obtained Reseller Agreement of Oracle Corporation for ERP software solutions as a way to penetrate into enterprise resource planning areas.  
Purchased the eleventh floor of King-Din business building and land in

- Hsinchu City due to business expansion.
- December 1998 Entered into E-Business Planning Solutions industry.
- January 1999 Obtained antivirus software package reseller agreement of Trend Micro Incorporated.
- February 1999 Obtained reseller agreement of Epson Taiwan Technology & Trading LTD - Epson laser printer product line.
- March 1999 Obtained reseller agreement of T Zone Company of networking software and hardware product lines.
- June 1999 Published by Business Week, in 1998, Stark Technology ranked 329 in the top 500 service industry operations and #7 of ROI (Return Of Investment). Listed as over-the-counter on the GreTai Securities Market (GTSM).
- October 1999 Processed capitalization of retained earnings, and capitalization of capital surplus which has been approved by an official letter issued by Securities and Futures Commission, Ministry of Finance, Ref. (1999) Tai-Cai-Zheng (I) No. 86577. Increased Capital = NT\$508,000,000.
- January 2000 Listed as over-the-counter on the GreTai Securities Market (GTSM).
- February 2000 Established Taoyuan and Chungli business agency offices.
- April 2000 Obtained software, hardware and service reseller contracts of Taiwan IBM. Obtained WAN E-Business software distribution contract of SELECTI CA, INC. Obtained service contract of NETCOM E-doctor Antivirus Software Systems.
- June 2000 Processed capitalization of retained earnings, and capitalization of capital surplus which had been approved by an official letter issued by Securities and Futures Commission, Ministry of Finance, Ref. (2000) Tai-Cai-Zheng (I) No. 47293. Increased Capital = NT\$836,319 thousand. Ranked #20 out of Taiwan's top 5000 large enterprise companies by China Credit Information Services in 2000.
- August 2000 Invested in SRAIN Investment Co., Ltd.
- October 2000 Obtained reseller contract for remote control system of Cyber Vision Inc. Obtained system integration software product distribution rights of TIBCO Software Inc.
- November 2000 Obtained database software package distribution contract of SOFTWARE AG Inc..
- December 2000 Issued first time CB (Convertible Bond) to GreTai Securities Market (GTSM).
- January 2001 Obtained reseller contract of EMC Software and Hardware product lines.
- March 2001 Established Taipei NeiHu branch office.
- May 2001 Published by Business Week, Stark Technology ranked #1 out of the top 500 Service Industry Operations of Software Provider Companies in 2000. Published by the Common Wealth Magazine, Stark Technology ranked 24 out of 500 Service Industry Operations of ROA (Return Of Assets) in 2000.
- September 2001 Processed capitalization of retained earnings and capital surplus and issuance of new shares from convertible bonds which had been approved by an official letter issued by Securities and Futures Commission, Ministry of Finance, Ref. (2001) Tai-Cai-Zheng (I) No. 144158 and (2001) Shang No. 09001392920. Increased capital = NT\$1,317,478,290.

- September 2001 Listed on Taiwan Stock Exchange (TWSE) as approved by TWSE and Securities and Futures Commission, Ministry of Finance.
- December 2001 Converted ECB to issued new stock sharing which had been approved by an official letter issued by the Ministry of Economic Affairs, Ref. Jing-Shou-Shang-Zi No. 09101013010 and increased capital to NT\$1,318,165,050.
- June 2002 Merged with TAIHONG Technology Co.
- July 2002 Published ECB (Euro-Convertible Bond) US\$30 Million in Luxembourg. Processed capitalization of retained earnings and capital surplus which had been approved by an official letter issued by the Securities and Futures Commission, Ministry of Finance, Ref. (2002) Tai-Cai-Zheng (I) No. 09100129894. Increased capital = NT\$1,825,796,920.
- October 2002 Merged with TAIHONG Technology Co. Issues new shares (Quantity = 17,703,888 shares, per stock value = NT\$10.). Approved by an official letter issued by Securities and Futures Commission, Ministry of Finance, Ref. (2002) Tai-Cai-Zheng (I) No. 0910154367.
- November 2002 Capital after merging with TAIHONG Technology Co. was NT\$2,102,835,800. Merged base date was November 1, 2002.
- May 2003 Published by the Common Wealth Magazine, Stark Technology ranks 108 out of 500 Service Industry Operations in 2002.  
Published by Business Week, Stark Technology ranks 114 in the top 500 Service Industry Operations in 2002.
- July 2003 Indirect investment in mainland China through an investee in a third location for the establishment of STARK (Ningbo) Technology Inc. Total amount of investment at US\$3 Million. Approved by an official letter Ref. Jing-Fan-Er-Zi No. 092018747 from the Ministry of Economic Affairs.
- July 2003 Obtained USA Storage TEK Distribution Contract for Storage Product Solutions.
- August 2003 Processed capitalization of retained earnings which had been approved by an official letter issued by Securities and Futures Commission, Ministry of Finance, Ref. (2003) Tai-Cai-Zheng (I) No. 092001256510. Increased Capital = NT\$2,240,119,380.
- September 2003 Increased capital and published new stock (Quantity = 23,728,358), approved by an official letter issued by Taiwan Stock Exchange Ref. Tai-Zheng-Shang No. 0920024294.
- September 2003 Obtained Hitachi Data Solutions Distribution Contract for Storage Product Solutions.
- December 2003 Ranked #1 out of 8 for “MIS Best Choice-System Integration Service” from the Institute for Information Industry.
- July 2004 Obtained Cellopoint Reseller Contract for Spamware Prevention System.
- November 2004 Decreased Capital and Treasure Stock: (Open Public Stock Quantity = 221,583,938), approved by an official letter issued by the Ministry of Economic Affairs, Ref. Jing-Shou-Shang-Zi No. 09301209820.
- January 2005 Obtained CelloPoint Contract for Spamware Prevention System.
- April 2005 Signed reseller contract with Unigraphics Solutions, USA (Teamcenter Software Solutions).
- May 2005 PLM 3 of FSP Technology Inc. successfully obtained on-line status.

- December 2005 Liquidated all unsecured and convertible Cooperate Bonds.
- January 2006 Became Sun Microsystems' Authorized Reseller, Provider of CDP, and ENT of Sun products in Taiwan.  
Obtained the Microsoft Software Solutions Partner Contract of The Year 2006 in Taiwan.
- November 2006 Obtained government official patent rights of "software packaging, financial data processing systems and processing methods for financial trading solutions".
- January 2007 Became "VMware Enterprise Partner."
- August 2007 Became Oracle CAP Level Professional Services Provider (Oracle Certified Advantage Partner).
- December 2007 Obtained contract for Distribution of NetApp storage products in Taiwan.  
Established a Stark subsidiary in China (Shanghai Stark Technology Inc.).
- January 2008 Recognized as "Citrix Gold Partner (CSA Gold, Citrix Solution Advisor Gold Level)."
- April 2008 Passed NetApp Certification and obtains NetApp ASP contract for Authorized Technical Service Provider.
- August 2008 Decreased cash capital (Paid-In Capital = NT\$1,329,503,630), approved by an official letters issued by Financial Supervisory Commission Ref. Jin-Guan-Zheng (I) No. 0970038218 and by the Ministry of Economic Affairs, Ref. Jing-Shou-Shang-Zi No. 09701214030.
- January 2010 Became Oracle Partner Network Platinum Member.
- May 2010 Invested in Stark Inforcom Inc..
- April 2010 Became one of the founding members of Taiwan Cloud Computing Association.
- December 2011 Became "Symantec FY11 Platinum System Integrator."  
Became NetAPP Platinum Partner.  
Became 2011 HP ESSN Gold Partner.  
Became 2011 HP Networking Diamond Club Partner.  
VMware Premier Solution Provider.
- May 2014 Ranked 303rd place for service industry in the Survey for 2000 Enterprises for 2014 by CommonWealth Magazine.
- June 2014 Rated A+ in the 11th information evaluation.
- July 2014 The Company was ranked among the TOP 5000 large enterprises in Taiwan by the CRIF TAIWAN in 2014, and ranked 347th in terms of service revenue and 516th in business performance in the service industry.
- April 2015 Rated A+ in the twelfth information evaluation.  
Among the top 6% to top 20% companies during the 1st Corporate Governance Evaluation.
- May 2015 Ranked 283rd place for service industry in the Survey for 2000 Enterprises for 2015 by CommonWealth Magazine.
- July 2015 The Company was ranked among the TOP 5000 large enterprises in Taiwan by the CRIF TAIWAN in 2015, and ranked 310th in terms of service revenue and 366th in business performance in the service industry.
- April 2016 Among the top 6% to top 20% companies during the 2nd Corporate Governance Evaluation.

- May 2016 Ranked 269th place for service industry in the Survey for 2000 Enterprises for 2016 by CommonWealth Magazine.  
The Company was ranked among the TOP 5000 large enterprises in Taiwan by the CRIF TAIWAN in 2016, and ranked 313rd in terms of service revenue and 495th in business performance in the service industry.
- November 2016 Received product distribution agency contract from Israel-based Mellanox Technologies.  
Won the Microsoft CSP distribution agency contract and became the cloud solution provider authorized by Microsoft.
- December 2016 The Company was upgraded to a NetApp star reseller.
- January 2017 Became a Fortinet distribution partner.
- April 2017 Among the top 6% to top 20% companies during the 3rd Corporate Governance Evaluation.
- May 2017 Ranked 276th place for service industry in the Survey for 2000 Enterprises for 2017 by CommonWealth Magazine.
- July 2017 The Company was ranked among the TOP 5000 large enterprises in Taiwan by the CRIF TAIWAN in 2017, and ranked 340th in terms of service revenue and 495th in business performance in the service industry.  
A capital reduction was carried out in cash. After the reduction, the paid-in capital amounted to NT\$1,063,602,910.
- September 2017 Became a Fujitsu Select Circle Partner.
- January 2018 Acquired Solace distribution agency contract and became the authorized cloud solution provider for Solace.
- April 2018 Among the top 6% to top 20% companies during the 4th Corporate Governance Evaluation.
- May 2018 Ranked 270th place for service industry in the Survey for 2000 Enterprises for 2018 by CommonWealth Magazine.  
Signed the NVIDIA Partner Network Solution Provider Partner contract.
- July 2018 Ranked among the TOP 5000 large enterprises in Taiwan in 2018.  
The Company ranked 1,005th place in terms of mixed revenue, regardless of industry.  
The Company ranked 1,235th place in terms of business performance, regardless of industry.  
Service Industry - Revenue ranked 392nd.  
Service Industry - ranked 500th in business performance.  
Ranked 6th place in the IT system integration service industry.
- April 2019 Among the top 6% to top 20% companies during the 5th Corporate Governance Evaluation.
- May 2019 Ranked 261st place for service industry in the Survey for 2000 Enterprises for 2019 by CommonWealth Magazine.
- July 2019 The Company was ranked among the TOP 5000 large enterprises in Taiwan by the CRIF TAIWAN in 2019.  
The Company ranked 1,009th place in terms of mixed revenue, regardless of industry.  
Ranked at 388th place in terms of revenue in the service industry.

- Overall, the Company ranked 586th in terms of business performance.  
Service Industry - ranked 233rd in business performance.  
Ranked 6th place among the computer system integration service industry in terms of revenue.
- December 2019 Among the top 6% to top 20% companies during the 6th Corporate Governance Evaluation.
- April 2020 Ranked 242nd place for service industry in the Survey for 2000 Enterprises for 2020 by CommonWealth Magazine.
- May 2020 Ranked 12th among IT equipment sales and service enterprises.
- June 2020 Passed ISO /IEC 27001:2013 certification.
- July 2020 The Company was ranked among the TOP 5000 large enterprises in Taiwan by the CRIF TAIWAN in 2020.  
The Company ranked 901st place in terms of mixed revenue, regardless of industry.  
Ranked at 363rd place in terms of revenue in the service industry.  
Overall, the Company ranked 285th in terms of business performance.  
Service Industry - ranked 131st in business performance.  
Ranked 5th place among the computer system integration service industry in terms of revenue.
- December 2020 Obtained the Cisco Gold Certified Partner status.
- January 2021 Became a TeamT5 certified Partner.  
Become UGuard and become UGuard certified Partner.
- April 2021 The 7th Corporate Governance Evaluation - Outcome  
Ranking of listed companies: Listed as the companies in the top 6% to top 20%.  
Companies that rank among the top 6% to top 10% with the market capitalization of over NT\$5 billion to NT\$10 billion and are listed companies.
- May 2021 Ranked 243rd place for service industry in the Survey for 2000 Enterprises for 2021 by CommonWealth Magazine.  
Ranked 12th among IT equipment sales and service enterprises.
- July 2021 The Company was ranked among the TOP 5000 large enterprises in Taiwan by the CRIF TAIWAN in 2021.  
The Company ranked 870th place in terms of mixed revenue, regardless of industry.  
Ranked 357th place in terms of revenue in the service industry.  
Overall, the Company ranked 471st in terms of business performance.  
Service Industry - ranked 200th in business performance.  
Ranked 5th place among the computer system integration service industry.  
Obtained Palo Alto Networks Diamond Reseller qualification.
- November 2021 The Company was honored as a Sustainable Vendor by Far EasTone for three consecutive years, and won the “2021 Sustainability Pioneer - Best Partner” award in 2021.
- April 2022 The 8th Corporate Governance Evaluation - Outcome  
Ranking of listed companies: Listed as the companies in the top 21% to the top 35%.

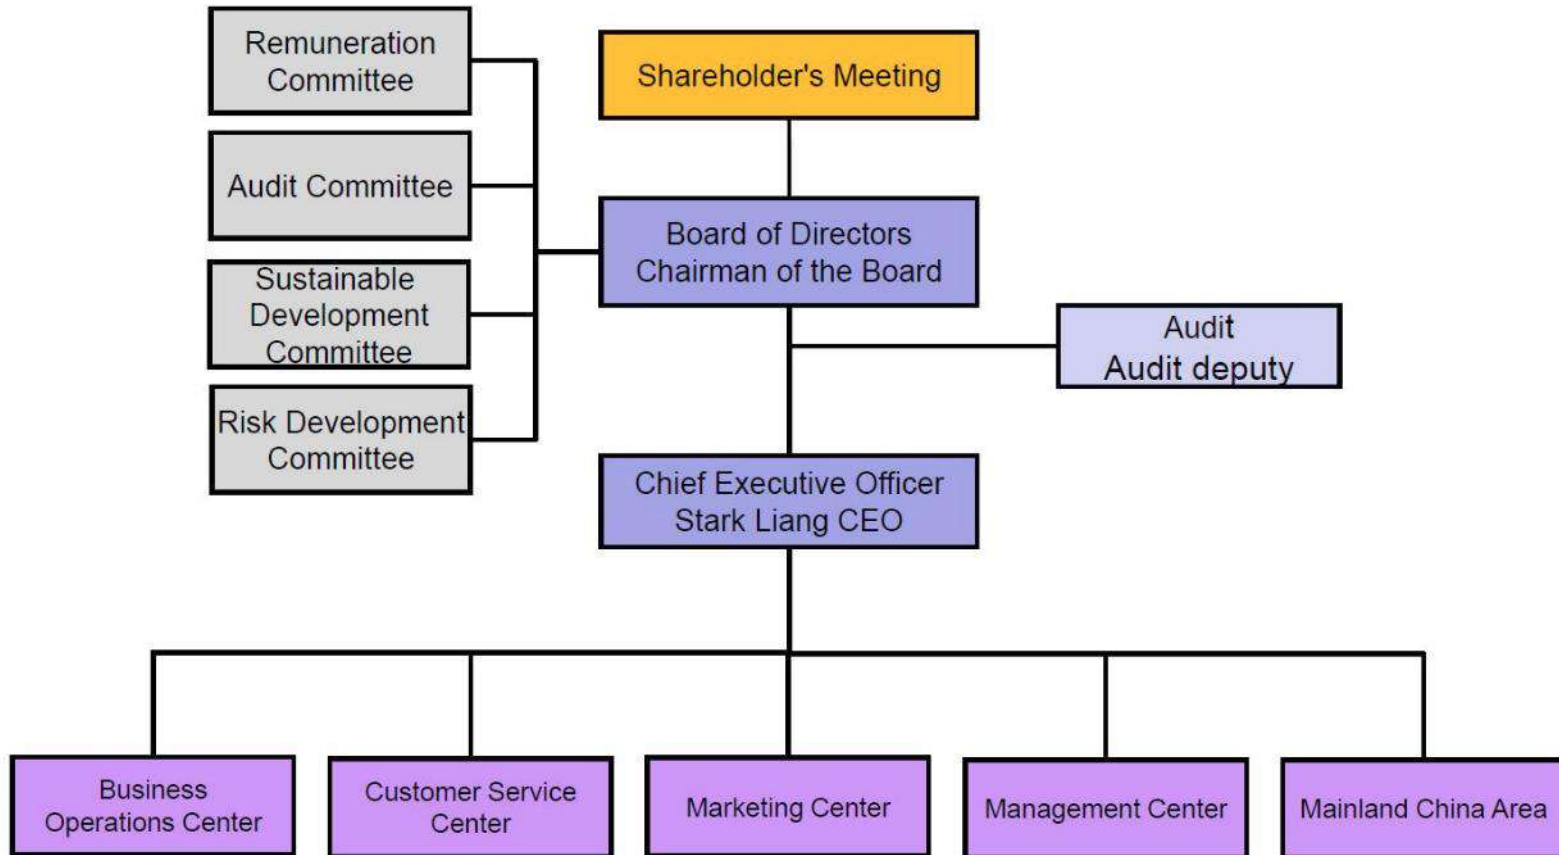

Companies that rank among the top 11% to top 20% with the market capitalization of over NT\$5 billion to NT\$10 billion and are listed companies.

- May 2022 Ranked 221st place for service industry in the Survey for 2000 Enterprises for 2022 by CommonWealth Magazine.  
Ranked 11th among IT equipment sales and service enterprises.
- July 2022 The Company was ranked among the TOP 5000 large enterprises in Taiwan by the CRIF TAIWAN in 2022.  
The Company ranked 796th place in terms of mixed revenue, regardless of industry.  
Ranking at 313th place in terms of revenue in the service industry.  
Overall, the Company ranked 441st in terms of business performance.  
Service Industry - ranked 180th in business performance.  
Ranked 5th place among the computer system integration service industry.
- October 2022 Obtained Check Point 4-star distributor qualification.
- November 2022 The Company was awarded the Bronze Medal for Talent Quality-management System (TTQS) - Enterprise Organizational Edition by the Workforce Development Administration, Ministry of Labor.  
Won the 2022 Outstanding Supplier Award from Fubon Financial Holding for three consecutive years.

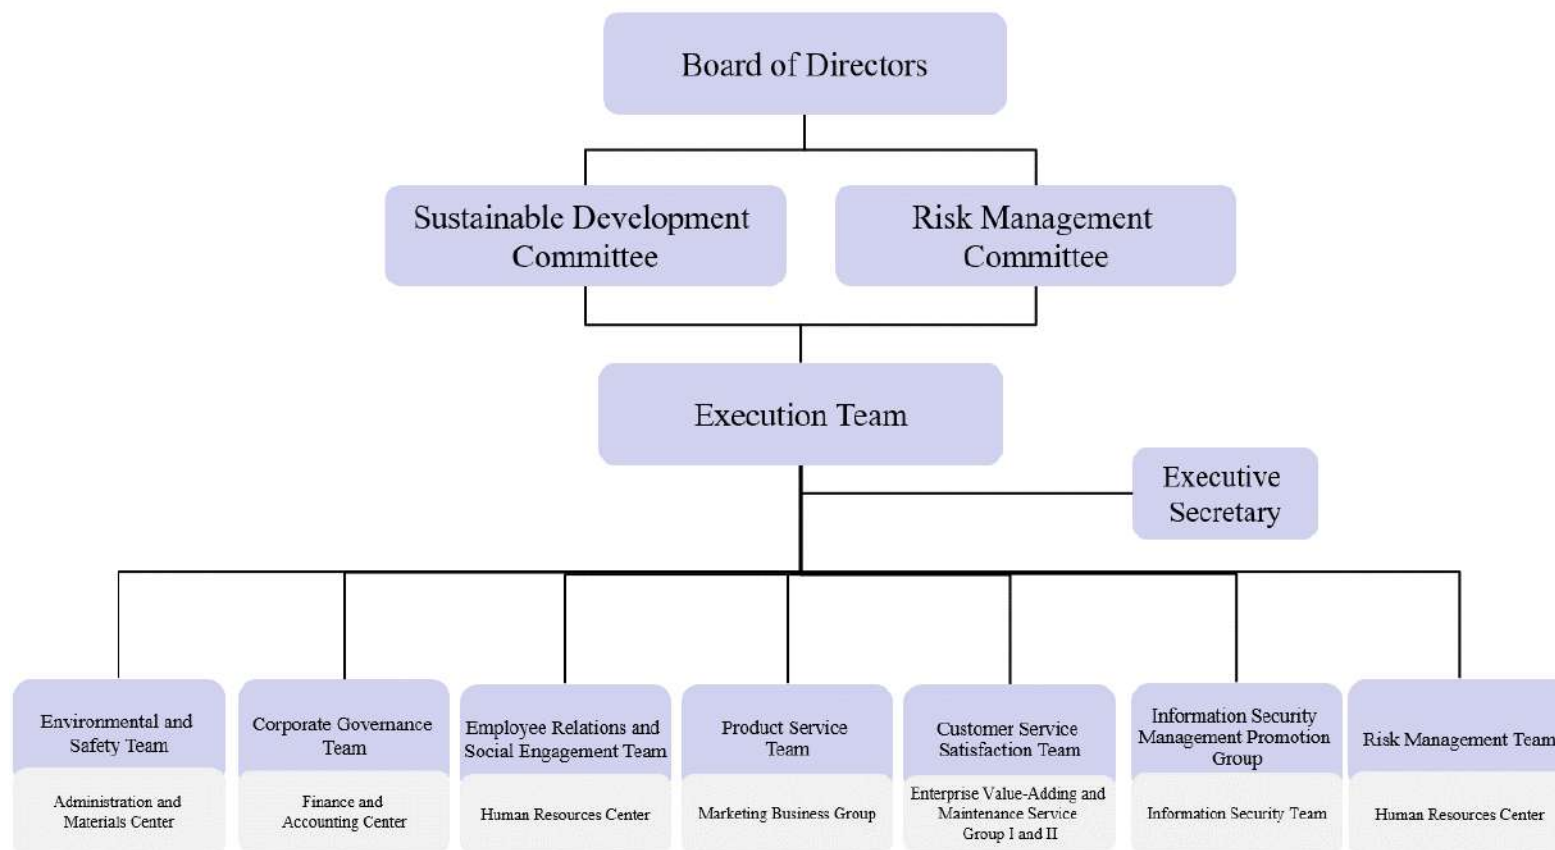

2. In the most recent year and as of the annual report publication date, merger and acquisition activities, reinvestments in affiliated enterprises and corporate reorganization, massive transfer or change of equity by the Company's directors or dominant shareholders with more than 10% stake, major changes in operating rights, operating methods, or operating contents as well as other important matters that may affect the shareholders' equity and the company: None.

### Three. Corporate Governance Report

- I. Organization System
- 1. Organization structure

### 1.1. Organizational structures of the Sustainable Development Committee and the Risk Management Committee

2. Business summary of main departments

| Main department            |                                     | Duties and functions  |
|----------------------------|-------------------------------------|---|

Note 1: The chairperson and president or person holding equivalent post (the highest level managerial officer) are the same person, spouses, or relatives within the first degree of kinship, an explanation must be given of the reason for, reasonableness, necessity thereof, and the measures adopted in response thereto: Considering the current scale and organization of the company, the Company's chairman is working concurrently as the CEO. This is reasonable and necessary because it not only contributes to consistency in decisions and execution power and it also enhances management efficiency. Both the chairman and each director can have sufficient communications on the company's current operation status and planning guideline so as to accomplish corporate governance and enhance the independence of the board of directors. There are plans to add the number of director seats in the future in order to elevate the board's duties and strengthen supervisory function. Currently, the Company already has the following measures: 1. Majority of the Board members are not concurrently an employee or managerial officer of the Company. 2. Yearly arrangements for the directors to participate in the director courses for continuing education so as to increase the operational effectiveness of the Board.

Note 2: Yu, Ming-Chang served as the Supervisor of the Company from 2010.06.14~2019.05.28.

2. Major shareholders of corporate shareholder/ director:

Note 1: Professional qualifications and experiences: Describe the professional qualifications and experiences of each director and supervisor. If he/she is a member of the Audit Committee and possesses accounting or finance profession, his/her accounting or finance background and work experiences should be specified. Lastly, state whether there have been circumstances relating to Article 30 of The Company Act.

Note 2: The state of independence should be specified for the independent director, including but not limited to whether the independent director, his/her spouse, and relatives within the second degree of kinship are acting as the director, supervisor or employee of the Company or its affiliated enterprise; the number of shares and percentage held by the independent director, his/her spouse, and relatives within second degree of kinship (or in the name of others); whether the independent director is acting as the director, supervisor or employee of a designated company that has specified relationship with the Company (refer to the establishment of public company independent directors and subparagraphs 5~8, paragraph 1, Article 3 of the regulation to comply with); the compensation amount from providing business, legal, finance, or accounting services to the Company or its affiliates in the most recent 2 years.

#### 5. Diversity and independence of the Board of Directors:

The Company has established the “Corporate Governance Best Practice Principles.” The board members’ composition shall take into account of diversity and its operation, operation pattern and development needs along with the basic conditions (such as, gender, age, nationality and culture) and professional background, technical skills and industry experiences (such as: Information technology, accounting and law) and so on aspects of diversity. Each Board member shall have the necessary knowledge, skill, and experience to perform their duties. To achieve the ideal goal of corporate governance, the Board should have the following skills as a whole: I. Business judgment. II. Accounting and financial analysis. III. Business management. IV. Crisis management. V. Industry knowledge. VI. International perspective. VII. Leadership. VIII. Decision-making, and other professional background.

The tenure for the Company’s 11th Board of Directors is from May 27, 2022 to May 26, 2025. There are 11 present directors which include 4 independent directors and 5 directors with employee identity, which accounts for 36% and 45% of all board members, respectively. The goal of less than half of the directors with concurrent employee identity has been reached.

On the age of the directors, there are 5 directors between 61~70 years old, 4 directors between 51~60 years old, 1 director between 41~50 years old and one below 40 years old. The board members have a wealth of industry and professional experiences. Independent Director Lu, Jui-Wen possesses professional accounting qualification. There are 4 members with Master’s degree, 2 PhDs. 4 of them have obtained their degrees in the USA, England and China. The members also have served at foreign companies and academic with varied cultural background and international perspectives and experiences.

In the pursuit of gender balance in the board composition, the goal is to have at least one female director and increase directors with diverse expertise, field of work and background in finance, professional academic, ESG and so on aspects, and to add 1 independent director so that more than half of the board members are independent directors and contiguous terms are up to 9 years as a maximum.

The Company’s independent directors are not under any of the circumstances as stated in paragraph 3 and 4, Article 26-3 of the Securities and Exchange Act, including none of the directors are spouses or relatives within second degree of kinship with each other, which complies with the regulations of the Securities and Futures Bureau, Financial Supervisory Commission. For each of the director’s experiences and academic background, gender, professional qualifications, work experiences, and diversity related information, please refer to the corporate governance report

Note 1: The chairperson and president or person holding equivalent post (the highest level managerial officer) are the same person, spouses, or relatives within the first degree of kinship, an explanation must be given of the reason for, reasonableness, necessity thereof, and the measures adopted in response thereto: Considering the current scale and organization of the company, the Company's chairman is working concurrently as the CEO. This is reasonable and necessary because it not only contributes to consistency in decisions and execution power and it also enhances management efficiency. Both the chairman and each director can have sufficient communications on the company's current operation status and planning guideline so as to accomplish corporate governance and enhance the independence of the board of directors. There are plans to add the number of director seats in the future in order to elevate the board's duties and strengthen supervisory function. Currently, the Company already has the following measures: 1. Majority of the Board members are not concurrently an employee or managerial officer of the Company. 2. Yearly arrangements for the directors to participate in the director courses for continuing education so as to increase the operational effectiveness of the Board.

Note 2: Tseng, Shu-Chen has retired on December 12, 2022.

Note 3: Lin, Yung-Chieh resigned on July 15, 2022.

Note 4: Chen Chia-Hua has retired on November 11, 2022.

Note 5: Cheng, Hung-Chen, Li, Chun-Te, and Fan, Wen-Lung are promoted to Vice Presidents on November 1, 2022.

## (III) Remuneration for directors, presidents, and vice presidents in the most recent year

1. Please specify the policy, system, standards, and structure of the remuneration paid to Independent Directors, and specify the relation between the amount of remuneration paid and their responsibilities, risks assumed, time contributed, and other factors:  
According to the Company's Articles of Incorporation: when the Company makes a profit for the year, the remuneration to directors shall not be higher than 5% of the balance. the board of directors is authorized to determine the level of remuneration to directors based on individual participation and contribution to the Company's operations, and in reference to the usual level of industry peers.  
Independent directors are compensated primarily based on operating result and their individual contributions to the company's performance, which are positively related to the individual responsibilities for operation of the Company and overall performance. The Company has maintained operating and profit performance above a certain level and exhibits relatively low risk. Independent directors are paid a fixed amount of compensation and allowances for the meetings attended. Compensation policies are examined whenever deemed appropriate to conform with actual operating conditions and relevant regulations and to seek the balance between the Company's sustainable operation and risk control.
2. In addition to the information disclosed in the above table, the remuneration received by the Company's Directors in the most recent fiscal year of service (including serving as the non-employee consultants of the Parent Company/all companies included in the financial statements/reinvestment businesses): NTD0 thousand.

Note: The Company's employee remuneration 2022 has not yet been processed before the printing of this annual report, which is a provisional estimate.

Note: The 2022 Director Remuneration was NTD 3,300,000.

Note: There is chauffeur arranged for the director. The chauffeur's total salary was NTD 521 thousand.

Note: Severance Pay and Pensions refer to the allocated amount for the 2022 Pension expenses and the pension paid by the company.

Note: Service ended after re-election for Chou, Chin-I on May 27, 2022.

Note: Service ended after re-election for Chan, Hui-Fen on May 27, 2022.

Note: The Company's employee remuneration figures for 2022 have not been processed before the printing of this annual report, which is a provisional estimate.

Note: Yeh, Yao-Ling was promoted to managerial officer on April 29, 2022 and was dismissed on June 8, 2022.

Note: Lin, Yung-Chieh resigned on July 15, 2022.

Note: Cheng, Hung-Chen, Li, Chun-Te, and Fan, Wen-Lung are promoted to Vice Presidents on November 1, 2022.

Note: Huang, I-Tzu was promoted to managerial officer on November 1, 2022.

Note: Chen, Chia-Hua has retired on November 11, 2022.

Note: Tseng, Shu-Chen has retired on December 12, 2022.

- (IV) Analysis of the ratio of total remuneration paid to the Directors, Supervisors, President, and Vice President in the most recent 2 years by the Company and all companies in the consolidated financial statements to the net income in the standalone financial report, and explanation of the remuneration policy, standards and combinations, procedures for determining remuneration, and their correlation with business performance and future risks:
1. Analysis of the total remuneration paid to the directors, supervisors, president, and vice presidents in the most recent 2 years as a percentage of net income:

| Item \ Year  | 2022   | 2021   |
|--|--------|--------|
| Total director remuneration as a percentage of net income                      | 3.92%  | 2.67%  |
| Total supervisor remuneration as a percentage of net income (Note)             | -%     | -%     |
| Total president and vice presidents remuneration as a percentage of net income | 14.19% | 12.29% |

Note: 2019/5/29 changed to the appointment of the Audit Committee.

2. Description of the policies, criteria and composition of compensation; the procedures to determine compensation, and their interrelationship with business performance and future risks:
  - (1) According to Article 24 of the Company's Articles of Incorporation, the board of directors is authorized to determine the level of remuneration to the chairman and directors based on individual participation and contribution to the Company's operations, with reference to the usual practice of industry peers and according to the earnings distribution method as stated in the Articles of Incorporation.
  - (2) Only the travel allowance and remuneration to directors were paid to the directors in cash and no variable compensation is paid.
  - (3) According to Article 23 of the Company's Articles of Incorporation, if there is profit made for the fiscal year, the Company shall allocate a minimum of 3% as the employee remuneration and a maximum of 5% as the director remuneration. The recipients of the employee remuneration distribution must include the employees of subsidiaries who meet certain criteria. The board is given the authorization in determining the criteria. However, where the Company still has accumulated losses, amount shall be reserved for making up the accumulated loss first. The overall rewards for the managerial officers include fixed compensation and total variable pay. The Remuneration Committee is responsible for evaluating and determining the remuneration paid to the managerial officers by referencing industry practice, their academic and work experiences, the level of duties and responsibilities for the position, professional skills and so on. Performance evaluation is conducted for the reward by taking into account the contribution of the managerial officer to the company's overall operations and the company's overall operating performance. Aspects of the evaluation index consist of goal achievement rate, revenue, profitability, operation benefits, ethical management, legal compliance and so on comprehensive considerations which shall be approved by the chairman.
  - (4) Future risk: The Company has already purchased liability insurance for the directors and managerial officers.

### III. Operations of Corporate Governance

#### (I) State of Board Operations

1. The tenure of the Company's previous (10th Term) Board of Directors ended on May 28th, 2022. A re-election of all directors was held on May 27th, 2022.
2. The number of times the Board meetings are held in the most recent year is five times (A). The attendance of the directors are as follows:
  - (1) Before May 27, 2022: 2 times.
  - (2) May 27, 2022 (inclusive) and after: 3 times.

| Title                             | Name              | Actual attendance (B) | Attendances by proxy | In-person attendance rate (%) [B/A] | Remarks                     |
|-----------------------------------|-------------------|-----------------------|----------------------|-------------------------------------|-----------------------------|
| Chairman                          | Liang, Hsiu-Chung | 5                     | 0                    | 100%                                | Re-elected                  |
| Director                          | Chen, Kuo-Hung    | 5                     | 0                    | 100%                                | Re-elected                  |
| Director                          | Tseng, I-Shun     | 5                     | 0                    | 100%                                | Re-elected                  |
| Director                          | Chen, Hsing-Chou  | 5                     | 0                    | 100%                                | Re-elected                  |
| Director                          | Liu, Hsien-Min    | 5                     | 0                    | 100%                                | Re-elected                  |
| Director                          | Yu, Ming-Chang    | 3                     | 0                    | 80%                                 | Re-elected                  |
| Director                          | Chou, Chin-I      | 5                     | 0                    | 100%                                | Previously elected (Note 3) |
| Corporate Director Representative | Tsai, Hua-Cheng   | 3                     | 0                    | 100%                                | Newly elected (Note 4)      |

2. The Company has already appointed the Audit Committee on 2019/5/29. The Board operations has become more systematic. The Board resolution matters and complete board meeting minutes are disclosed on the company website on the timely basis to enhance information transparency as required.
3. The Company's board has passed the appointment of the "Remuneration Committee" and has established the "Remuneration Committee Charter". Please refer to page 82, section (VII) The Composition, Responsibilities, and Operations of the Remuneration Committee.

Note 1: Directors, supervisors who are institutional shareholders, shall disclose the name of the institutional shareholder and the name of its representative.

Note 2: (1) In the event that Directors and Supervisors leave before the year is completed, the date when they leave shall be indicated in the remark column. The actual attendance rate (%), on the other hand, must be calculated by the number of board meetings held during service and the actual number of attendance (voting or non-voting status) in the meetings.

(2) In the event that any Directors and Supervisors are re-elected before the end of the calendar year, the outgoing and incoming new Directors and Supervisors must be both listed in the remark column with notes clarifying whether these Directors and Supervisors are previously elected, newly elected, or re-elected, and the date of the election. The actual attendance (voting or non-voting status) rate to committee session (%) must be calculated on the basis of the number of sessions held by the board meeting in such period and the attendance (voting or non-voting status) in person in the sessions.

Note 3: Service ended after re-election for Director Chou, Chin-I on May 27, 2022.

Note 4: Corporate Director Representative Tsai, Hua-Cheng was newly elected on May 27, 2022.

Note 5: Service ended after re-election for Director Chan, Hui-Fen on May 27, 2022.

Note 6: Independent Directors Yu, Yung-Hung and Tang, Ying-Hua were newly elected on May 27, 2022.

3. The attendance (voting or non-voting) by the independent directors is as below:

| Name   | 10th Term,<br>16th Time | 10th Term,<br>17th Time | 10th Term,<br>1st Time  | 11th Term,<br>2nd Time  | 11th Term,<br>3rd Time  |

Note 2: Professional qualifications and experiences: Describe the professional qualifications and experiences of the individual members of the Remuneration Committee.

Note 3: Meeting the independence status: Describe the Remuneration Committee member's state of independence, including but not limited to whether the independent director, his/her spouse, and relatives within the second degree of kinship are acting as the director, supervisor or employee of the Company or its affiliated enterprise; The number of shares and percentage held by the independent director, his/her spouse, and relatives within second degree of kinship (or in the name of others); whether the independent director is acting as the director, supervisor or employee of a designated company that has specified relationship with the Company (refer to subparagraphs 5~8 , paragraphs 1, Article 6 of the Regulations Governing the Appointment and Exercise of Powers by the Remuneration Committee of a Company Whose Stock is Listed on the Taiwan Stock Exchange or the Taipei Exchange); the compensation amount from providing business, legal, finance, or accounting services to the Company or its affiliates in the most recent 2 years.

Note 4: There have been none of the circumstances below during the 2 years before the election and during the tenure period:

- (1) An employee of the Company or its affiliates.
- (2) A director or supervisor of the Company or its affiliates.
- (3) Holding more than 1% of the outstanding shares issued by the company or among the top 10 natural person shareholders by the person or his/her spouse or underage children, or in the name of a third party.
- (4) A spouse, relative within the second degree of kinship, or lineal relative within the third degree of kinship of a managerial officer under subparagraph (1) or any of the persons in subparagraph (2) and (3).
- (5) A director, supervisor, or employee of a corporate shareholder that directly holds 5% or more of the total number of issued shares of the Company, or that ranks among the top five in shareholdings, or that designates its representative to serve as a director of the Company under Article 27 of the Company Act.
- (6) A director, supervisor, or employee of another company in which a majority of the director seats or voting shares are controlled by the same person as in this Company.
- (7) The chairman, general manager, or person holding an equivalent position of the Company and a person in any of those positions at another company or institution are the same person or are spouses who is a director (or governor), supervisor, or employee of that other company or institution.
- (8) A director (or governor), supervisor, managerial officer, or shareholder holding five percent or more of the shares, of a specified company or institution that has a financial or business relationship with the company.

- (9) A professional individual, or an owner, partner, director (or governor), supervisor, or managerial officer of a sole proprietorship, partnership, company, or institution that provides auditing services to the company or any affiliate of the company, or that provides commercial, legal, financial, accounting, or related services to the company or any affiliate of the company for which the provider has received cumulative compensation exceeding NT\$500,000 in the most recent 2 years, or a spouse thereof. This does not apply to members of the Remuneration Committee of the Company.

Note 5: Service ended after re-election for Chan, Hui-Fen on May 27, 2022.

(B) Duties of the remuneration committee members

The members must have the loyalty and must exercise the due care of a good administrator in conducting the job responsibilities and submit the suggestions to the Board of Directors for discussion.

1. Review of Directors' and managerial officers' performance assessment and compensation policies, systems, standards, and structures on a regular basis.
2. Regular assessment of the remuneration for Directors and managerial officers.

The Remuneration Committee regularly reviews the remuneration policy and plan of the Company to ensure to attract, encourage and retain professional talents needed by the company.

(C) Implementation Status of the Remuneration Committee

1. The Remuneration Committee of the Company is composed of four persons.
2. Tenure for the 4th Committee: June 10, 2019 to May 28, 2022; tenure for the 5th Committee: June 8, 2022 to May 26, 2025.  
Meetings held four times by the Remuneration Committee in the most recent year (A) (1) before May 28, 2022: 1 times, (2) after May 28, 2022: 3 times.

Qualifications and attendance of the committee members:

| Title    | Name            | Actual (and non-voting) attendance (B) | Attendances by proxy | Actual (and non-voting) attendance rate (%) [B/A] | Remarks   |
|----------|-----------------|--|----------------------|---|---|
| Convener | Chan, Hui-Fen   | 1                                      | 0                    | 100%  | Previously elected, service ended on May 27, 2022 |
| Convener | Tsai, Kun-Liang | 4                                      | 0                    | 100%  | Continue in office, appointment on June 8, 2022   |

| Title            | Name           | Actual (and non-voting) attendance (B) | Attendances by proxy | Actual (and non-voting) attendance rate (%) [B/A] | Remarks   |
|------------------|----------------|--|----------------------|---|---|
| Committee member | Lu, Jui-Wen    | 4                                      | 0                    | 100%  | Continue in office, appointment on June 8, 2022 |
| Committee member | Yu, Yung-Hung  | 3                                      | 0                    | 100%  | Newly appointed, appointment on June 8, 2022    |
| Committee member | Tang, Ying-Hua | 3                                      | 0                    | 100%  | Newly appointed, appointment on June 8, 2022    |

Other matters that require reporting:

- I. When the Board of Directors rejects or modifies the recommendations made by the Remuneration Committee, please state the date and session of board meeting, the proposal, board resolutions, and settlement on the opinions of Remuneration Committee members (if the salary and compensation approved by board are superior to that recommended by the Remuneration Committee, please specify the differences and causes): None.
- II. When there are objections or qualified opinions for the records or with written statements of Remuneration Committee members to committee resolutions, state the date and session of the committee meeting, the proposal, and the settlement of the opinions for and against the resolution: None.
- III. Implementation Status of the Remuneration Committee:

(VIII) The composition, responsibilities and operations of the Sustainable Development Committee:

(A) Information of Sustainable Development Committee Members

The Company established the Sustainable Development Committee in October 2022. The committee comprises of 3 directors (including 2 independent directors). For the professional qualifications and experience of the committee chairpersons, Independent Directors, Yu, Yung-Hung, and Independent Directors, Lu, Jui-Wen, please refer to Page 28~40 of 4. Information Disclosure of the Director's Professional Qualifications and Independence of Independent Directors.

| Name of Sustainable Development Committee member | Is an independent director? |
|--|-----------------------------|
| Yu, Yung-Hung (Convener)                         | V                           |
| Lu, Jui-Wen                                      | V                           |
| Peng, Min-Hui                                    | X                           |

(B) Duties of sustainable development committee

The members must have the loyalty and must exercise the due care of a good administrator in conducting the job responsibilities and submit the suggestions to the Board of Directors for discussion.

1. Formulate policies for sustainable development.
2. Corporate sustainable development, including sustainable governance, ethical management, environmental and social goals, strategies and implementation of the plan.
3. Review, follow-up and revision of the implementation and effectiveness of the Company's sustainable development and report to the Board of Directors on a regular basis.
4. Pay attention to the concerns of stakeholders, including shareholders, customers, suppliers, employees, the government, non-profit organizations, communities and the issues concerned by the media, and implement supervision and communication plans.
5. Compile the Sustainability Report.

(C) The operations of the Sustainable Development Committee

1. The Company's Sustainable Development Committee comprises three members.
2. Tenure for the 3rd Committee: June 10, 2019 to May 28, 2022; tenure for the 4th Committee: October 28, 2022 to May 26, 2025.
3. Meetings held two times by the Sustainable Development Committee in the most recent year (A) (1) before October 28, 2022: 1 time, (2) after October 28, 2022: 1 time.
4. Attendance of the committee members:

(IX) The composition, responsibilities, and operations of the Risk Management Committee

(A) Information of Risk Management Committee Members

The Company established the Risk Management Committee in October 2022. The committee comprises of 3 directors (including 2 independent directors). For the professional qualifications and experience of the committee chairpersons, Independent Directors, Tang, Ying-Hua, and Independent Directors, Tsai, Kun-Liang, please refer to Page 28~40 of 4. Information Disclosure of the Director's Professional Qualifications and Independence of Independent Directors.

| Name of Risk Management Committee member | Is an independent director? |
|--|-----------------------------|
| Tang, Ying-Hua (Convener)                | V                           |
| Tsai, Kun-Liang                          | V                           |
| Peng, Min-Hui                            | X                           |

(B) Duties of risk management committee

The members must have the loyalty and must exercise the due care of a good administrator in conducting the job responsibilities and submit the suggestions to the Board of Directors for discussion.

1. Review of risk management policies and structures, risk appetite and tolerance.
2. Oversees the operations of the risk management mechanisms.
3. Review the management reports on major risk issues.
4. Report the status of risk management to the Board of Directors in a timely manner.

(C) The operations of the Risk Management Committee

1. The Company's Risk Management Committee comprises three members.
2. The term of office of the first committee: from October 28, 2022 to May 26, 2025.
3. The Risk Management Committee held one meeting in the most recent year (A). Attendance of the committee members:

| Title            | Name          | Actual (and non-voting) attendance (B) | Attendances by proxy | Actual (and non-voting) attendance rate (%) [B/A] | Remarks  |
|------------------|---------------|--|----------------------|---|--|
| Convener         | Yu, Yung-Hung | 1                                      | 0                    | 100%  | Newly appointed, appointment on October 28, 2022 |
| Committee member | Lu, Jui-Wen   | 1                                      | 0                    | 100%  | Newly appointed, appointment on October 28, 2022 |
| Committee member | Peng, Min-Hui | 1                                      | 0                    | 100%  | Newly appointed, appointment on October 28, 2022 |

Other matters that require reporting:

- I. If the Board of Directors does not adopt or amend the recommendations of the Risk Management Committee, please specify the date of the meeting, term of the Board, contents of the agenda, the resolution of the board of directors and the Company's handling of the opinions of the Risk Management Committee: none.
- II. When there are objections or qualified opinions for the records or with written statements of Risk Management Committee members to committee resolutions, state the date and session of the committee meeting, the proposal, and the settlement of the opinions for and against the resolution: None.
- III. The operations of the Risk Management Committee:

| Risk Management Committee       | Content of the Proposal and the Follow-up Process   | Resolution outcomes  | Treatment of the opinions of Risk Management Committee by the company |
|---------------------------------|---|--|---|
| 1st Term 1st Time<br>2022/10/28 | 1. Selection of the Convener and Chairperson of the 1st Sustainable Development Committee | Approved by all attending committee members for Committee member Tang, Ying-Hua to act as the convener and meeting chair for this term | Proposed to the Board and passed by all attending directors.          |

(VIII) Implementation status of promoting sustainable development and discrepancies with the Sustainable Development Best-Practice Principles for TWSE/TPEX Listed Companies and the reasons:

| Evaluation Item   | Implementation Status |    |   | The differences with the Corporate Governance Best-Practice Principles for TWSE/TPEX Listed Companies and reasons |
|---|-----------------------|----|---|---|
|   | Yes                   | No | Summary description   |   |
| I. Does the Company have a governance structure for sustainability development and a dedicated (or ad hoc) sustainable development unit with Board of Directors authorization for senior management, which is supervised by the Board of Directors? | V                     |    | <p>The Company has already appointed a sustainable development dedicated (and concurrent) unit. The unit conducts risk assessment on the environment, social or corporate governance topics relating to the company's operations based on materiality principle.</p> <p>The Company has established the Corporate Social Responsibility Management Committee in October 2014, and has changed its name to Sustainable Development Committee in April 8, 2022. On October 28 in the same year, the board has resolved that the Committee shall be formed by at least three members and more than half of the independent directors shall be involved in this Committee with an independent director acting as the convener and meeting chair. This can ensure the strategic decisions, promotion and implementation of the corporate sustainable development related work. The Company abides by the Sustainable Development Best-Practice Principles as approved by the Board. Each of the unit implements them in the daily operations based on their work duties under the organization charter (please refer to page 17 of the organization structure of the Sustainable Development Committee). Meetings are held twice a year in principle. Two meetings were held</p> | No significant differences.   |

| Evaluation Item | Implementation Status |    |  | The differences with the Corporate Governance Best-Practice Principles for TWSE/TPEX Listed Companies and reasons |
|-----------------|-----------------------|----|--|---|
|                 | Yes                   | No | Summary description  |   |
|                 |                       |    | <p>in April and October in 2022. The motion contents cover (1) The identification of sustainability topics that require attention; (2) the goals of sustainability topics and policy amendments; (3) legal compliance and execution; (4) supervision on the implementation of sustainable management; and the evaluation of the implementation. Separate meetings will be held where necessary in order to collect related topics. After evaluation and analysis by each unit on the topics, the important topics are included in the execution plan and daily operations.</p> <p>The Sustainable Development Dedicated (and concurrent) Unit will report to the Board on the implementation status once a year. The management must make proposals on the company strategies and action plan to the Board. The Board must make evaluations on the feasibility of these strategies and review their implementation progresses. Where necessary, the Board shall request the management team to make adjustments.</p> |   |

| Evaluation Item  | Implementation Status |    |   | The differences with the Corporate Governance Best-Practice Principles for TWSE/TPEX Listed Companies and reasons |
|--|-----------------------|----|---|---|
|  | Yes                   | No | Summary description   |   |
| II. Does the Company conduct risk assessments on environmental, social, and corporate governance issues that are relevant to its operations and stipulate risk management policies or strategies based on principles of materiality? | V                     |    | <p>The disclosed information covers the sustainable development performance of major locations between January to December 2022. The risk evaluation boundary is mainly based on the Company including all offices across Taiwan.</p> <p>The Company has already appointed the Risk Management Committee Dedicated (and concurrent) Unit. The Unit has already made a materiality principle analysis. This forms a basis for communications with internal and external stakeholders, for conducting a risk assessment on the environment, social or corporate governance topics related to the company operations, and for establishing effective identification, measurement and evaluation, supervision and control of the “Risk Management Policies and Procedures”, adopting specific action plans to lower the impacts of related risks.</p> | No significant differences.   |

|  |  |  |                 |                          |   |  |
|--|--|--|-----------------|--------------------------|---|--|
|  |  |  | Material topics | Risk evaluation items    | Risk management policy and strategy   |  |
|  |  |  | Environment     | Environmental protection | <p>The extreme weather and related conditions as a result from climate change have impacts to corporate profits and increase corporate risks. Natural resources are depleted due to the large amounts of human consumptions. Over-burning of coals and fossil fuels has led to air pollution. The use of complicated chemical substances is harmful to the human health. All of these events have a huge impact on our lives and work and they endanger the living rights of the next generations. In view of this, we are committed to the environmental responsibilities of corporate sustainable development, continuously promoting energy saving and carbon reduction measures and the use of renewable energy. Besides leading by example, we also invite our suppliers to join us. We constantly enhance energy management performance and increase the use of eco-friendly materials, lowering greenhouse gas emissions and stimulating resource recycling and reuse. We aim to provide customers</p> |  |

|  |  |  |  |  |   |  |
|--|--|--|--|--|---|--|
|  |  |  |  |  | <p>the products and services that are safe and of no concerns and also to exert our innovative capability with these commitments. These efforts help in energy saving and carbon reduction. We will also eagerly get hold of the risks and opportunities of climate change striving to become an environmentally friendly corporate.</p> <p>*Greening of our work environment<br/> Invite employees to the greening of our office work environment for setting up and taking care of pots of plants.</p> <p>*A sound environment and safe health management<br/> Stark operates based on a business model of system integration and consultation services. Its headquarters is situated in Hsinchu City on the outskirts of the Hsinchu Science Park in a regular office building. Its other offices and shipment center locations are located in regular office buildings or regular industrial use plants. We are in full compliance and implementation of the environment, health and safety (EHS) policies of Stark. This is for the purpose of achieving</p> |  |
|--|--|--|--|--|---|--|

|  |  |  |  |  |  |  |
|--|--|--|--|--|--|--|
|  |  |  |  |  | <p>our commitments and goals towards the environment, health and safety, including managing the potential risks to personnel and the environment, lowering their impacts on the company's operations and the impacts of products on the environment. We will carry out regular monitoring of the status of legal compliance and the state of execution of Stark standards. Ensuring the employees have a comfortable work environment and valuing health and safety maintenance and so on measures is one of our priorities.</p> <p>*Energy saving and carbon reduction measures</p> <p>1. The LED lighting used in the offices</p> <p>(1). The government's energy saving and carbon reduction measures rules and the switch to using LED lighting for all offices have shown an overall drop in energy consumption, and the heat source from lighting has also reduced. It has improved the efficiency of air-conditioning relatively.</p> <p>(2). Stark Technology has conducted a trial calculation of the LED lighting solution. Currently, the Company's</p> |  |
|--|--|--|--|--|--|--|

|  |  |  |  |  |   |  |
|--|--|--|--|--|---|--|
|  |  |  |  |  | <p>energy-saving lighting solution for 12 hours a day in the offices, requires 418 T8-18W*4 220V 96W rated power lamps in the office, compared to T-BAR lights. The electricity bill saved is based on the annual average electricity bill.</p> <p>(3) The offices have become brighter after the change and increases work efficiency. LED does not transmit heat and each year it can reduce 65,399 kg of carbon dioxide emissions lowering the indoor temperature. It can increase the air-conditioning efficiency of the cooler room, save on electricity bills and is more eco-friendly. (Carbon emission coefficient is 0.636 kg CO<sub>2</sub> /kWh).</p> <p>(4) Adjust the light circuit to reduce unnecessary lighting.</p> <p>2. Implement waste sorting<br/>The wooden pallets used for carrying the goods and the wastes of daily living are collected and processed by licensed environmental protection companies acknowledged by the Environmental Protection Bureau to reduce pollution and promote resource recycling and reuse. This can increase</p> |  |
|--|--|--|--|--|---|--|

|  |  |  |  |  |   |  |
|--|--|--|--|--|---|--|
|  |  |  |  |  | <p>the utilization efficiency of various resources and utilize renewable substances with low impact on the environment enabling the sustainable use of resources.</p> <p>3. Waste management and resource recycling</p> <p>(1). Paper recycling and destroying process: Resource recycling and waste sorting have been promoted on a regular basis. The handling of papers that are not confidential and with no personal information are reused, while the papers with confidential and personal information are collected on a regular basis for transporting to the professional document destruction company by the appointed transport company after the approval by the managerial officer. The transported papers will be destroyed and recycled onsite with photos taken as record. This process complies with both the personal data protection regulations and the resource recycling principles for environmental protection.</p> <p>(2). Handling of waste computers: Information will be deleted for media (such as hard drives) containing personal data and the physical item will</p> |  |
|--|--|--|--|--|---|--|

|  |  |  |  |  |  |  |
|--|--|--|--|--|--|--|
|  |  |  |  |  | <p>be destroyed and discarded. Computers without hard drives will be discarded and sent directly to the recycling plant. Paper application forms are replaced with electronic forms for the systems to reduce the generation of waste.</p> <p>4. Water resource management</p> <p>The business model of Stark is mainly on product sales and customer services. We do not have manufacturing factories and our operations take place in regular office buildings. There is no large volume usage of water resources. The daily office tap water is our main source of water for usage obtained from the city government supply which has no significant impact on the water resource.</p> <p>In terms of wastewater management, the office wastewater generated is mainly domestic sewage. We have released the wastewater to the public sewer and sent it to the local wastewater treatment plant for treatment according to the local regulations. It does not have significant impacts on the ecological environment.</p> <p>To treasure the water resource</p> |  |
|--|--|--|--|--|--|--|

|  |  |  |  |  |   |  |
|--|--|--|--|--|---|--|
|  |  |  |  |  | <p>usage, we continue to explore various water saving possibilities. For example: Replace the central cooling tower equipment, adjust the flushing toilet volume for savings in public areas, and use an automatic sensor water supply for urinals to save water.</p> <p>5. Air-conditioning equipment system</p> <p>Adjust the temperature of the main unit of the air-conditioner and set the temperature to at least 26 to 28 degrees Celsius. Introduce fresh cool air in winter to achieve energy saving effects. At the same time, it can reduce the energy exhaustion of the main unit reducing the energy consumption of the air-conditioning. The interior and exterior temperature is significantly lower during winter times. The below energy saving measures are implemented to avoid unnecessary wastage of electricity for air-conditioning:</p> <p>(1). Adjust to a suitable temperature for the main unit of the cooling water for air-conditioning to reduce the operation time of the compressor to achieve energy</p> |  |
|--|--|--|--|--|---|--|

|  |  |  |  |  |  |
|--|--|--|--|--|--|
|  |  |  |  | <p>saving effects.</p> <p>(2). Place eye-catching labels on the switch location and control instructions asking the employees to follow them to avoid forgetting to close the air-conditioning when getting off work.</p> <p>(3) Winter season (December to February) 12.00 pm each day, switch off the air-conditioning system for one hour. It is the lunch break hour during this time and employees are mostly out for lunch. The air-conditioning can be switched on when employees get back to work in the afternoon.</p> <p>(4) Winter season (December to February) switch off the air-conditioning one hour before end of the work day. This is because it is usually not stifling hot during the evenings of winter time. Employees with needs may turn on the air-conditioning again.</p> <p>6. Employee transportation and commuting<br/>To reduce the impact to the environment due to commuting by the employees, Stark has constructed an internal shared-ride regulating system to encourage</p> |  |

The MOPS: <http://mops.twse.com.tw>; company website: <http://www.sti.com.tw>.
- (XI) Other material information that would increase understanding of the corporate governance, could also be disclosed as well: None.

(XII) Execution of internal control system:

1. Statement of internal control system

**Stark Technology Inc.**  
**Statement of internal control system**

February 23, 2023

The Company's internal control system for 2022 as per the results of our self-assessment is hereby declared as follows:

- I. The Company is clearly aware that the establishment, implementation, and maintenance of an internal control system are the responsibility of the Company's Board of Directors and managerial officers, and the Company has established such a system. It aims to provide reasonable assurance for the achievement of the objectives, namely the effectiveness and efficiency of operations (including profitability, performance and asset security protection), the reliability, timeliness and transparency of financial reporting, and compliance with applicable laws and regulations.
- II. Some limitations are inherent in all internal control systems. No matter how perfect the design is, an effective internal control system can only provide a reasonable assurance regarding the achievement of the above three intended objectives; moreover, due to changes in the environment and circumstances, the effectiveness of the internal control system may change accordingly. However, the Company's internal control system is equipped with a self-monitoring mechanism. Once a defect is identified, the Company will take action to rectify it.
- III. The Company judges whether the design and implementation of the internal control system is effective based on the criteria for judging the effectiveness of the internal control system set out in the "Regulations Governing Establishment of Internal Control Systems by Public Companies" (hereinafter referred to as the "Regulations"). The said criteria under the "Regulations" are divided into five constituent elements as per the management and control process: 1. control environment, 2. risk assessment, 3. control activities, 4. information and communication, and 5. monitoring activities. Each constituent element includes several items. For said items, please refer to the "Regulations".
- IV. The Company has adopted the aforesaid judgment criteria for the internal control system to determine whether the design and implementation of the internal control system are effective.
- V. Based on the results of the assessment in the preceding paragraph, the Company is of the opinion that, as of December 31, 2022, the internal control system (including the supervision and management of its subsidiaries), including the understanding the effectiveness of operations and the extent to which efficiency targets are achieved, reliable, timely, and transparent reporting, and compliance with applicable rules, laws and regulations, is effective and can reasonably assure the achievement of the foregoing objectives.

- VI. This statement will form the main content of the Company's Annual Report and prospectus and will be made public. If the disclosed content above is false or there is material information concealed deliberately or otherwise, the Company will be legally liable pursuant to Articles 20, 32, 171, and 174 of the Securities and Exchange Act.
- VII. This statement has been approved by the Company's Board of Directors on February 23, 2023. Among the eleven directors present, none of them expressed objections. All the others agreed with the content of this statement. Therefore, this statement is hereby declared.

|                                     |  | -  | -           | -                       |
|                                     | Accumulated unappropriated<br>dividends                                  |  | -           | -                       |
| Analysis on return on<br>investment | Price-earnings ratio (Note 1)  |  | 11.62       | 12.28                   |
|                                     | Price-dividend ratio (Note 2)  |  | 12.41       | 13.56                   |
|                                     | Cash dividend yield (Note 3)   |  | 8.06        | 7.38                    |

Note 1: Price / Earnings Ratio = Average Market Price / Earnings Per Share

Note 2: Price / Dividend Ratio = Average Market Price / Cash Dividends Per Share

Note 3: Cash Dividends Yield = Cash Dividends Per Share / Average Market Price

## (VI) Dividend Policy and Implementation Status

### 1.Dividend Policy

The annual surpluses concluded by the Company are first subject to taxation and reimbursement of previous losses, followed by a 10% provision for legal reserve (unless legal reserves have accumulated to an amount equal to share capital). Any surpluses remaining shall then be subject to provision or reversal of special reserve, as the laws may require. The residual balance can then be added to unappropriated earnings carried from previous years and retained or distributed to shareholders as a form of profit sharing, subject to resolution in a shareholder meeting.

The Group operates in the high-tech industry and is susceptible to the industry's enterprise life cycle. Dividends shall be allocated after taking into consideration several factors including: current and future investment environment, capital requirement, domestic/foreign competition, capital budget, shareholders' expectations, balanced dividends, and the Group's long-term financial plan. Dividend distribution plans are to be proposed by the Board of Directors and presented for final resolution in shareholder meeting on a yearly basis.

With reference to historical data, the proposed amount of shareholder dividends to be distributed shall be at least 50% of the distributable earnings of the current year's net income after tax (less the legal reserves, or special reserves appropriated or reversed as required by laws). Shareholders' profit sharing can be paid in cash or shares; however, the cash portion shall be no less than 10% of total dividends.

2.Dividend distribution in 2022:

Stark Technology Inc.  
Earnings Distribution Table  
2022

Unit: In New Taiwan Dollars

| Item   | Amount        |
|--|---------------|
| 2022 Net income after tax                                      | 735,170,853   |
| Add: Remeasured value of defined benefit plan (for 2022)       | 3,676,942     |
| Subtotal   | 738,847,795   |
| Less: Legal reserve  | (73,884,780)  |
| Add: Unappropriated retained earnings at beginning of the term | 211,551,872   |
| Earnings available for distribution for the current year       | 876,514,887   |
| Item for distribution:   |               |
| Shareholder bonus - Cash dividends<br>(NT\$5.62 per share)     | (665,815,421) |
| Ending undistributed earnings                                  | 210,699,466   |

Note: Approved by the resolution of the Company's Board of Directors on February 23, 2023.

(VII) Effect of the stock grants on the Company's business performance and earnings per share:  
Not applicable.

Dividends were distributed in cash this time.

(VIII) Remuneration to employees and directors:

1. Employees' and directors' remuneration percentage or range specified in the Articles of Incorporation:

The Company's profits concluded from a financial year are subject to employee remuneration of no less than 3% and director remuneration of no more than 5%. The recipients of the employee remuneration distribution must include the employees of subsidiaries who meet certain criteria. The Board is authorized to formulate the certain criteria. Director remuneration is to be distributed in the form of cash. However, where the Company still has accumulated losses, amount shall be reserved for making up the accumulated loss first.

2. The basis for estimating the cash rewards for employees and directors of the current period, as well as the basis for calculating rewards for employees in stock and the accounting procedure in cases when the actual allocated amounts are at variance with the estimated amounts:
  - (1) The basis for estimating the employees' and directors' remuneration for the current year: the Company has estimated the remuneration of employees and directors in 2022 according to the profit status of the current year and within the range of the multiplier specified in the Articles of Incorporation, and account it as salary expense.

- (2) The basis for the calculation of the number of shares distributed as the employees' remuneration : The Company does not distribute the employees' remuneration in shares.
  - (3) The accounting treatment if the actual distributed amount differs from the estimated amount: The Company's board of directors resolved on February 23, 2023 to distribute the employees' remuneration and the directors' remuneration in cash for NT\$67,000,000 and NT\$3,300,000, respectively. There is no difference to the estimated amount.
3. Approval of the distribution of remuneration by the Board for 2022:
- (1) Amount of remuneration distributed in cash to employees, directors and supervisors: The remuneration in cash distribution for employees is NT\$67,000,000, and the remuneration for directors is NT\$3,300,000. Any difference from the estimated amount of the expense recognized for the year, disclose the difference, its cause(s) and solutions: No differences.
  - (2) The proportion of amount equivalent to the stock distributed as rewards for employees in the earnings after tax in the parent company only financial report of the period and the total amount of compensation for employees: It is not applicable, there have been no stock distribution proposal for this board meeting.
  - (3) Considerations given for earnings per share after employees' and directors' remuneration distribution: It is not applicable as the employee and director remunerations have been included in the expenses.
4. Actual distribution of employees' and directors' remuneration in the previous year:

Unit: In New Taiwan Dollars

| Item                    | For the year ended<br>December 31, 2021  | Discrepancies | Explanation of<br>the reasons for<br>the differences |
|-------------------------|--|---------------|--|
|                         | Approved by the<br>resolution of the<br>board of directors on<br>February 25, 2022 |               |  |
| Directors' remuneration | \$0  | -             | -  |
| Employee remuneration   | \$37,100,000   | -             | -  |

If there is a difference between the above amount and the recognized employees' and directors' remuneration, please describe the difference, the cause, and the treatment thereof:  
No difference.

(IX) Status of stock buyback: Not applicable.

II. Issuance of corporate bonds: None.

III. Issuance of preferred shares: None.

IV. Issuance of global depositary receipts (GDR): None.

V. Issuance of Employee Stock Options and Restricted Stock Awards (RSA): None.

- VI. Issuance of new shares in connection with merger and acquisition of shares of other companies:  
None.
- VII. Capital utilization plans and implementation
- (I) Contents of the plan  
As of the quarter before the date of annual report publication, issuance of securities beforehand, or private placement securities that have not yet been completed or have been achieved within the most recent 3 years, of which the benefits of the plan have not shown yet: Not applicable.
  - (II) State of execution:
    - 1. State of execution: Not applicable.
    - 2. Evaluation of the actual benefits: Not applicable.

## Five. Operation Overview

### I. Business Activities

#### (I) Business Scope

##### 1. Main Contents

- A. Planning, integration, and sales of computer systems (e.g. servers, network servers, work stations, PCs, notebook computers, and Thin Clients).
- B. Sale of computer peripheral systems (e.g. printing devices, and display devices).
- C. Planning, integration, and sales of network products (routers, switches, hubs, network interface cards, network management software, bandwidth management software and hardware, etc.).
- D. Planning, integration and sales of data storage system (magnetic disk array, tape drives, tape cabinets, data backup management software, storage area network related software and hardware, and remote backup software and hardware).
- E. Development and sales of computer software (e.g. operating system software, office automation software package, database management software, product life cycle management system, manufacturing execution system, enterprise resource planning system, machine maintenance system, enterprise resource management system, service-oriented architecture system, data, data center monitoring and management software cloud computing system, system and network security software, network management software, data backup management software, storage area network management software, publishing and electronic document editing software and e-commerce software, mobile software store website, telecommunication industry data processing software, network equipment monitoring and alerting, enterprise business opportunities trading platform, content management software, search engine software, and single account management).
- F. Development of applied software for industries (e.g. manufacturing, telecommunication, government agencies, and financial services).
- G. The planning, integration, sales and consultation services for information security products (e.g. firewall, hacker intrusion prevention, vulnerability scanner, authentication and encryption system, document security system, information security endpoint control, online behavior control system, application control firewall (new generation firewall), mail security and life cycle management security systems, enterprise security policy defense systems, and wireless network security products).
- H. Maintenance service and consultation.
- I. Sale of consumables.
- J. Communications engineering business.
- K. Development of other special application programs to support the sale of computer systems, computer peripheral systems, network products, and computer software.
- L. Managed Detection and Response (MDR), and managed security service provider (MSSP).

2. Weight of business (consolidated for FY 2022)

| Business Activities                | Operating ratio % |
|------------------------------------|-------------------|
| Workstations and server host       | 12.23             |
| Personal computer                  | 1.04              |
| Computer peripheral products       | 5.26              |
| Network products                   | 20.28             |
| Computer software                  | 15.16             |
| Consulting and maintenance service | 32.03             |
| Others                             | 0.12              |
| Storage device                     | 13.88             |
| Engineering                        | 0                 |
| Total                              | 100.00            |

3. The Company's current products and services

- A. Server host: Database server host (IBM, HPE), file servers (IBM, HPE), network servers (IBM, HPE), and AI servers (NVIDIA).
- B. Data storage equipment: Disk array (IBM, HDS, NetApp, HPE, Nimble, and DataCore), storage area network-related interface cards (Broadcom), hubs, switches, routers (Extreme, HPE Aruba), and management software (Veritas).
- C. Personal computers and network servers: There are desktop, notebook, and industrial models.
- D. Computer peripheral equipment: Various inkjet printers, laser printers, and high-speed laser printers.
- E. Network products: Routers, switches, network management software, network printing devices.
- F. Computer software: Operating system software (Solaris, Linux, Windows), office automation software packages, cross-platform integration (VMware), product life cycle management system (PLM), manufacturing execution system (MES), enterprise resource planning system (ERP), Planned Maintenance System (PMS), Enterprise Resource Management (ERP), Anti-money Laundering (AML), Service-Oriented Architecture (SOA), Cloud Computing, system and network security software, data backup management software (Veritas), storage area network management software, publishing and electronic document editing software and e-commerce software, telecommunication user portals (App Store), telecommunication Call Detail Record (CDR), Network Management Station (NMS), Business Trade, Content management software (CMS), Search engine software, Single sign-on (SSO).
- G. Planning, integration, sales and consulting services for information security products (firewalls, hacker intrusion prevention, authentication and encryption systems, document security systems, wireless/authentication systems, corporate security policy defense systems, spam, and wireless network security products).
- H. Maintenance services: Free maintenance services, paid maintenance services, and contract maintenance services within the guarantee period.
- I. Education and training: Free and paid education and training are provided to customers.
- J. Consumables: Floppy discs, magnetic tapes, ink cartridges, toner cartridges, automatic document feeders.
- K. Engineering: Optical fiber network engineering and building telecommunication equipment room engineering.
- L. Managed Detection and Response (MDR), and managed security service provider (MSSP).

4. New products and services in development or under development
  - A. Blood management information platform@Docker/Microservice.
  - B. Anti-money laundering system for trade financing (B2B).
  - C. IoT (Internet of Things) security detection system.
  - D. A highly flexible AIoT security interactive technology and field application verification platform.
  - E. R&D for the digital transformation of automated High Performance Computing (HPC) for intelligence platform.
  - F. R&D in Artificial intelligence for IT operations (AIOps).
  - G. Cloud-based system for anti-fraud name checking.

## (II) Overview of the industry

### 1. Status and future development of the industry

The current status and development of the IT industry have several key points:

- Major manufacturers have already entered the market and become cloud service providers.
- Domestic telecommunications companies have invested heavily in corporate customer service.
- The operation of various cloud services (IaaS / PaaS / SaaS) has grown year by year, and the public cloud has been implemented.
- The “Hyper-converged , software-defined “ data center solution will soon become the mainstream solution in the market.
- Major manufacturers have invested in and supported the standardization of open source code.
- The financial service industry actively adopts Fintech, Regtech, blockchain, anti-money laundering, and Securities Continuous Trading technologies.
- Major software and hardware manufacturers continued to merge.
- Mobile devices (smart phones , tablet PC) have become the mainstream human-machine interfaces, and the demand for desktop services suitable for mobile devices is increasing.
- Information security threats are increasing day by day. APT attacks, file encryption, and DDoS extortion attacks have caused huge losses in many countries around the world. Endpoint protection (XDR) has become the new mainstream for information security protection.
- With the booming development of IoT (Internet of Things), various innovative applications have been proposed one after another, and information security manufacturers have released IoT information security protection systems one after another.
- Big Data analysis has become one of the mainstream options for enterprises to upgrade their competitiveness and explore new business opportunities.
- Continual expansion of transmission bandwidth in the telecommunication industry; Enhancement of service quality through customer experience management; Replacing traditional local calls with IP phones; competing with cable TV providers for higher speeds; accelerating G-PON deployment. 5G operation commenced. More edge computing nodes are deployed in the RAN equipment room to provide applications such as AIoT, AR, and VR.

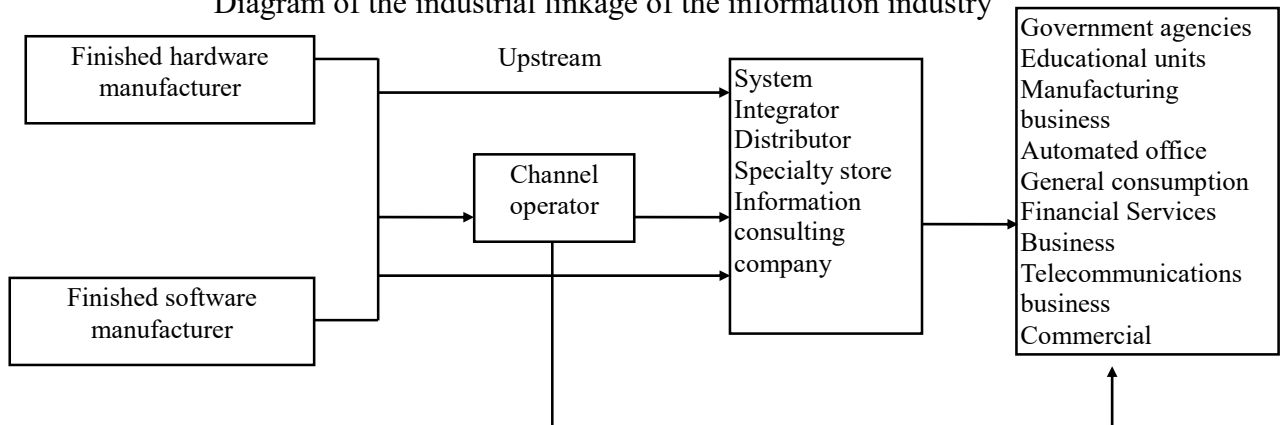

- Covid-19 has accelerated enterprises' digital transformation, such as hybrid office, business automation, and global management. The emerging cloud native model, the development of IoT, artificial intelligence (AI), mobile devices, and wireless 6G operations have all brought new network requirements to the IT network architecture. At the same time, the demand for huge networking equipment, derived from the complexity of network operation, information security, and management, has also become another demand of enterprises. The current network development trend is to use artificial intelligence (AI) and machine learning to automate the management of complexity as much as possible to protect operations, achieve rapid operation, flexible deployment, and improve the decision-making ability of corporate network management.
- Industry 4.0 has been introduced by advanced industries, and the manufacturing industry has actively embarked on the preliminary operation of factory automation.
- All walks of life have begun to use AI deep learning and machine learning to create innovative industrial applications.

In the next few years, both system integrators and enterprise users will focus on the following nine major areas:

- (1) Cloud service
- (2) Green environmental protection information equipment
- (3) Next Generation Data Center Migration
- (4) Performing Storage Consolidation
- (5) Hyper-converged system
- (6) Mobile application (SMAC-I) and edge computing
- (7) Internet of Things - IoT (Internet of Things) infrastructure and service development
- (8) Big data, artificial intelligence (machine learning, deep learning)
- (9) Information Security

## 2. The relationship between upstream, midstream and downstream of the industry

Diagram of the industrial linkage of the information industry

The Company's main products include servers, work stations, mainframes, peripheral products, network communication equipment, information security products, and professional information software. In terms of its industry characteristics, with its professional technical capabilities combined with a complete set of marketing channels, it has obtained the agent and marketing rights of upstream products, and integrates downstream customers' product needs for purchases from upstream manufacturers to gain a greater price advantage. We sell our products to downstream customers through flexible inventories management and marketing strategies. This industry refers to the professional channel operators in the overall information industry. The upstream are mainly well-known finished hardware/software manufacturers, and the downstream are system integrators, distributors, specialty stores, and information consulting companies engaged in the sale of information related products. In summary, currently, the upstream vendors of the information industry are mainly focused on the R&D and manufacturing of professional IT-related products, the mid-stream vendors aim to promote the market and establish marketing channels as their primary business purpose, and the downstream vendors provide end user delivery and maintenance services, technical support and other services, through which the professional division of labor among the upper, middle and lower can jointly create abundant profits. The Company currently focuses on the role of the downstream system integration distributor.

3. Product development trends and competitions

The Company's business scope covers the following main items: Server hosts and work stations, storage devices, personal computers, computer peripheral products, network products, information security products, computer software, consulting professional services, and maintenance services and projects. The Company is a major high-tech information services provider in total solutions. The description of the development trend and competition for the top six main business activities of the Company is as follows:

(1) Mainframe server

In addition to providing ongoing services for the equipment purchased by our users, we also sell mainframe servers from IBM, HPE and NVIDIA.

These products include AMD CPU, Intel CPU, and IBM Power CPU (all of which can support the GPU of various brands for AI deep learning operations).

When an enterprise is planning an integration solution, it is important to improve performance and reduce costs. However, if an enterprise recklessly pursues low-cost, and as a result it is impossible for the target environment after integration to meet the requirements of the enterprise, no amount of cost saving will come of it. Therefore, enterprises must fully realize the fact that there are inevitable risks involved in server integration, but server integration can indeed reduce management costs and increase equipment utilization.

After the integration of the enterprise information framework, the benefits are not only easier management and higher utilization of resources, but also the efficiency of the overall IT operation will be better and less prone to errors. Integration does not mean giving up old systems, but eliminating superfluous ones based on the needs of the enterprise, leaving the most stable and important systems and allowing these systems to execute on the new platform at a better speed.

(2) Storage device

The maturity of cloud storage service has crowded the traditional enterprise storage market and will even become the main storage method for enterprises. Only flash storage, which wins the competition with speed, bucked the trend and grew to become the protagonist to satisfy the demand for external storage of enterprises. No matter how the economy develops, The amount of data held by enterprises will continue to increase over time. Paradoxically, the percentage of traditional enterprise external storage products (SAN, NAS, and DAS) in enterprise storage sales has been declining over the recent 3 to 4 years. The reason for this phenomenon is that the emerging storage architectures such as Server SAN, Hyper-converged, and public cloud have crowded the market of original traditional storage products. Among these emerging architectures, the public cloud storage service is the most threatening to traditional storage products. The advent and maturity of public cloud storage can be said to be the new architecture that has the greatest impact on enterprise storage applications in most recent years. Public cloud storage service providers such as AWS and Microsoft have also become the biggest competitors to traditional enterprise storage equipment suppliers. In terms of traditional enterprise storage, the market share of flash storage arrays continues to grow, which shows that corporate customers are placing great emphasis on flash storage applications. These market changes can be roughly divided into several factors, except that the upgrades in the capacity and reliability of NAND Flash memory chips are better than ever. In addition, storage manufacturers have optimized the data deduplication and compression technologies so that corporate customers can purchase high-performance flash storage arrays at more affordable prices and accelerate the ranks of production applications. Therefore, storage applications can get rid of the performance bottleneck of traditional hard drives and bring almost limitless growth in performance and capacity density for enterprise storage. As far as enterprise storage is concerned, compared to the declining traditional high-end storage arrays or the entry-level storage devices with low technology threshold and low profit, the all-flash storage arrays based on flash memory have become the only external storage devices for enterprises. It is one of the fields where the development is most booming and the competition is the most fierce. In the most recent 2 years, when new or upgraded storage products are introduced, all storage manufacturers would have introduced the all-flash configuration at the same time. The all-flash structure has become the only way out for the future of storage products.

(3) Network products

The rise of new IT technologies has driven the evolution of the Internet. New technologies and models, such as: Micro-server application model, mobile devices, cloud computing, immersive experience and the Internet of Things, which will drive the major evolution of the network. We can see that the new generation of network has transformed from Software-Defined Networking (SDN) and Network Functions Virtualization (NFV) to Intent based Networking (IBN). IBN has improved the automation capability of SDN, enabling it to convert intentions into rules, collect data, and provide visibility analysis. Combine network monitoring with AI and machine learning to correct problems, provide intelligent feedback of network environment data, and ensure that the principle is executed exactly as intended. The purpose of IBN is to continuously apply and protect the service performance requirements, security and compliance principles, and IT operation procedures in the entire network. The Application Programming Interface (API) on the open platform controller allows the controller to integrate and exchange intelligence with adjacent networks, IT

services, other IT domains, business applications, and heterogeneous infrastructure.

It is expected that the IBN network architecture is affecting the entire network applications. With the rise of new IT technologies, enterprises will need to evaluate whether their networks are ready to provide network services at the speeds required for corporate activities. The network team needs to implement the principles of dynamic segmentation and service optimization automatically executed from the client to the application and between distributed workloads on a large scale and across network domains (access, WAN, data center, multi-cloud, IoT). Therefore, the complexity of the network architecture has increased the demand for network automation, and AIOps (Artificial Intelligence for IT Operations) can improve the efficiency of NetOps (Network Operations).

IBN, NFV, Cloud, and SDN are also changing the operation and scope of the modern data center. We see that today's data center is no longer a single location. The emerging "distributed data center" is the result of the coexistence of applications and data in a hybrid, multi-cloud, and edge environment. However, the operation method of a distributed data center is different from that of a traditional data center. IT organizations need to adapt and change their technologies and operations in order to meet the demands for increased application programs and network connections with this new architecture. Work loads are not static, but constantly move between multiple clouds and physical data centers. Therefore, DevOps teams must use continuous integration and continuous deployment (CICD) to quickly launch new applications and services to keep up with the rapid pace of business. New technologies such as microservices, containers, and APIs are completely changing the design of applications.

With the development of new network models and applications, the traffic and data of the data center network grow rapidly, and information security risks are increased and taken seriously. Therefore, the Secure Access Service Edge (SASE) network architecture model also appears. SASE can combine VPN and WAN functions with cloud-native security functions, such as secure network gateway, cloud access security agent, firewall, and zero trust network access. These functions are provided through the cloud as the service of the SASE vendor. SASE is the vision of the future secure network model that enterprises should strive to achieve, but cannot be realized by any vendor at present.

#### (4) Information Security Products

In recent years, Internet of Things (IoT) devices have been widely used. While connecting Internet of Things (IoT) devices to the corporate network brings obvious benefits, it can also expose you to new network threats. From IP cameras and smart elevators to medical devices and industrial controllers, IoT devices are inherently vulnerable and can be easily hacked. Many of these devices run on unpatched systems that are misconfigured or use insecure communication protocols, which can cause security concerns. Due to the limited visibility and control over existing IoT devices and related risks, it is necessary to strengthen the threat defense solution for IoT applications in the next generation firewalls. DDoS attacks using APIs have been reported since the beginning of 2018. This method is different from reflective and amplified attacks in that it is mainly executed through remote control. In this way, hackers can extract the payload of the packets from connection behaviors to obtain the API key. API plays the role of Request/Response, but almost no rigorous security measures have been implemented in this area. Therefore, they can be easily tampered with to execute commands with a false identity, and then initiate high-frequency connection access requests to produce the effect like a DDoS

server or intrusions into the host computer. API Security has become an integral part of the security world.

The Internet, mass data, cloud computing, Internet of Things and other technologies have brought convenience to personal life and provide technical support for the development of enterprises. However, many major incidents have taken place on the global Internet in the past. Personal information leakage seems to have become a common occurrence, APT attacks emerged one after another, and DDoS hackers' frequency and techniques continued to increase and become more complex. There was even an attack with the largest traffic volume in history. Based on the industry survey and research, the main development trends of the information security industry have been forecasted:

**Trend 1: Consumers are the Targets of Hackers**

The targets of hackers are no longer limited to enterprises and governments. For example, there have been many recent incidents of encryption for blackmail or online bank account theft. Hackers have directly endangered consumers, and this phenomenon will also spread to the Internet of Things. More sophisticated new technologies will affect consumer and home technology. Personal devices such as Bluetooth and wireless network communication have become the portals for entering personal home systems and communications. For example, if the Global Positioning System (GPS) is hacked, it may lead to a tragic event. In addition, an IoT that lacks defenses, such as a "Smart Home," it will leak personal information and information of current residents to hackers.

**Trend 2: Integrate multi-layer security architectures**

The defense effect of a single-layer security architecture or point solutions provided by multiple suppliers is poor and is an outdated security principle. We will see that more and more suppliers are acquiring all the necessary security elements to be integrated through development, cooperation, and acquisition to provide integrated, multi-layer solutions.

**Trend 3: Continuous Big Data**

Suppliers and businesses alike are searching for the magic formula for big data. Vendors are trying to design and build a "turnkey" big data "solution" that can be repeated and adds value to the user base. Enterprises are looking for "turnkey" solutions that can be implemented to create a stronger defense, smoother data environment, and stronger security awareness within the enterprise.

**Trend 4: Silent attacks**

It is expected that there will be more continuous and more sophisticated attacks to steal users' IP addresses and money without leaving any clues. This phenomenon will only continue to increase. Therefore, it is very important to make security an integral part of the overall IT infrastructure, and implement layered security protection to defend against threats and attack opportunities at the first instance.

**Trend 5: Attacks on the supply chain**

The supply chain attack is the second aspect that enterprises should pay attention to, which will become a new gap in enterprise defense. This will give opportunities for opportunistic attackers, and such risks have become more obvious in the medical field. Medical equipment that is connected to third-party suppliers, such as MRI and X-ray machines, are connected to the intranet every day, which increases the attack surface and increases the vulnerabilities, which are beyond the control of the hospital.

For the supply chain attack, the target of this kind of attack is not the enterprise itself, but the upstream and downstream suppliers of the enterprise to

harm the enterprise next. There have been many cases in 2018. We will continue to see occurrences of such cyber attacks in the future.

As Taiwan's manufacturing industries play important roles in global supply chains, such issues are particularly relevant to Taiwan. For example, enterprises use ERP to manage supply chain, and now many upstream and downstream systems are integrated, and third-party partners also need to be included in the management.

In view of this, we should adopt a brand-new information security policy management mindset (for application, information security threats, and virus protection), and take the initiative to master and control the use of various applications, and regulate and protect online behaviors in order to achieve management over misconducts, encrypted connection (HTTPS) management, improve the flexibility of information security policies and management efficiency, control of application usage, and complete reporting in compliance with laws.

Therefore, in order to effectively deal with the hybrid attacks and application layer attacks, and at the same time take into account the factors of management and cost, the demand for "integration" has arisen. The so-called integration, on the one hand, is to integrate the functions of various types of protective equipment into one furnace, on the other hand, to integrate management interfaces for centralized control, and most importantly, it is to integrate both new and old software and hardware to form a multi-layered active defense network. In order to reflect the above voices and needs, whether it is information security software or hardware equipped, the products are gradually developed in the direction of integration and multi-function. For SMEs, the equipment-type product that integrates firewall, intrusion detection, bandwidth management, content filtering, and anti-virus functions not only saves a great deal of procurement and construction costs, but also saves time in deployment and management. It can also save a lot of expenses. It can be said to be a once and for all approach.

A mobile work environment enables employees to access all of their application programs, data, and personalized desktops - providing the best performance and meeting everyone's security, performance, personalization, and mobility requirements.

Provide all employees with access to the self-service application

The mobile work environment is a flexible solution that simplifies the deployment and life cycle management of applications and desktops to reduce IT costs. Through centralized management and delivery of standard images based on demands, IT departments can increase the success rate of updates for application programs and desktop images, and provide role-based management, configuration settings, security protection, and support for corporate devices and employees' personal devices.

On the other hand, the rise of information security outsourcing services is certainly due to the result of market demand. The emerging information security attack incidents, combined with the diversified mixed attacks and various intrusion methods, they often cause great losses to individuals and companies. In this case, an enterprise must establish a group of talents with relevant professional skills and knowledge, and conduct regular training to familiarize them with new equipment, new functions or new threats. More importantly, enterprises must be able to assume the risk of window period and training go in vain due to the turnover of relevant personnel, and have the ability to substitute personnel and relevant training at any time. Large enterprises with abundant human and financial resources, can certainly maintain and bear the load but for

small and medium-sized enterprises, it is an unbearable burden. The best solution to effectively save manpower, training, management, maintenance and related equipment costs is to entrust the information security protection to an information security vendor with a professional team and technical know-how.

In addition, from the perspective of the R&D trend of the major information security manufacturers, the new generation of information security defense technology will use big data analysis, User Behavior Analytics, Deception, and Isolation technologies to develop products with machine learning and cognitive capabilities. In view of the increasingly rampant hackers, which also depend on AI intelligent analysis in the information security cloud, Endpoint Detection and Response (EDR) seems to have become the prominent technology of information security defense in recent years. The main purpose of Endpoint Detection and Response (EDR) is to detect abnormal activities on the endpoint system, in order to detect hackers as soon as possible and reduce information security risks that may be caused in the future. In addition, on 2021/8/23, the government promulgated and amended the “Information Security Responsibility Hierarchy Regulations” to mandate that Class-A and Class-B public authorities must implement an endpoint detection and response mechanism within 2 years. In the traditional information security protection system, policies and rules are defined in advance, and all action plans are fixed in the rules. In practice, however, it is difficult for them to adopt fixed policies in response to the ever-changing needs of their business. The EDR rule allows for detection and decision-making before action and measures are taken into consideration with flexibility in work and protection against data leakage. EDR collects monitoring data from all aspects, and the endpoint detection and response system can identify and analyze potential attacks in advance. In this way, attacks can be interrupted at the initial stage before serious losses or intrusions occur. This will prevent losses. Real-time response also allows organizations to identify suspicious behaviors or unauthorized behaviors on the network, so as to find out the root cause of the threat before the threat affects the operation. The correlation analysis of the data from endpoint, network and SIEM can even achieve prevention, stopping, and isolation, to minimize the damage to the local machine, and to prevent the expansion of the disaster at the same time.

The interest in zero trust network access is proliferating recently, in part because of its attractive name and its widespread use in the entire network security industry. The other reason is that we really need it.

Due to the rapid growth in number and complexity of network attacks, the scope of attacks also expands rapidly. However, if enterprises still adopt the “one-size-fits-all” approach to deploy security tools against various types of applications or threats, security management and implementation will become very complicated.

From the perspective of security and performance, those too are outdated and cumbersome VPN solutions that are no longer up to the demand. These old solutions do not have the concept of context; therefore, they do not understand how to apply the least privilege access based on the application program, user or device. Instead, they grant trusted access to the entire network segments. In the world of hybrid work and cloud migration, the old VPNs are no longer effective.

It is against this background that the Zero Trust (ZTNA) method was born to address the challenges posed by the old VPNs. However, VPNs have proven to be more dangerous than helpful, due to several key limitations:

Too many restrictions on access rights are not a zero trust approach. It only

supports rough access control, and categorizes applications according to the L3/L4 network architecture (such as IP address and port number). Therefore, VPNs tend to offer excessive access rights simply because of the low-cost, especially for applications that use random connection ports or IP addresses. Once the access right to the application is granted, the communication between them will be trusted forever. VPNs assume that users and applications will act in a trustworthy manner at all times, and this is how disasters can result.

The security is too low to support only a small number of private applications, and it cannot properly protect microservices-based cloud-native applications, such as voice and video conferencing applications so forth applications that use dynamic ports or the service counters, repair systems and so on application programs that are started up by the system server. In addition, the VPN approach completely overlooks SaaS applications and offers little or no visibility or control over data.

Under such circumstances, the following methods have been introduced to resolve the ineffective access restrictions.

- Least Privileged Access: The application must be able to identify Layer 7 and execute precise access control at the application and sub-application level without being affected by the network architecture such as IP address and port number.
- Continuous trust verification: Once an application has been granted the access right, the system will continue to perform trust evaluation based on the changes in device status, user behavior, and application behavior.
- Continuous security inspection: In-depth and continuous inspection of all traffic, the same to authorized connections for avoiding all risks, including the zero-day threat.
- Protect all data: Use a single policy to provide continuous data control for all of the APPs (including private
- APPs and SaaS) used by the enterprises.

Ensure the security of all applications, and protect all applications used in the enterprise, including modern cloud-native applications, legacy private applications, and SaaS applications. These include the application program using the dynamic port and the application program using the server initiated connection.

As of today, work no longer refers to where we go to the office, but rather the activities we perform. During the peak of the pandemic over the past two years, many enterprises focused on expanding the VPN infrastructure. However, this approach no longer works. Therefore, ZTNA solution, Chiang Hui, is a necessary solution to overcome the existing restrictions of VPN. In addition, it is also an appropriate framework to provide long-term support for the enterprise.

#### (5) Computer software

Compared with the hardware industry, the visibility of Taiwan's software industry has always been low, and the scale of software companies is generally small, and it is relatively weak in terms of the acquisition of resources or talents; subject to many unfavorable factors, resulting in the development of the software industry facing a bottleneck. However, as the IT hardware industry gradually enters a situation of meager profits, how to increase the added value of hardware products through the development of software and applications has become the focus of many.

Taiwan has an excellent hardware industry foundation. If the software and hardware industries can cooperate with each other to promote the development of software, the competitiveness of hardware manufacturers can be further

improved and the output value increased. As applications become mobile and cloud-based, development technologies are containerized, and combined with a distributed cloud-based system architecture, the user experience and application delivery will become infinitely flexible, and both development prospects cannot be underestimated.

Taiwan's hardware suppliers have already invested in internationalization and globalization, and the scale is relatively growing. This niche does not narrow the software industry, on the contrary, it provides small software suppliers with a great survival niche. In addition, because Taiwan is relatively early in the process of informatization, the economy and commerce are relatively developed, and the system integration capabilities of the engineers are relatively outstanding, and they have higher creativity. These are the advantages for Taiwan's software industry to internationalize.

Taiwan's software industry not only has good "integration" ability, but also "quality" in it. If application software, tool software, infrastructure software, and even information services are included, the value chain of the software industry is actually very long. Only by fulfilling roles and nurturing capabilities at every step in the value chain can a lasting service be created so that customers can use the products with confidence and reap the benefits, followed by localization, regionalization, and internationalization.

(6) Professional consultancy and maintenance services

With the common wave of global corporate mergers or system integration, business operation models have become more and more complicated. The challenges facing enterprises have become more and more formidable. Under this premise, how can the IT department, with the rapid expansion of the scale of enterprises, makes a flexible adjustment to the information architecture under the keynote of security management? This has become the general trend. In particular, the information architecture platform of the new generation data center has become the key to boosting the competitiveness of enterprises.

Traditionally, Taiwan started as a manufacturing industry and focused on production capacity. Today, the so-called competitiveness not only refers to production management and cost control, but also includes economic added value and new applications created by using competitiveness. In order to develop a new business model for Taiwan's IT industry, it is necessary to start from the software technology, content and hardware equipment manufacturing capacity.

As far as the development of science and technology and the refinement of software writing methods are concerned, the probability of successful execution of the server integration system project will increase. Therefore, if a company desires to lower the IT costs, such as, manpower, equipment and management, the original distributed processing architecture must be consolidated, which is an inevitable trend. There are two possible solutions for consolidation. One is single system architecture integration. Existing application programs are completely or partially rewritten to be consolidated into one architecture. Although the front-end operation burden is higher, it can maximize long-term benefits. Second, the application system isolation method can be adopted, and application programs with different attributes can be effectively separated through one or a small number of high-performance and high-flexibility medium and large mainframes.

Both of these two integration models can be achieved with the mainframe featuring mainframe stability, open architecture, and multiple computing frameworks, together with their rigorous implementation methodologies and consulting service. This is the system's opportunity of integrating vendor consulting professional services and maintenance services.

(III) Overview of technology and R&D

1. Research and development expenses in the most recent year and as of the annual report publication date:

Unit: NTD thousand

| Year                        | Amount |
|-----------------------------|--------|
| 2022                        | 84,411 |
| January 1 to March 31, 2023 | 21,248 |

2. Technology or product developed successfully in recent year:

| Time | Name of R&D plan   | Explanation   |
|------|--|---|
| 2022 | Continued R&D of highly flexible AIoT security interconnected field applications                   | <p>The security platform and security networking mechanism developed by the EAR application platform are integrated into different application platforms depending on the field of use.</p> <ol style="list-style-type: none"> <li>1. The integration of the mobile homecoming IoT payment technology and the exclusive AIoT Push payment technology.</li> <li>2. The highly flexible AIoT smart retailing becomes the retail terminal for payment and donation and creates the End-to-End service of who pays, collects the bills, pays the bills, uses the service, push suggestions and stores the receipt.</li> <li>3. Smart multi-function safety video.</li> <li>4. The smart ward doctor/nurse login allows intensive care ward physicians to securely and conveniently access the system remotely in the clinic, solving or replacing the current doctor's ordering model via telephone.</li> <li>5. Smart campus, providing environmental monitoring and non-dead angle safety video.</li> </ol> |
|      | Development of the sustainable digital transformation platform                                     | Based on the implementation of the "Hybrid enterprise information integration application platform" researched and developed by the Company, the integration of data management and data governance was added this year to help corporate IT departments flexibly manage and maintain and operate the information system based on integration of cloud and local information systems and; also, to generate the optimum AI computing model from data governance by utilizing the advantages of cloud-based services that are available and accessible anywhere, anytime and apply the AI machine learning function to the optimum method in the manufacturing and decision-making systems.  |
|      | R&D of free cash flow visual monitoring system by taking bank behavioral risk survey as an example | Take behavioral risk surveys for banks as an example. The diversification of banking business and online payment have given rise to huge amount and complexity of transactions, which complicate financial crime and make it difficult to analyze. The banks need a flexible framework that does not require a pre-established data framework, which can accommodate the variable data format. The framework can also flexibly analyze multiple types of data, and provide the Bank's risk investigators to conduct data investigations from various angles and find various possible financial risks and suspicious transactions to deal with various financial risks.   |
|      | Automated Defense Mechanisms from MYTRE ATT&CK   | This plan is aimed at correcting the information security problem that plagues many enterprises and organizations. The non-profit organization MYTRE ATT&CK uses the hacking attack spectrum created by the non-profit organization to carefully segment various stages of intrusion, targets, and methods of hackers and establish a knowledge base for each attacking method and countermeasure. It can drive the corresponding information security equipment to implement the optimal defense policies and measures. In this way, the risk of successful hacking is greatly reduced.  |

(IV) Long, Short-term business development plan

(1) Short-term plan development direction

- A. Investment in mobile application software R&D, access to cloud services, mass data analysis, AI, and blockchain

IDC forecasts the 10 major trends in the ICT market in 2023, such as: digital sovereignty, accelerated automation application, implementation of multi-modality AI application, software traceability, supply chain restructuring and new competitions, geopolitics to accelerate the development of low-orbit satellites, multiverse, the multiple and multi-stage implementation of digital twin, the accelerated post-pandemic economy by SMEs and cloud-based transformation of information service providers, the formation of the consumer of the future, and the development of B2C industry driven by revolution in payment under the wave of digital population; Investments have been made or are currently in the process of deployment.

- B. Provide the information system needed for the growth of corporate customers

The Company's customers are all large corporate customers, and their demand for information systems has grown from accounting processing in the past to the service that "anyone, anywhere, anytime, and any tool" can access information. In the future, the Company will further develop into taking the information system as the core strategic requirement for the Company's growth. The Company will invest in more talents, introduce new tools and platforms, develop new products, and contract more large-scale projects in response to the complex needs of customers. First, it meets the needs of customers. Second, it can get rid of the competition from many peers in the low-margin market and allow the Company to enter the niche market with higher added value.

- C. Assist enterprises to develop mobile application software into APP, micro-service (container), and mobile workspace

Enterprises are constantly seeking the best solutions in terms of corporate flexibility and employee efficiency. With the popularization of smart mobile devices and the continuous improvement of device performance, the mobilization of the enterprise's core system has become the mainstream consideration in the conversion. The Company has developed mobile APPs for more than 12 years, and with the total mobile workspace solution developed by foreign IT manufacturers, we are able to provide enterprises with next-generation mobile services and new-generation software and micro-service development technologies.

- D. Enhance the introduction of new products so that customers can purchase at one time

At present, we have represented more than 30 kinds of world-class software and hardware to meet the needs of corporate customers. This year, several software and hardware agents will be added so that customers can purchase at Stark Technology as a one stop shop and the service breadth and depth will be increased.

- E. Continue to increase technical support manpower

At present, in addition to providing installation and maintenance of more than 40 kinds of products, we will continue to increase the distribution of products this year. At the same time, it is necessary to establish sufficient technical personnel to provide complete and professional information service. The growth and improvement of fundamental learning ability of the technical personnel is also one of the important directions of the Company.

F. Cultivate industry-specific consultants

In addition to providing complete IT tools and after-sales service, it is also important for system integrators to help create more business opportunities. By understanding the industry trends and needs of enterprises, we hope to get closer to the challenges and needs of corporate development, and give more comprehensive and complete professional suggestions, so as to coexist and prosper together.

G. Establishment of network information security exhibition center

In addition to the sale of IT equipment, in order to differentiate ourselves from other system integrators, Stark Technology has been actively nurturing IT security talents and building up IT security capabilities. We have quite some accomplishments in the banking, e-commerce, schools, manufacturing industries, and government departments. We have made it not only in the sale of equipment, but also in cooperation with professional information security services, so that the products can exert the maximum benefits.

In recent years, hackers' attack methods have become more and more diversified, and the targets of attack have shifted to the core information of enterprises, including customer information, confidential R&D, and personal information. A variety of attack methods have been used to achieve the purpose of intrusion, internal diffusion, and information theft. Therefore, a single information security device cannot provide effective protection. It is necessary to use multiple information security products for joint defense against various attack methods, and coordinate with professional equipment policy adjustment and information security services to effectively defend against omnipresent hacker attacks.

In order to more effectively demonstrate the product functions and the benefits of joint defense, the Company has established a network information security exhibition center to simulate the internal environment of an enterprise. It can also be combined with the deployment of information security equipment to demonstrate the functions of the equipment, so that customers can clearly understand the information security equipment deployment method and the effect of joint defense. In addition, the simulation environment can also be adjusted according to the customer's environment, so that the products can be presented effectively in line with the needs of the customer. This enables customers to understand the benefits of information security products and Stark Technology's information security services.

H. Develop integrated service businesses of Stark Technology on the big data topic

We will propose suitable solution plans for industries based on the company's experiences in high-tech manufacturing, telecommunications and financial services from the big data analysis, and so on applications. This includes consultation, platforms, and analytical tools.

I. MDR (Managed Detection and Response)

We will use the Company's solid information security consulting and technical capabilities to provide customers with a more comprehensive range of MDR professional services covering active and detection of possible or ongoing information security incidents, potential threats, and security risks in advance, blocking the attacks at the instance and responding to them.

(2) Long-term plan development direction

A. Strong software development and integration capabilities

The Company has successfully developed ERP software, factory automation systems, anti-money laundering systems for finance, blood banking systems, and customer experience management systems for telecommunication companies. This fits the scale expansion of the domestic finance and capital market and the Internet development in recent years. There are unlimited opportunities in the future. The Company is also actively developing software related to manufacturing, financial services, and telecommunications with the existing manpower and experience in order to expand the business scale.

In addition, the Company's integrated disaster recovery (BC/DR), professional network services (Networking), telecommunication, professional services for JAVA/J2EE, Information Security, Business Intelligence, network management, professional database services (DB), big data analysis, deep learning/machine learning (AI), professional storage management services, Enterprise Information Portal, Balanced Score Card, Customer Service Center and Call Center functions have demonstrated excellent integration ability in order to create higher added value of the Company.

B. To lead the system integration business with professional services

The competition in the information service industry is getting increasingly fierce, and the profit of traditional software and hardware sales is reduced as a result of the competitors entering the market to share the pie. In addition to hardware products, the Company will also enhance customers' dependence and trust by providing professional services such as complete solutions and good after-sale service. Working on driving server sales with Total Solution professional service is an important business strategy, and the Company has a business territory to lead the system integration business with professional services, and to maintain both hardware sales and value-added services.

C. Obtain strategic outsourcing opportunities by offering differentiated services

The information service industry has been developing in Taiwan for many years, and it also has its own special service orientation in the presence of the international information service manufacturers. The Company utilizes differentiation in the domestic information service and niche market feature to seize market opportunities arising from strategic outsourcing.

While the international manufacturers are actively exploring the domestic strategic outsourcing market, the Company's existing long-term alliances and cooperative relations with the foreign manufacturers, plus the Company's project support capabilities, and its strong vertical industry knowledge and strengths different from other competitors, which increases the chances of the Company to obtain subcontracted services.

D. Develop cloud-based outsourcing services and shared center business

More and more small companies of industries will use outsourcing services and sharing center business to achieve the use of the latest IT services. Thanks to the bandwidth, small companies can easily access the computer resources in the sharing center. One of the Company's medium- and long-term goals is to provide outsourcing services and share center business. We own the equipment, software, solutions, capital, talents, and customers, which give us quite a competitive advantage. The Company has made use of its professional and solid information security consulting and technical capabilities to provide customers with a wide range of information security custody services (such as: MDR, API Security, Security Score Card, etc.) on the basis of the MSSP framework.

E. The Great Research Center became the Total Solution Center

Most of the for-profit enterprises aim to operate and make sustainable profits. Non-profit enterprises also aim to provide a certain service. However, there are many enterprises specializing in the related technologies. The question is how to establish a complete IT environment and use it to assist enterprises to create the best business value and improve service efficiency which is lacking in concept. Here we present that through the complete Total Solution Center, utilizing the construction experiences of Stark Technology in storage system, network information security and other IT software and hardware tools, accommodating the understanding of the Know-How of different sectors and the enterprise's policies, and set up various system software and hardware according to different needs. Only in this way can we help enterprises create the effectiveness of their IT investment and avoid waste of investment. Investment in IT construction helps enterprises achieve sustainable operation and to achieve the goal of continuous profitability.

F. Develop integrated service opportunities for Stark Technology in the context of the Internet of Things

After the Internet has become an indispensable tool for daily life in information society, Forrester, a US-based consulting organization, has predicted that the Internet of Things (IoT) derived from the concepts of "smart earth" and "perceived life" includes smart grid, smart transportation, smart logistics, smart home, environmental security monitoring, industrial automation upgrading, smart medical care, smart agriculture, and mobile commerce. The scale of the industry in 2020 could exceed thirty times to that of the internet becoming the next emerging global industry reaching trillion dollars. Taiwan is one of the major suppliers of ICT related products in the world. The government will play the role of facilitator and lead the infrastructure construction of the Internet of Things, and provide the hardware and software manufacturers in Taiwan's ICT industry to engage in the production and development of key hardware products and software services. As the market expected, the rapid development of the Internet-of-Things (IoT), business models based on IoT have been proposed and tested for market acceptance. The Company utilizes its experiences accrued over the years in core IT technology and related software and hardware construction for different industries. It aggressively develops business opportunities relating to IoT application in professional fields.

- G. Develop integrated service opportunities for Stark Technology in the context of the artificial intelligence.

Following AlphaGo's astonishing performance in defeating the highest human level Go players and in Atari or various video games, Deep Learning has become the latest technology and word for every household in just a few months. Major technology companies have invested in the research of deep learning one after another, and applied the research results to various products. As a result, deep learning has become an indispensable part of human life before we know it.

From a simple perspective, deep learning projects can be classified into computing platform construction and deep learning algorithms. The computing platform includes a GPU-based server that provides the deep learning computing framework (e.g., Google's kubernetes) to execute various types of neural network. While the deep learning algorithms can be classified into three stages: Data integration and cleaning (responsible by data scientists in various professional fields), training and model building (responsible by AI engineers), inference model deployment.

With years of experience in IT core technology and software and hardware implementation in different industries, the Company has completed the construction of a deep learning computing platform, and already has extensive experience in construction in high-tech industries, academia, and research institutions; In terms of training and model construction services, the Company not only acts as an agent and provides AutoML, but also coordinates with academia and research institutes to provide customized modeling services to customers, and actively achieve good results under the huge business opportunity of AI in this century.

## II. Market, production, and sales overview

### (I) Market analysis

#### (1) Sales and providing regions for main products and services

Most of the Company's products and services are sold and provided in Taiwan, accounting for 96.75%% of the total sales.

#### (2) Market share

The Company is the largest system integrator in Taiwan, providing the most complete information system integration services for customers. Currently, our company has more than 5,600 customers. Half of the top 1,000 domestic companies are customers of Stark Technology, and more than 600 TWSE/TPEX listed companies are our customers. The Company is ranked among the Top 500 Service Enterprises in Taiwan. Being the agent for products of the world's leading brands, with the most advanced information technology and professional services, the Company plans complete information system solutions for all walks of life. The main service items are the organization, planning, and construction of IT Infrastructure for enterprises with well-known information products in various fields that the Company acts as the agent, and the provision of related professional consulting services to help customers build the most favorable business development information platform. An information platform that enables them to utilize, integrate, and share all of the information resources of an organization, thereby bringing the entire information system into full play, and ultimately helping an enterprise maximize its operational effectiveness.

The Company has focused on major industries for more than 20 years. These industries have made up 80% of the overall industry. We continue to accumulate professional knowledge in these industries to improve the depth and breadth of customer service. This includes manufacturing, financial services, telecommunications, government agencies, educational and research institutions, and other industries and commerce, and medical institutions.

(3) Future market supply, demand, and growth

In the early days, Stark Technology entered the market with an open structure. In 1994, its business activities were mainly the distribution of Sun workstations and servers. The Company's management team are experienced talents who have developed the sales market of the workstations for more than 20 years. With the technologies and experiences accumulated over the years, the Company has become an important distributor of workstations and servers such as IBM, HPE, and NVIDIA, and provides services such as software, network planning, and peripheral products. So far, it has accumulated more than 5,600 customers. Our work has been affirmed by major domestic manufacturers. The following is a description of the supply, demand, and growth of the six major product categories accounting for the Company's operating revenue:

A. Server and Workstation Market

Workstations are not as powerful as PCs or servers in terms of media exposure, frequency of marketing activities, and market appetite. It occupies an important position in engineering calculation and scientific computing, and is an indispensable tool for professional designers to make money. Taking the following examples, EDA is an indispensable application in the IC design industry, or MCAD design is highly demanded by vehicle parts and mold manufacturing industry, and the demands by popular 3D animation, online games, video editing, digital content, and financial calculation projects are still booming. Based on the innate advantage in image editing and processing, for most designers, the workstation still has the characteristics that cannot be replaced.

In recent years, workstations have been widely used in all walks of life. Various hardware suppliers have already switched from dedicated central processing unit (such as, IBM's PowerPC) and dedicated Unix (such as: IBM's AIX) operating system to the x86 central processing unit and the shared Linux operating system, which is relatively easy for users to acquire and intensifies market competition.

EDA applications, which involve a large amount of analog computing requirements, have always been an indispensable tool for revenue generation in Taiwan's IC design. With the rapid evolution of science and technology, utility computing is sweeping by, and servers are also used as an important part of EDA applications.

The advantages of blade servers and rack servers consist of multiple benefits such as "space saving," "convenient for management," "easy to expand," and "suitable for special applications." In response to the different requirements of the information system applications and the decision on whether to use many virtual servers depending on the environmental differences in relation to the spaces of the engine room, and so on factors, customers may choose the appropriate server type according to the actual application of Internet-of-Things services. Meanwhile, in response to the diverse and practical application of AI deep learning, major server manufacturers have also been releasing AI deep learning super servers that are powered by GPUs, thereby giving professional customers more choices.

## B. Storage equipment market

Judging from the current market, the storage architectures adopted by enterprises are in general divided into two categories: Traditional storage architectures and cloud storage. Due to the limited IT budget and application environment, most enterprises will consider traditional storage devices, whether it is full flash or hybrid storage array, and connect them to the internal IT system of the enterprise by DAS, NAS or SAN. When an enterprise system diversifies and needs to integrate with different platforms, the integration of servers and storage devices becomes very important. On the other hand, as enterprise storage systems become increasingly complex, more flexibility is required for the network architecture in terms of management, future equipment expansion, and even disaster response or the possibility of moving to the cloud in the future. It also urges enterprises to consider the use of SAN architectures in procurement.

In response to the Software defined datacenter (SDDC) storage market, virtualization vendor VMware introduced the Vertical SAN architecture in 2014. This has changed the current storage operation method. Virtual SAN not only simplifies storage configuration and management, but also creates more flexible operation from the basics to reduce the overall cost of ownership (TCO). Virtual SAN provides the reliability and stability of an enterprise storage system and can flexibly and effectively prevent data loss when a hardware failure occurs. Virtual SAN is very suitable for a variety of virtual environments, including virtual desktop basic infrastructure, test and development, and disaster recovery.

## C. Market of network products

Under the global influence of COVID-19, the increase in the demand for hybrid office and low-contact enterprises, and the strong demand in the Wi-Fi 6 5G environment, ABI Research forecasts that by 2025, there will be more than 15.5 billion Wi-Fi related devices in the world. Businesses will need to prepare for the growing amount of data being generated and captured by networked devices. Many of these IoT technologies will be applied to the internal enterprise or the public network. Therefore, it is absolutely necessary to invest in the network infrastructure to support these developments. Most of the added data is unstructured, and enterprises will soon need more flexible and dynamic control to manage the Internet of Things.

With the expansion of the deployment scale of wireless network, it has become an indispensable element in the current IT infrastructure, but it also brings about the trouble of integrated management and security policy configuration. Therefore, in recent years, network solution providers have begun to emphasize the integrated management solution for wired and wireless environments, thereby solving the problem of excessive management complexity.

To develop mobile applications in an enterprise's IT environment, the first priority is to simplify the unified management of wired and wireless network settings and security policy configuration. If wired, wireless, and information security are provided by different vendors, most of them have to rely on the Simple Network Management Protocol (SNMP) to achieve this. Therefore, in recent years, network solution providers have begun to emphasize the integrated management solution for wired and wireless environments and cloud management platform development. This solution solves the problem of excessive management complexity through multi-cloud integrated management and automated deployment. In the future, these platforms will also open up APIs to allow enterprises or OEMs to develop customized management programs, data presentations, and network equipment. This enables higher and in-depth visibility into data center services and improves operational efficiency.

#### D. Information security product market

With the development of the Internet and the popularity of broadband, the Internet has become an important platform for individuals, enterprises, and even countries to communicate with each other. However, at present, the Internet is full of threats, such as viruses, worms, spam emails, denial-of-service attacks, hacking, phishing, and spyware, information and network cyber security has become a global concern.

To ensure information security, many solutions have emerged on the market, ranging from personal anti-virus software, and corporate network security devices, to e-commerce transaction security mechanisms. Overall, the information security protection measures introduced in the industry can be roughly divided into passive ones, such as firewalls, VPNs, and intrusion detection devices, and active ones, such as data encryption, identification verification, access permission and so on control methods. Most importantly for information security, it is to meet the five security standards and goals: Authentication, Confidentiality, Integrity, Non-repudiation and Access Control. The constant introduction of new cryptography and algorithms on the market is designed to meet the application of these five security standards.

Public Key Infrastructure (PKI) provides a digital certificate mechanism to confirm the identity of the counterparty. In order to achieve the security goal of data integrity, the digital signature function is used to check whether the data is tampered with during the transmission through a set of paired public and private keys to perform data encryption and decryption. The digital signature function is used to solve the problem of non-repudiation, and the identity and attribute are verified through the issuance of digital certificates, which can be used as the basic basis for authorization. Therefore, PKI can be said to be the only solution that meets and achieves the five security principles mentioned above at the same time.

For a long time, although e-commerce collapsed due to the dot-com bubble in 2000, it is becoming more and more popular now due to the popularity of broadband and online shopping, and it is also because of this that the PKI with high security is much favored by the industries. On the prospect of the PKI development, it has gradually expanded from electronic correspondence to internet tax filing, secure mail/Website, VPN, and e-commerce expanding to the upstream and downstream supply chain. It is good to see the active development of PKI.

According to the survey, information security is the top priority for enterprises when adopting virtualization and cloud computing. Whether the enterprise builds its own private cloud or uses a public cloud service, the data storage method of the cloud-oriented enterprise is significantly different from the past. The concern is that after storing information from in-house computers to the cloud, it is equivalent to exposing confidential information to the Internet. How to safely enjoy the convenience of the cloud has become the most important issue for enterprises. Based on this, many well-known domestic and overseas information security vendors are already providing virtual and cloud-based information security products and services, ranging from virtual application firewalls, cloud-based anti-virus, and cloud-based webpage and mail security services, to cloud-based identity authentication, access control, and data protection. The construction requirements are adopted into virtualization and cloud construction, freeing enterprises from concerns about security.

While the information security solutions continue to evolve, the underground economic criminal groups that the black hat hackers belong to are also developing more advanced intrusion techniques and technologies. The anti-hacking devices at many gates are also incapable of blocking them out completely now. Hence, it has driven many security protection for terminal devices, such as: Emerging technologies such as User Behavior Analysis (UBA) and network behavior analysis which have become new business opportunities for information security protection.

E. Computer software market

There are not many software product brands in Taiwan, and only a few of them can rely on the software products to secure a software market position. Trend Micro, CyberLink, and Digiwin are the very few cases that the outside world is familiar with. Many people with software development skills hold their own technical ability and have beautiful visions of starting a software company, but very few are able to stand firm in the market in the end. As the saying goes, “There is no barrier to entry, only growth.” Possession of technology is not the key to a company’s success. For growth, it is necessary to look externally and understand customers’ needs and trends. Only in this way can technology be accepted by the market and create a source of profit.

If a customized software product is to be successful, the first priority is to understand and get close to the needs of the customer. The product concept will then be accepted by the customer. Secondly, provide local and diversified services. In Taiwan, small and medium enterprises are the main business. Each enterprise has its own unique operating know-how and industry characteristics. They are not receptive to software products that cannot be modified at all. We must also be able to customize products based on the specific needs of different customers and conduct secondary development. These adjustments are made at the tactical level.

The development environment for Taiwan’s software industry is much more challenging than before, and the overall environment is not as good as before. India has secured a key position in the software industry, while China has its ambition and abundant human resources. They are both respectable competitors. Taiwan’s software industry is facing strong internal and external competitive pressure. Taiwan must completely change the vertically integrated development model that covers it all. Enterprises should find a foothold in the industrial value chain based on their own advantages and position, develop toward specialization, and aim to be a global leader. The resources irrelevant to this goal shall be released to allow enterprises to focus on development, and the vertical division of labor and horizontal integration of the industry can also be gradually realized.

As far as Taiwan’s software market is concerned, telecommunications, banking, government bidding, and high-tech manufacturing provide the greatest business opportunities every year. In these related fields, enterprises can target the fields relevant to their own competitive advantages and develop new niches in the market. One can certainly find the space to show and flourish.

As the ERP market among medium and large enterprises tends to be saturated, SMEs have recently become the focus of competition among manufacturers. However, the SMEs are distributed widely which makes it difficult to keep focus in the market. Even though it is tedious in its management but it is still worth the go.

F. Consulting and maintenance service

Owing to the global e-commerce trend, system integration has become one of the most popular tools for enterprises to upgrade their overall competitiveness, and the system integration service has become a hot business. The current system integration services generally include enterprise resource management, digitalization of administrative procedures, system hosting, application programs, network architecture, backup mechanisms, and information security integration planning and creation services. Consulting service is also a hot item in the outsourcing service market. With the mandatory requirements of government laws and regulations, the trend of the introduction of Basel+II, the problem to the time sequence of the old large type mainframe in 2011, and the impact of the new labor pension system on operating costs and so on factors, the growing demand for outsourcing of safety services not only arise from government institutions and the financial industry, but also general enterprises who began to realize the potential benefits of outsourcing.

Security management service is a hot topic in the IT outsourcing of enterprises. It used to be a part of the outsourcing of information technology system. As the information security problems worsened over time, and the global security awareness surged, these have driven this service to become one of the most popular IT outsourcing projects separately. Although Taiwan claims to be the world's IT industry center, in reality, the concept and market for information services is still in its infancy. Most enterprises have been reluctant to accept the concept of valuable services, resulting in difficulties in promoting related information services.

At present, there are different types of security management services in the market with different definitions, and they can be roughly divided into security protection equipment, anti-virus, mail, storage, and remote backup security services. Among the security management outsourcing services in the current market, all of them offer many different services for customers to choose from. With the most basic being the monitoring or hosting of security protection equipment. Common equipment includes firewalls, intrusion detection/intrusion prevention, or anti-virus.

E-mail security escrow service is one of the most popular outsourced security services. It not only provides email security, but also includes the escrow service of the entire email system and security. Therefore, enterprises do not need to purchase solutions and manage them. They just need to monitor the service provider on achieving the goal.

With the refinement of digital criminal methods, general information security protection equipment still has some risks and vulnerabilities. In other words, highly automated information security equipment still has information security vulnerabilities that are continuously discovered by hackers. At such time, regular penetration testing exercises must be used by "white hat hackers" who are also capable of hacking to help fill these vulnerabilities and reduce risks.

(4) Favorable and unfavorable factors of competitive niche and development prospect and countermeasures

A. Favorable factors

a. Complete product line

The Company is the agent of more than 40 information products from world-renowned manufacturers such as IBM, Lenovo, Palo Alto, HPE, Aruba, NVIDIA, HDS, Check Point, CISCO, Veritas, NetApp, VMware, Citrix, F5, FORINET, CrowdStrike, Cellopoint, TeamT5, UGuard, and so on to provide a complete product line to meet the needs of customers, so that customers can purchase all at once.

b. Deploy a complete customer service network

For the Company to provide complete customer services, demonstrate the functions of the products distributed and the benefits of application, and let customers understand the Company's system integration and professional value-added service capabilities, we allow customers to obtain evidence before signing a project. We also let customers obtain nearby and immediate service and problem solving, a thorough understanding of product functions and actual benefits, in order to plan the best solution. Thus, a complete customer service network has been established in Taipei, Taoyuan, Hsinchu, Chiayi, Tainan, Kaohsiung, Hualien and all the way in West Coast of USA, China and Vietnam. Through actual verification, the Company's customers can obtain a reliable proposal framework, problem-solving ability, and feasibility prototype verification, and further ensure the project construction time schedule, quality and funding. This is to achieve the goal of strengthening the cooperative relationship and promoting the complete success of the project.

c. Experienced management team with emphasis on R&D technology

The Company currently has about 66 software development technicians who have completed dozens of large-scale software construction projects for major corporate customers, and are committed to the development of a variety of software products that have won the trust and likes of customers. The R&D of software systems and professional services include:

1. Stark Technology ERP, including trading ERP, manufacturing ERP, chemical materials ERP, automobile ERP, incorporated ERP, and international trading ERP.
2. Stark Technology portal website, including the supplier's portal, employee's portal, customer's portal, B2B portal and corporate information integration portal.
3. Stark Technology knowledge management system (K-Pro).
4. Computer integrated manufacturing project (CIM, MES).
5. Software development projects, including PLM and BPM, and so on.
6. Stark Technology's telecom application software, including CEM, AppStore, and CDR.
7. Suitable for anti-money laundering (AML) and high-frequency trading systems in financial service industries.
8. Information security professional services, including network vulnerability audit service, penetration testing service, information security record analysis service, security management center establishment service, information security product customization service, and information security consulting service.

d. Employees with strong coherence and good qualities

The Company currently has more than 586 employees, including various talents in software R&D, sales and marketing, engineering maintenance, and administrative management, among which more than 85.3% have received college or graduate school education. They are a group of young, energetic and creative employees. The professional personnel have professional licenses from well-known foreign manufacturers, including Cisco's CCIE, CCNP, DCNSS, CSE6.0; NetApp's NCSE series, NAHSE, NCSIE, and NCTA; HPE Aruba's ACMA, ACMP, ACCP, ACSP, ASE, MASE; Fortinet's NSE4, NSE7; Citrix's CCA, CCP, CCE; Palo Alto's ACE, PSE, CNSE; Nutanix's NCSR, NCSE, CCIC, NCPI; F5's 101 Certification; VMware's VCP Certification; Microsoft's MCP, MCDBA, MCSA, Microsoft Azure Administrator; Ruckus' CWNA, CloudPath Technical Certification; and IBM's Power Systems and Software.

e. Stable profitability and sound financial structure

The Company is selling products with high gross profit and high contribution. The Company has stable profits and a sound financial structure. Please refer to pages 201 to 209 for financial overview.

B. Unfavorable factors and countermeasures

a. Businesses reduce IT spending

In an attempt to improve competitiveness, enterprises may reduce their IT support, including hardware, software, and services.

Countermeasures:

The Company will devote itself to expanding the target customer base and increasing business in the service industry, medical care, military and other customers. Based on the market trend, such as, SMAC-I, IoT, AI, Fintech, Regtech, Blockchain and High Frequency Trading, the Company actively invests in and develops new opportunities in these.

b. Intense competition in the market

The competition in the system integration business is extremely fierce, and it is difficult for some business opportunities to maintain the expected gross profit margin.

Countermeasures:

The Company will commit to the R&D of new software, enter the niche market, and make use of the actual industrial experience to enter the professional field.

c. Longer duration of R&D results

It is the right move for system integrators to focus on software R&D. However, it takes 1 to 3 years to establish a large-scale project that is worth tens of millions of NTD, making it difficult for system integrators to develop the software and see the results in a short time.

Countermeasures:

Although it takes a long time to demonstrate R&D results, the R&D capability represents the bargaining chips and niches of the Company's future competition. Thus, we shall constantly invest in the R&D plans and at the same time while R&D on large-scale project, extend the technologies and skills of other small and medium projects.

C. Prospects for development

For traditional products, the gross profit of the products has shrunk due to the result of price cutting by competitors. The Company developed strategic products in view of this, and invested in information security equipment, information security software, network services, network integration applications and big data, AI deep learning/machine learning and other high value-added markets, and elaborate their future development prospects as follows:

a. Information security equipment market

In recent years, with the rise of the mobile devices applications which has expanded the deployment scale of the wireless network, it has become an indispensable element in the current IT infrastructure. But it also brings about the trouble of integrated management and security policy configuration. Therefore, in recent years, network solution providers have begun to emphasize the integrated management solution for wired and wireless environments, thereby solving the problem of excessive management complexity. The wired and wireless solutions need to include various management and function interfaces, including network control, network management, policy management, cloud network, geographic location analysis, and micro positioning service. On assisting enterprises in creating

the IT basic architecture, and even in the cross-environmental management and deployment of the headquarters and each branch, it has even become an indispensable part.

Furthermore, with the rapid development of the mobile trend, the development of the digital workplace by enterprises is not only to meet the demand for device networking, but also to make the network become smart. It can use automated adjustment to reflect the needs of enterprises and further satisfy the demand for a large number of IoT device applications. In addition, the new generation of mobile network security detection mechanisms must be equipped with smarter security detection and data analysis capabilities. Analyzing the data packets, data flows, logs and other data transmitted by the user device through the network to help companies understand who is connecting to the internet, which device is used to connect, whether the device is secure, what types of applications are being used on the Internet, and the location of suspicious internet users for automated isolation. Even before a network attacks an enterprise, isolate user devices from the internet one step earlier to reduce the risk of hacking. The above are all key projects for the future development of the information security equipment markets.

b. Information security software market

Enterprise users' concern about information security issues has extended from external defense to internal control. After having gained the outcomes step by step from the tremendous spending on building firewalls, intrusion detection, anti-virus system and so on mechanisms in the past, today, there has been a shift in the focus to internal identity recognition and access management and endpoint protection.

Information security solutions have entered the scene of contention. In addition to accelerating the transmission speed of enterprise WAN applications, solutions for accelerating SSL traffic are also a hot topic in the market. Due to cost and security concerns, companies often do not host servers in remote branch offices. However, the problems that arise are increased application traffic and occupied bandwidth, resulting in poor application performance. In addition, the increasing demand for enterprises to transmit SLL and video conferencing, and the need for application acceleration equipment have also created business opportunities in the information security software market.

In response to the implementation of the Personal Information Protection Act, various industries have a high demand for solutions such as information equipment access recording, database auditing, webpage security, insider online behavior control, penetration testing, and vulnerability scanning. While the information security solutions continue to evolve, the underground economic criminal groups that the black hat hackers belong to are also developing more advanced intrusion techniques and technologies. The anti-hacking devices at many gates are also incapable of blocking them out. Hence, it has driven many security protection for terminal devices, such as: Emerging technologies such as User Behavior Analysis (UBA), network behavior analysis and XDR, which have become new business opportunities for information security protection.

c. Internet service market

Although e-mail is still one of the main channels of network security threats, with the prevalence of various web applications such as browsers, Web Mail, IM, P2P sharing software, and RSS readers, the hackers, spammers, and virus writers, are shifting their targets to web applications. Therefore, web attacks have become the fastest growing threat on the

Internet. Enterprises need to take proper measures to deal with them.

For corporate users, web server and various web applications and services have inevitably become one of the main channels for external contact. Therefore, web security protection has become the primary goal of corporate operations. Regular vulnerability security updates for web server system and web applications are without a doubt a top priority. In addition to updating vulnerabilities, the internal network administrator of an enterprise not only needs to ensure that the website will not crash or suffer performance problems, but also needs to enhance security design and protection capabilities. Furthermore, it is best that enterprises can protect the security of the website by building a high level security facility for firewall or intrusion prevention and so on, and prevent improper access by hackers or suspicious actions outside the connection system. The internet service market will remain a hot topic in the future, bringing ample opportunities.

d. Internet integration application market

Telephone bills are a necessary expense for enterprises every month. Due to the cost-saving advantages of internet phone (VoIP), many business owners are willing to invest in it. This has enabled the booming development of the enterprise internet phone market. According to the report put forward by Gartner Group, 80% of enterprises worldwide will introduce internet phones in the next 5 years.

In the next 5 years, the internet telephone will become a must-have communication application for enterprises. Due to the continuous innovation of related technologies and product diversification, the trend of VoIP construction has shifted from large enterprises to small and medium enterprises. In the future, the demand in Europe and Asia will be higher. According to the forecast of IDC, by 2008, the output value of Taiwan's VoIP market has reached US\$360 million. The booming VoIP market in Taiwan is largely due to the SME e-service launched by the Ministry of Economic Affairs, which has listed VoIP as one of the basic e-services. In fact, it is the most important opportunity to shift the application of VoIP from large enterprises to medium and small enterprises integrating through the internet to enhance the enterprise communications capacity.

e. Cloud service

In the future, there will be more and more applications that do not need to put the computer server inside the company but externally, the so-called cloud. This will bring us new business opportunities, whether in hardware, system platform, application software or related services which will be transformed by the cloud. For example, because the ERP system originally used in the company has been converted to the cloud and is shared by 100 or more companies, the software needs to be modified to a certain extent, which is a business opportunity for the Company.

In terms of Apps replacing many human-oriented applications, using handheld mobile devices and SmartTV devices as the operating platform, it can be expected that more diversified cloud services will accompany the in-depth development of the information industry in different industries, linking industrial and academic R&D units and developed another commercial supply chain centered on software (cloud) services.

f. Big data

With the explosive growth of smart mobile devices, the explosive growth of various mobile APPs, including data processing, multimedia applications, and APPs related to food, clothing, housing, transportation, education, and entertainment can also be expected. The combination of personal devices, smart mobile devices, and mobile APPs can be expected to generate big data. Meanwhile, with the continuous development of IoT, it is also foreseeable that big data will be generated through M2M and wearable applications. How to use ICT to store such big data and generate new business opportunities with high-speed analysis platforms, analysis tools, AI deep learning, and creative analysis models will be the field that all walks of life are exploring. The Company will introduce and develop related solutions based on this, and strive for business opportunities.

g. IoT

As the market expected, the rapid development of the Internet-of-Things (IoT), business models based on IoT have been proposed and tested for market acceptance. The Company utilizes its experiences accrued over the years in core IT technology and related software and hardware construction for different industries. It aggressively develops business opportunities relating to IoT application in professional fields.

h. Industry 4.0

The smart manufacturing emphasized by Industry 4.0 enables the manufacturing industry to flexibly allocate a small number of diverse customer orders in the production line. The Industry 4.0 integration capabilities of the Company already possessed: PLM (R&D and design), MES/CIM (Manufacturing Automation), and ERP have enabled the Company to become more competitive in helping the manufacturing industry to introduce Industry 4.0 business opportunities.

i. AI deep learning/machine learning

In the past, due to the performance of data and computing resources, it was impossible to effectively complete extremely complex deep learning or machine learning operations. However, with the development of semiconductors and chips, the GPU with powerful computing resources has replaced the CPU, which makes AI deep learning/machine learning no longer just an abstract theory in the laboratory, but a practical application that can be used and introduced into various industries to help improve and strengthen various fields.

(II) Important uses and production processes of major products

1. Important uses of major products

| Product line                  | Main products   | Main purpose and function   |
|-------------------------------|---|---|
| Mainframe server              | Departmental mainframe server<br>Corporate level mainframe server<br>Hyper-converged enterprise server<br>AI artificial intelligence server   | Factory automation machine controller computer<br>AI automated machine artificial intelligence computer<br>Internet host<br>Departmental computing, file, and database mainframe server<br>Corporate level computing, file, and database mainframe server   |
| Storage device                | Disk drive, Disk Array System, Storage Area Network (SAN), Network Attached Storage (NAS), Tape Drive, Tape Cabinet   | Integrated storage systems of various platforms<br>Improving the efficiency of enterprise internal file access<br>Overall solution for corporate data backup<br>Overall solutions for corporate off-site backup, disaster recovery, and sustainable operations  |
| Personal computer             | Desktop PC<br>Notebook PC<br>Thin PC  | Provide computer equipment and office automation (OA) environment for the processing of personal information, connection to the Internet, information browsing, and personal computers used in the local area network<br>The new office trend that the terminal screen is provided by thin computer, centralized control by the mainframe, and sharing mainframe resources between personal terminals |
| Computer peripheral products  | Printer<br>Surveillance cameras<br>Uninterruptible Power System   | Peripheral products required by computer users for expansion or renewal of peripheral equipment   |
| Network products              | Router<br>Switch<br>Application Delivery Controller<br>Network management software<br>Wireless local area network equipment<br>Virtual desktop infrastructure   | Computer network design and planning<br>Computer network connection equipment<br>Computer network management  |
| Information security products | Next-generation firewalls<br>Network access authentication system<br>Web Application Firewall<br>Endpoint detection and response system<br>Safety Information and Event Management<br>Email security and life cycle management system<br>Wireless network security products | Enterprise IT/OT environment architecture and content security integration planning, defense protection.  |
| Computer software             | Operating system software<br>System and network security software<br>Office automation software package<br>Internet software<br>E-commerce software<br>Production line automation software<br>Wireless Solution Software  | Provision of software required for computer hardware equipment<br>Provide software required for various application fields<br><br>Provide software required for the construction of portal EAI and B2B.<br>Provide production line automation related software, including MES, machine maintenance, machine   |

|                                    |   |   |
|------------------------------------|---|---|
|                                    | Database management software<br>Mechanical design automation software<br>Data backup software<br>File and volume management software<br>Clustering and replicating software | connection, and so on.<br>Provide software for PDA and mobile phone connection  |
| Consulting and maintenance service | Consulting service<br>Maintenance service   | Provide different levels of service according to customer needs<br>Provision of after-sales maintenance services for related products   |
| Engineering                        | Optical fiber network engineering<br>Engineering of telecommunication equipment room in the building  | Plan and build fiber optic network based on customers' needs<br>Plan and construct the telecommunication equipment room of the building |

2. Manufacturing process: The Company does not have production manufacturing process, and is mainly engaged in the sales and development of information products and providing added value products to customers and distributors.

(III) Supply of major commodities:

The Company specializes in computer-related products and information services. Its purchase mainly includes work stations and servers, storage devices, personal computers, computer peripheral products, network products, and computer software. Please refer to page 188 for the major purchase suppliers whom we are in a stable relationship.

(IV) Names of customers with purchases (sales) exceeding 10% of the total purchases in any one of the most recent 2 years, and the amounts and percentages of purchases/sales:

1. Information on suppliers whose purchases exceeded 10% of the Company's total purchases in any one of the most recent 2 years

Unit: NTD thousand

|      |                               |           |                                   |                              |                               |           |                                   |                              |   |           |  |                              |
|      | Others                        | 3,640,801 | 73.40%                            |                              | Others                        | 3,864,901 | 70.94%                            |                              | Others  | 803,227   | 63.88%   |                              |
|      | Procurement amount            | 4,960,047 | 100.00%                           |                              | Procurement amount            | 5,448,083 | 100.00%                           |                              | Procurement amount                            | 1,257,364 | 100.00%  |                              |

2. Information on customers whose product sales exceeded 10% of the Company's total sales in any one of the most recent 2 years

Unit: NTD thousand

| Item | Year ended December 31, 2021 |           |                                |                              | 2022         |           |                                |                              | As of the first quarter of 2023 |           |  |                              |
|------|------------------------------|-----------|--------------------------------|------------------------------|--------------|-----------|--------------------------------|------------------------------|---------------------------------|-----------|--|------------------------------|
|      | Name                         | Amount    | Percentage to annual sales (%) | Relationship with the issuer | Name         | Amount    | Percentage to annual sales (%) | Relationship with the issuer | Name                            | Amount    | Percentage of sales made for the current year until the previous quarter (%) | Relationship with the issuer |
|      | Company A                    | 719,354   | 10.93%                         | Non-related party            | Company A    | 704,680   | 10.47%                         | Non-related party            | None                            |           |  | Non-related party            |
|      |                              |           |                                |                              |              |           |                                |                              |                                 |           |  |                              |
|      | Others                       | 5,860,200 | 89.07%                         |                              | Others       | 6,024,315 | 89.53%                         |                              | Others                          | 1,716,192 | 100.00%  |                              |
|      | Sales amount                 | 6,579,554 | 100.00%                        |                              | Sales amount | 6,728,995 | 100.00%                        |                              | Sales amount                    | 1,716,192 | 100.00%  |                              |

3. Reason for increase/decrease

- A. Explanation of changes in purchases: It is mainly due to market changes and procurement considerations. The situation of purchases from suppliers has slightly changed. In 2022, the purchase value of Zero One Technology and Metaage Corporation exceeds 10%.
- B. Explanation for the changes in sales: To meet the needs of different customers, the Company sells a wide variety of products, and the sales targets also include general enterprises, incorporated foundations, government agencies, schools, and medical institutions, and branch out into an extremely wide range of industries. The Company's sales value in 2022 to a single customer - Company A has reached more than 10%.

(V) Production volume and value in the most recent 2 years

This table is not applicable as the Company is in the information service business.

(VI) Sales volume and value in the most recent 2 years

The Company is in the information service business and primarily engages in the planning, integration, sale of computer systems and peripheral and obtains related maintenance services. There is no consistent statistical unit for quantity due to the wide range of products that the Company distributes and they are of inconsistent volume units. These products are categorized based on their nature. Therefore, the statistics on the sales value of these products are based on the categories and are as follows:

Unit: NTD thousand

| Year                               | Year ended December 31, 2021 |              | 2022           |              |
|------------------------------------|------------------------------|--------------|----------------|--------------|
| Sales value                        | Domestic sales               | Export sales | Domestic sales | Export sales |
| Major commodities                  |                              |              |                |              |
| Workstations and server host       | 859,153                      | 46,988       | 799,255        | 23,858       |
| Personal computer                  | 74,504                       | 527          | 69,239         | 712          |
| Computer peripheral products       | 436,148                      | 2,379        | 352,994        | 1,169        |
| Network products                   | 1,365,340                    | 31,231       | 1,322,764      | 41,785       |
| Computer software                  | 873,796                      | 27,513       | 993,975        | 26,075       |
| Consulting and maintenance service | 1,822,128                    | 128,914      | 2,041,364      | 114,209      |
| Others                             | 5,933                        | 657          | 7,675          | 308          |
| Storage device                     | 888,311                      | 16,032       | 922,866        | 10,747       |
| Total                              | 6,325,313                    | 254,241      | 6,510,132      | 218,863      |

(VII) Key Performance Indicators for the System Integration Industry

(1) Customer Satisfaction Index

The percentage of existing customers that continue to trade with the Company is also the customer's loyalty and satisfaction. The Company is in the information service industry, and customer satisfaction is the key to business continuity.

| Item   | The Company's actual business performance |
|--|---|
| Customer continuation rate is the customer retention rate. | 92%                                       |

(2) Integration capability indicator

The ability of the Company to integrate services into the system, the high gross profit of the integrated service, and the higher the indicator ratio, the greater the contribution is to the gross profit of the Company.

| Item                         | The Company's actual business performance |
|------------------------------|---|
| Ratio of integrated services | 32%                                       |

III. Distribution of employees' number, average years of service, average age, and educational background in the most recent 2 years and up to the publication date of this annual report:

| Year                        |                           | Year ended December 31, 2021 | 2022  | As of March 31, 2023 |
|-----------------------------|---------------------------|------------------------------|-------|----------------------|
| Number of employees         | Sales staff               | 162                          | 163   | 168                  |
|                             | Technician                | 340                          | 358   | 369                  |
|                             | Administrative staff      | 100                          | 101   | 102                  |
|                             | R&D personnel             | 65                           | 65    | 66                   |
|                             | Total                     | 667                          | 687   | 705                  |
| Average age                 |                           | 47.68                        | 48.38 | 48.48                |
| Average years of service    |                           | 12.99                        | 13.59 | 13.38                |
| % of educational background | Doctoral degree           | 0.45                         | 0.44  | 0.43                 |
|                             | Master's degree           | 19.79                        | 19.65 | 19.72                |
|                             | Colleges and universities | 77.66                        | 77.87 | 77.58                |
|                             | Senior high school        | 2.10                         | 2.04  | 2.27                 |

Note: The number of employees refers to the total number of personnel for Stark Technology Group, including Stark Technology Information, Stark Technology Inc. (Ningbo), Shanghai Stark, and Stark Technology Inc. (USA).

IV. Information on environmental protection expenditures

In the two previous years and as of the annual report publication date, the losses incurred, including compensation, and the total amount of fines due to environmental pollution by the company shall be disclosed along with the future countermeasures, which include the improvement measures, and the possible expenditures. The possible expenditures shall cover the estimated amounts of the possible losses incurring from countermeasures not taken, punishments, and compensation: None, the Company tests, installs, and sells computer products that will not produce pollution or damage the ecological environment. Therefore, there is no pollution prevention issue.

V. Labor relations

(I) The Company's various employee welfare measures, continuing education, training, retirement systems and their implementation, as well as the labor-management agreements and various employee rights protection measures:

(1) Employee welfare measures

[Salary and benefits]

☞ Appropriation of employee pension

☞ Fixed salary (including meals) for 12 months

☞ The three festivals bonus released based on the business performance, 0.5 month each for Mid-Autumn Festival and Dragon Boat Festival

☞ Distribution of year-end (Lunar New Year) bonuses and performance bonuses based on individual performance

☞ Long-term service bonus

- ☞ Employee remuneration
  - ☞ New Year's gift certificate
  - ☞ Labor Insurance, National Health Insurance, Group Insurance, and Occupational Accident Insurance
  - [Welfare and subsidies]
  - ☞ Subsidies for weddings, funerals and childbirth allowance
  - ☞ Subsidies for training and certification exams
  - ☞ Subsidies for various sports and leisure club activities
  - ☞ Domestic and foreign group tours and subsidy
  - [Other benefits]
  - ☞ Outstanding employees and long-tenured employees and rewards
  - ☞ Year-end event, Family Day and Sports Day
  - ☞ Regular free health checkups
  - ☞ Functional training and professional skills training for new and existing employees
  - ☞ Employee saloon, with a reading room for borrowing books, newspapers, and magazines, and the all-you-can-eat coffee and tea collections
  - ☞ Several authorized stores nationwide
- (2) Continuing education and training of employees:
- a. The Company establishes the "Education and Training Regulations" to provide education and training subsidies on a yearly basis, to organize internal or external training courses, and to plan relevant training courses according to the needs of functions and professional skills to strengthen employees' knowledge, skills, and overall quality. We have spent NT\$2,020 thousand on related education and training in 2022; the total number of employees for internal and external education and training is about 1,435 persons, and the total training hours is 6,885 hours. The Company's employees obtained 152 professional certifications in 2022, an increase of 36% from the year of 2021.
  - b. On the Company's financial information transparency, those who have obtained the relevant license specified by the competent authority: Two personnel from the Finance Center who have passed the subject test for stock administration affairs, and two licensees for the general exam bookkeepers license.
  - c. The Company's personnel relating to sound manpower systems who have obtained the relevant license indicated by the competent authority: One employment service Class B license.
- (3) Retirement system:
- The Company has implemented the Labor Standards Act since March 1998 and stipulated retirement regulations for full-time employees at the same time. The payment of employee pension is based on the years of service and the average salary at the time of retirement. The Company appropriates 2% of the total salary as the pension fund. The pension reserve is managed by the Labor Pension Reserve Supervisory Committee and deposited in the Bank of Taiwan in the name of the committee. Currently, the reserve amount is about NT\$84 million, which is sufficient to meet the retirement needs of related employees.
- The Company adopts the defined contribution system under the Labor Pension Act which came into effect on July 1, 2005. Upon implementation, employees can choose whether to apply the pension regulations of the "Labor Standards Act" or apply the Labor Pension Act to the pension system and retain their applicable years of service that fall before the adoption of the Labor Pension Act. According to the regulations, the employee pension fund contribution rate shall not be less than 6% of employees' monthly salary, and the Company's monthly pension contribution rate is 6% of employees' monthly salary.

(4) Status of labor agreements:

The Company has harmonious labor-management relations, a company that engages in the technology and information industry, and with highly qualified personnel. The Company's philosophy is clear and the operation and management systems are sound and can be implemented. The Company values employees' opinions and, in addition to its normal organizational system, holds regular labor-management meetings as a means of communication to enhance two-way communication. It is hoped that through the efforts of the Company, both parties of the labor and management can reach a common understanding so that the interests of employees and the Company can be aligned.

(5) Employee behaviors or ethical principles

The Company has established the Employee Work Rules and the employee code of conduct, which serve as the basis for employees to comply with in their daily work and behaviors.

The Company establishes the code of conduct for the purpose of seeking a high standard of ethical conduct for the Company's directors, supervisors, managers at all levels, and employees to abide by, to prevent the occurrence of inappropriate behaviors, and to ensure that their behaviors meet the following standards:

- a. Prevention of conflicts of interest.
- b. Avoid opportunities for personal gain.
- c. Protection of business secrets.
- d. Treat customers, vendors, suppliers and competitors in a fair manner.
- e. Protect and properly use Company assets.
- f. Comply with laws and regulations, and charters.

For the content of the Code of Ethical Conduct, please refer to the Corporate Governance section/ Principles of Corporate Governance/ Code of Ethical Conduct on the website of the Company at [www.sti.com.tw](http://www.sti.com.tw).

(6) Protection measures for the work environment and employees' personal safety:

A. Protective measures for work safety:

| Serial No. | Goal/Target  | Plan  | Explanation of current status   | Status of implementation  |
|------------|--|---|---|---|
| 1          | Prevent objects from storing charge into a charged body and prevent objects near the charged body from generating electrostatic induction. | Improvement and reduction of electrostatic effect                         | Currently, the work desks are made of wood and stainless steel. As they cannot conduct the static electricity to the earth or the conduction speed is too fast to damage the electronic components of the equipment, an anti-static desk mat must be installed with the surface resistance value between 10( 6) ~10( 8) $\Omega$ (upper layer) and bottom layer shall be 10( 4) ~10( 6) $\Omega$ and shall be earthed separately. | 1. Add the electrostatic grounding wire<br>2. Anti-static table mats are installed<br>3. Personnel should wear anti-static wristbands |
| 2          | Fire safety equipment is installed in accordance with the Fire Protection Act  | Preventive measures against fire  | Each floor above the second floor has been provided with slow descending equipment for every 100 people and below, and one machine for every 100 people. Each level is clearly labelled with the fire escape exits and the extinguisher installations. For the 10th level and above, the automated water spray head shall be installed.   | Annual fire safety inspection   |
| 3          | Waste sorting and recycling  | General, Styrofoam, Pallet  | Waste is properly sorted. Styrofoam and large pallets are recycled by environmental protection companies.   | Environmental protection company is approved by the Environmental Protection Bureau   |
| 4          | Insurance for the working environment  | Fire insurance, commercial insurance, public accident liability insurance | The leased and self-owned workplaces of Stark Technology.   | Apply for insurance annually  |
| 5          | Handling equipment for warehousing and logistics   | Hazardous factor reduction to prevent accidents                           | Regular maintenance of the stacker, and the use of the stacker can only be driven by someone with a professional driver's license.  | 1. Regular maintenance and testing of equipment<br>2. Obtain professional driver's license  |

B. Protection measures for the employees' personal safety:

- (a) For the safety of all employees, the Company has purchased the term life insurance and accident insurance to protect employees from illness or occupational disasters.
- (b) The Company provides employee health checkups on a yearly basis to protect and care for the health of employees.

- (c) Professional healthcare personnel is also contracted by the Company realizing labor health protection and health management to achieve a healthy and friendly workplace environment.

(7) Fulfillment of social responsibilities: Please refer to pages 91~124.

- (II) Losses due to labor disputes in the most recent year and up to the publication date of the annual report: N/A.

## VI. Cyber security management

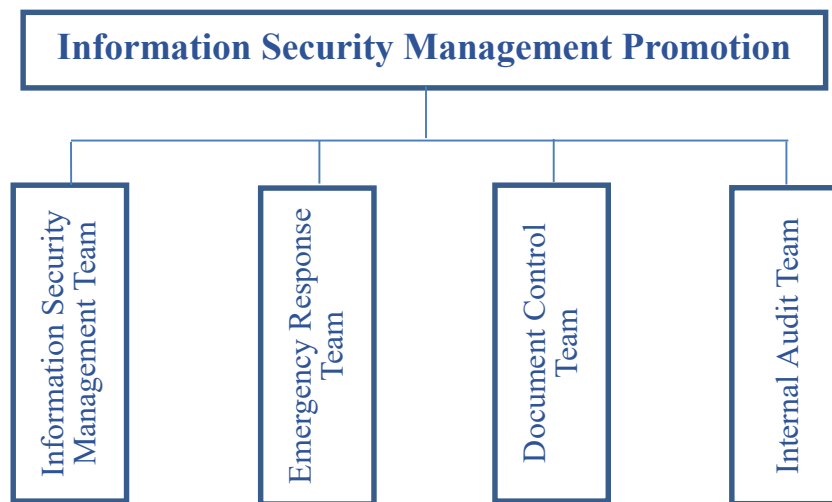

- (I) State the cyber security risk management structure, cyber security policy, specific management plan and resources for investments in cyber security management.

### 1. Cyber security risk management structure:

In order to ensure the promotion of internal information security management matters, the Company is responsible for reviewing information security policies, assigning security responsibilities, and coordinating the implementation of the Company's various information security measures. The "Information Security Management Promotion Team" has been established under the "Corporate Social Responsibility Committee". As the responsible unit, the Vice President, Hsin-Chih Huang, serves as the Chief Information Officer. Based on the various internal security considerations and needs of the Company, he coordinates the formation of the various units within the Company (information security professional service department, IT management personnel, administration, legal affairs, auditing, etc.). Working teams, including (1) information security management team, (2) emergency response team, (3) document control team, and (4) internal audit team. Responsible for formulating and promoting the Company's internal information security management specifications, information security risk management, regular information security education and training, information security incident emergency response and recovery, control of the Company's information security management system and documentation and regular implementation of internal information security audit and follow up for improvement.

The "Information Security Management Promotion Team" convenes information security management meetings regularly (2 meetings were held on March 29 and November 9, 2022) to discuss various information security issues of the Company, review information security policies, and track audit improvements execution result. The Chief Information Officer reports the status quo and future plans of the Company's information security management to the "Corporate Social Responsibility Management Committee" on a regular basis to ensure the applicability, suitability and effectiveness of the ongoing operation of the information security management system. In June 2022, the Chief Information Officer was granted renewal of ISO27001. The CSR Management Committee has reported the implementation status to the Board of Directors on October 28, 2022.

2. Cyber security management policy:

To maintain the overall information security of the Company and protect information assets, the security management of each information asset is strengthened to ensure the confidentiality, integrity and availability of the information assets to meet the needs of various business operations and in compliance with relevant laws and regulations. It is also to protect it from internal and external threats, either intentional or accidental, and an "Information Security Management Policy" has been established that covers the Company's various internal information assets and their users. The information users include full-time employees, hired personnel, outsourced suppliers and other authorized personnel. The specific objectives of the information security management policy are:

- (a) Maintain the confidentiality, integrity and availability of the Company's information assets and protect the data privacy of users.
- (b) Protect the Company's business activity information from unauthorized access and modification to ensure its accuracy and completeness.
- (c) There must be complete reporting and contingency measures for information security incidents to ensure the continuous operation of information systems and services.
- (d) Relevant personnel shall receive information security training and advocacy as required to enhance information security awareness.
- (e) Implementing an information security risk assessment mechanism to enhance the effectiveness and timeliness of information security management.
- (f) It conducts information security audits regularly to review access rights and the implementation of information security management systems.
- (g) Compliance with applicable laws and regulations and achievement of the goal of business continuity.

In addition to formulating the "Information Security Management Policy," the Company has implemented and established a complete information security management system and stipulated and implemented various information security management regulations that cover (1) Information asset management and (2) Risk assessment, (3) Human resource management, (4) Physical security management, (5) Access control management, (6) Communication and operations management, (7) System development and maintenance, (8) Supplier management, (9) Information security incident management, (10) Business continuity management and (11) Information security audit and corrective actions. The Company also passed the SGS verification and obtained the ISO 27001 verification in June 2020.

3. Specific management regulations:

In order to achieve the Company's information security policies and goals, the specific management plans are as follows:

- (a) Construction of comprehensive security protection: based on the expert advice of the Company's Information Security Service Department and experience in the sale of various information security protection systems, multi-layer information security protection equipment is deployed.
- (b) Regular risk and security testing: the Company's information security consultant conducts vulnerability scanning and penetration testing on the Company's internal components on a regular basis to examine potential security risks. Personnel in charge of each system execute vulnerability repairs and system security adjustment based on the testing results to improve overall security.
- (c) Introduction of international information security certification: the Company has introduced and passed the ISO 27001 certification as the standard and basis for the Company's overall information security management method.
- (d) Information security education and training: the Company regularly conducts information security education and training to all employees to raise employees' information security awareness. In addition, employees are encouraged to participate in specific information security courses and acquire information security licenses (such as CISSP, CEH, ISO27001 LA, etc.). Many employees have already obtained licenses.
- (e) Regular internal information security audits: the Company's employees in charge of audit conduct regular internal information security audits to identify deficiencies and rectify them.
- (f) Information security incident reporting: the Company has established a comprehensive information security incident reporting system. In addition, there are many professional information security consultants who can immediately deal with the incident, analyze the incident and perform risk control and implement subsequent improvements to improve the overall security.

4. Resources invested in cyber security management

- (a) Information security: in order to ensure the promotion of the Company's information security management matters, an "Information Security Management Promotion Team" was established to coordinate the Company's internal resources for the promotion of information security policies and management measures, and information security management meetings were held regularly.
- (b) Information security certification: the Company commissioned a third-party organization (NII) to provide guidance and obtained ISO 27001 certification in 2020 after on-site audit. In 2021 and 2022, we continued to obtain ISO27001 certification through the annual review by SGS. Expiring on June 28, 2023, a re-certification has been arranged.
- (c) Information security protection: based on our sales experience and the suggestions of the Company's information security consultants, the Company has deployed multi-layer information security protection equipment, including NG Firewall, Web Application Firewall, email security protection system Email Protection, Network Access Control (NAC), Endpoint Detection and Response and Security Information and Event Management System (SIEM). VDI was set-up to response to employees working from home (WFH) by which the Company's system applications can be accessed after two-stage authentication.

- (d) Information security professional manpower: apart from selling information security solutions from major global information security vendors, we also have information security consultants responsible for providing various information security services. There are currently 20 consultants with many information security professional and individual licenses, including CISSP, CSSLP, CISM, CEH, CHFI, ISO27001 LA. The company also encourages employees to participate in various information security seminars and information security courses to improve information security capabilities and obtain professional licenses.
  - (e) Information security technology exchange: as the Company sells information security solutions from major information security manufacturers in the world, the Company can access the latest information security technology information, including the latest security weaknesses, attack methods, and information security information. Enhancing the information security expertise of employees through technology exchange.
  - (f) Information security education and training: the Company conducts "Internal Cyber Security Education and Training" on a regular basis every year.
- (II) Losses due to major cyber security incidents, possible impacts, and countermeasures in the most recent year and up til the publication date of the annual report: None.

VII. Material contracts: None.

## Six. Financial Overview

### I. Condensed Balance Sheet and Statement of Comprehensive Income for the most recent 5 years (I-1) Consolidated Condensed Balance Sheet

Unit: NTD thousand

| Item  | Year                | Financial Information for the most recent 5 years (Note 1) |           |           |           |                       | Financial information for the current fiscal year as of March 31, 2023 (Note 3) |

|                                | Return on Equity (%)                                | 15.64   | 16.42  | 17.69  | 21.82  | 23.93  | 7.27  |
|                                | Net profit before tax to Paid-in Capital Ratio (%)  | 49.73   | 53.56  | 56.46  | 75.06  | 85.49  | 24.18   |
|                                | Net profit rate (%)                                 | 8.70  | 8.09   | 8.98   | 9.70   | 10.93  | 12.32   |
|                                | Earnings Per Share (NTD)                            | 3.80  | 4.20   | 4.68   | 6.00   | 6.91   | 1.99  |
| Cash flow                      | Cash Flow Ratio (%)                                 | 6.48  | 26.28  | 15.81  | 21.05  | 20.63  | 2.55  |
|                                | Cash Flow Adequacy Ratio (%)                        | 58.12   | 89.00  | 61.65  | 60.34  | 55.97  | 75.71   |
|                                | Cash Flow Reinvestment Ratio (%)                    | (4.76)  | 7.57   | (1.00) | 3.29   | 2.36   | 3.34  |
| Leverage                       | Operating Leverage                                  | 1.08  | 1.08   | 1.08   | 1.06   | 1.05   | 1.04  |
|                                | Financial Leverage                                  | 1.00  | 1.00   | 1.00   | 1.00   | 1.00   | 1.00  |

Reasons for more than 20% change in financial ratios in the most recent 2 years:

1. Cash flow ratio (standalone financial statements): This is mainly due to the net cash flow from operating activities in 2022 is higher than that in 2021, resulting in the increase in 2021 cash flow ratio compared to 2021.
2. Cash flow reinvestment ratio (consolidated and standalone financial statements): this is mainly due to the net cash inflow from operating activities in 2022 is higher than that in 2021, resulting in the increase in 2022 cash flow reinvestment ratio compared to 2021.

(Note 1): The financial information for the most recent 5 years has been audited and verified by an independent auditor.

(Note 2): The financial information for the year ended December 31, 2022 was audited and verified by CPAs Hsu, Hsin-Min and Cheng, Ching-Piao of Ernst & Young, and have issued an unqualified opinion independent auditors' report. The financial information for March 31, 2023 was reviewed by CPAs Hsu, Hsin-Min and Cheng, Ching-Piao of Ernst & Young, and have issued a qualified opinion review report.

(Note 3): Please refer to pages 206-208 for the formulas for the above ratios.

## (I-2) Standalone Financial Analysis

| Analysis item                  |   | Standalone financial Information for the most recent 5 years<br>(Note 1) |        |        |        |        |

|                                | Cash Flow Reinvestment Ratio (%)                    | 2.78   | 4.25   | (4.60) | (1.35) | 1.98   |
| Leverage                       | Operating Leverage                                  | 1.10   | 1.11   | 1.09   | 1.08   | 1.06   |
|                                | Financial Leverage                                  | 1.00   | 1.00   | 1.00   | 1.00   | 1.00   |

(Note 1): The financial information for the most recent 5 years has been audited and verified by an independent auditor.

(Note 2): The financial information for the year ended December 31, 2022 was audited and verified by CPAs Hsu, Hsin-Min and Cheng, Ching-Piao of Ernst & Young, and have issued an unqualified opinion independent auditors' report. The financial information for March 31, 2023 was reviewed by CPAs Hsu, Hsin-Min and Cheng, Ching-Piao of Ernst & Young, and have issued a qualified opinion review report.

(Note 3): The formulas for the above ratios are as follows:

1. Financial structure

(1) Debt Ratio = Total Liabilities / Total Assets

(2) Long-term Fund to Property, Plant and Equipment Ratio = (Shareholders' Equity + Noncurrent Liabilities) / Net Property, Plant and Equipment

2. Liquidity Analysis

(1) Current Ratio = Current Assets / Current Liabilities

(2) Quick Ratio = (Current Assets - Inventories - Prepaid Expenses) / Current Liabilities

(3) Times Interest Earned = Earnings before Interest and Taxes / Interest Expenses

3. Operating Performance Analysis
    - (1) Average receivables turnover = Net Sales / Average Trade Receivables (including Accounts Receivable and Notes Receivable originated from operation)
    - (2) Days Sales Outstanding = 365 / Average Receivables Turnover
    - (3) Average Inventories Turnover = Cost of Sales / Average Inventories
    - (4) Average Payment Turnover = Cost of Sales / Average Trade Payables (including Accounts Payable and Notes Payable originated from operation).
    - (5) Average Inventories Turnover Days = 365 / Average Inventories Turnover
    - (6) Property, Plant and Equipment Turnover = Net Sales / Average Net Property, Plant and Equipment
    - (7) Total Assets Turnover = Net Sales / Average Total Assets
  4. Profitability
    - (1) Return on Total Assets = (Net Income + Interest Expenses \* (1 - Effective Tax Rate)) / Average Total Assets
    - (2) Return on Equity = Net Income / Average Equity
    - (3) Net Margin = Net Income / Net Sales
    - (4) Earnings Per Share = (Net Income Attributable to Shareholders of the Parent - Preferred Stock Dividend) / Weighted Average Number of Shares Outstanding (Note 4)
  5. Cash flow
    - (1) Cash Flow Ratio = Net Cash Provided by Operating Activities / Current Liabilities
    - (2) Cash Flow Adequacy Ratio = Five-year Sum of Cash from Operations / Five-year Sum of Capital Expenditures, Inventories Additions, and Cash Dividend
    - (3) Cash Flow Reinvestment Ratio = (Cash Provided by Operating Activities - Cash Dividends) / (Gross Property, Plant and Equipment + Long-term Investments + Other Noncurrent Assets + Working Capital) (Note 5)
  6. Leverage:
    - (1) Operating Leverage = (Net Sales - Variable Cost and Expenses) / Income from Operations (Note 6)
    - (2) Financial Leverage = Income from Operations / (Income from Operations - Interest Expenses)
- (Note 4): The calculation formula for the above earnings per share, one shall pay special attention to the listed matters below when measuring:
1. Based on weighted average number of ordinary shares, and not based on the number of issued shares at the end of the year.
  2. Those with cash capital increase or treasury shares transactions, shall consider its circulation period to calculate the weighted average number of shares.
  3. Those with capitalization of retained earnings or increased capital from capital surplus, when calculating the earnings per share for the past years and half a year, shall make retroactive adjustments based on the proportion for capital increase. It is not necessary to consider the issuance period of the capital increase.
  4. If preferred shares are cumulative preferred shares that are not transferrable, the dividends for the year (regardless of whether it has been distributed) shall be deducted from the net income after tax, or increase the net loss after tax. If the preferred shares are of non-cumulative nature, when there is net income after tax, preferred shares dividends shall be deducted from the net income after tax; if there are losses, then it is not necessary for the adjustments.
- (Note 5): When measuring cash flow analysis, shall pay special attention to the following matters:
1. Net cash flow of business activities refers to the net cash inflow from business activities in the statements of cash flow.
  2. Capital expenditures refers to the cash outflow of the capital investment each year.
  3. Inventory additions are calculated only when the end of year balance is larger than balance at beginning of the period. If the inventories are lesser at the end of the year, it is then calculated by using zero.
  4. Cash dividend includes cash dividend of ordinary shares and special shares.

5. Gross property, plant and equipment refers to the total of property, plant and equipment before deduction of accumulating depreciation.
- (Note 6): Issuer shall differentiate every business cost and expenses based on its nature as fixed and variable. If it involves estimation or subjective judgements, shall take note of its reasonableness and maintain consistency.
- (Note 7): If the stock of a company has no par value or a par value other than NT\$ 10, the aforesaid calculation of percentage to paid-in capital, shall change to using the equity percentage attributable to shareholders of the parent in the balance sheet for calculation.

III. Audit Committee's review report for the financial report in the most recent year

## 2022 Audit Committee Review Report

### Audit Committee Review Report

The Board has prepared the Company's 2022 Business Report, Financial Statements, and Earnings Distribution Plan. The Financial Statements have been audited and certified by CPA Hsu, Hsin-Min and Cheng, Ching-Piao of Ernst & Young issuing the Independent Auditors' Report. We have reviewed the above Business Report, Financial Statements, and Earnings Distribution Plan and find that they are consistent with relevant laws and regulations of the Company Act, so we have issued a report as above in accordance with the Securities and Exchange Act and the Company Act. Please proceed to review it.

To:

Stark Technology Inc. 2023 General Shareholders Meeting

Convener of the Audit Committee: Lu, Jui-Wen

February 23, 2023

#### IV. The CPA audited consolidated financial statements for the most recent year

##### Declaration

Affiliated enterprises subject to the preparation of combined financial statements under the Criteria Governing Preparation of Affiliation Reports, Consolidated Business Reports and Consolidated Financial Statements of Affiliated Enterprises were identical to the affiliated companies subject to the preparation of consolidated financial statements under the International Financial Reporting Standards (IFRS) 10 for the year 2022 (from January 1 to December 31, 2022). All mandatory disclosures of the combined financial statements have been disclosed in the consolidated financial statements; therefore, no separate set of combined financial statements were prepared.

Hereby declare

Stark Technology Inc.

Chairman: Liang, Hsiu-Chung

February 23, 2023

Stark Technology Inc. and Subsidiaries  
Independent Auditors' Report

To stakeholders of Stark Technology Inc.:

## **Opinion**

We have audited the consolidated balance sheet of Stark Technology Inc. and subsidiaries as at December 31, 2022 and 2021, and the consolidated statement of comprehensive income, consolidated statement of changes in equity, consolidated statement of cash flow, and the accompanying footnotes (including summary of key accounting policies) for the periods January 1 to December 31, 2022 and 2021.

We found that none of the material disclosures of the consolidated financial statements mentioned above exhibited any misstatement that did not conform with Regulations Governing the Preparation of Financial Reports by Securities Issuers and the version of IFRS, IAS, IFRIC and interpretations thereof approved and effected by the Financial Supervisory Commission, or compromised the fair view of the consolidated financial position of Stark Technology Inc. and subsidiaries as at December 31, 2022 and 2021, or the consolidated financial performance or consolidated cash flow for the periods January 1 to December 31, 2022 and 2021.

## **Basis for Opinion**

We conducted our audits in accordance with Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the auditing principles. Our responsibilities as an auditor under the abovementioned standards are explained in the Responsibilities paragraph. All relevant personnel of the accounting firm have followed CPA code of ethics and maintained independence from Stark Technology Inc. and subsidiaries when performing their duties. We believe that the evidence obtained provide an adequate and appropriate basis for our opinion.

## **Key Audit Matters**

Key audit matters are matters that we considered to be the most important, based on professional judgment, when auditing the 2022 consolidated financial statements of Stark Technology Inc. and subsidiaries. These issues have already been addressed when we audited and formed our opinions on the consolidated financial statements. Therefore, we do not provide opinions separately for individual matters.

## Recognition of service income

Stark Technology Inc. and subsidiaries reported NT\$2,155,573 thousand of service income in 2022, representing 32% of total operating revenues and is considered material to the consolidated financial statements. This income is mostly the result of consultation and maintenance services rendered, and given the complexity of contract terms, income is recognized based on the extent of service rendered over the contract tenor. It is therefore necessary to exercise judgment over the scope of performance obligations and the timing of fulfillment, and we consider the amount of income recognized and the recognition approach taken to be key audit issues. Audit procedures that we have taken for the key audit issue mentioned above included (but were not limited to): evaluating the appropriateness of accounting policy on service income recognition, testing the effectiveness of the internal control system that the management has created for recognizing service income, analyzing gross profit margin by service category, executing transaction detail tests including sample examination of service contracts and invoices, and identifying performance obligations, cost-sharing arrangements, and timing of fulfillment for the contracts involved. These actions enabled us to determine whether transactions were recognized at the correct timing. We also reviewed the appropriateness of revenue disclosure mentioned in Notes (IV) and (VI) of the consolidated financial statements.

## **Responsibilities of the Management and Those Charged with Governance for the Consolidated Financial Statements**

Responsibilities of the management were to prepare and ensure fair presentation of consolidated financial statements in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and the version of IFRS, IAS, IFRIC and interpretations thereof approved and effected by the Financial Supervisory Commission, and to exercise proper internal control practices that are relevant to the preparation of consolidated financial statements so that the consolidated financial statements are free of material misstatements, whether caused by fraud or error.

The management's responsibilities when preparing consolidated financial statements also involved: assessing the ability of Stark Technology Inc. and subsidiaries to operate, disclose information, and account for transactions as a going concern unless the management intends to liquidate or cease business operations, or is compelled to do so with no alternative solution.

The governance body of Stark Technology Inc. and subsidiaries (including the Audit Committee) is responsible for supervising the financial reporting process.

## **Auditors' Responsibilities for the Audit of Consolidated Financial Statements**

The purposes of our audit were to obtain reasonable assurance of whether the consolidated financial statements were prone to material misstatements, whether caused by fraud or error, and to issue a report of our audit opinions. We considered assurance to be reasonable only if it is highly credible. However, audit tasks conducted in accordance with auditing principles do not necessarily guarantee detection of all material misstatements within the consolidated financial statements. Misstatements can arise from fraud or error. Misstatements are considered material if the individual amount or aggregate total is reasonably expected to affect economic decisions of the financial statement user.

When conducting audits in accordance with auditing principles, we exercised judgments and raised doubts as deemed professionally appropriate. We also performed the following tasks as an auditor:

1. Identifying and assessing risks of material misstatement within the consolidated financial statements that are attributed to fraud or error; designing and executing appropriate response measures for the identified risks; and obtaining adequate and appropriate audit evidence to support audit opinions. Fraud may involve conspiracy, forgery, intentional omission, untruthful declaration, or breach of internal control, and our audit did not find any material misstatement where the risk of fraud is greater than the risk of error.
2. Obtaining necessary understanding on relevant internal controls and designing audit procedures that are appropriate under the prevailing circumstances, but without providing opinion on the effectiveness of internal control system of Stark Technology Inc. and subsidiaries.
3. Assessing the appropriateness of accounting policies adopted by the management, and the rationality of accounting estimates and related disclosures made.
4. Forming conclusions regarding the appropriateness of management's decision to account for the business as a going concern, and whether there are doubts or uncertainties about the ability of Stark Technology Inc. and subsidiaries to operate as a going concern, based on the audit evidence obtained. We are bound to remind consolidated financial statement users and make related disclosures if material uncertainties exist in regards to the aforementioned events or circumstances, and amend audit opinions when the disclosures are no longer appropriate. Our conclusions are based on the audit evidence obtained up to the date of audit report. However, future events or change of circumstances may still render Stark Technology Inc. and subsidiaries no longer capable of operating as a going concern.
5. Assessing the overall presentation, structure, and contents of the consolidated financial statements (including related footnotes), and whether certain transactions and events are presented appropriately in the financial statements.
6. Obtaining sufficient and appropriate audit evidence on financial information of entities within the group, and expressing opinions on consolidated financial statements. Our responsibilities as auditor are to instruct, supervise, and execute audits and form audit opinions on the group.

We have communicated with the governance body about the scope, timing, and significant findings (including significant defects identified in internal control) of our audit.

We have also provided the governance body with a declaration of independence stating that all relevant personnel of the accounting firm have complied with CPA code of ethics, and communicated with the governance body on all matters that may affect the auditor's independence (including protection measures).

We have identified the key audit matters after communicating with the governance body regarding the 2022 consolidated financial statements of Stark Technology Inc. and subsidiaries. These issues have been addressed in our audit report except for: 1. Certain topics that are prohibited by law from disclosing to the public; or 2. Under extreme circumstances, topics that we decide not to communicate in the audit report because of higher negative impacts they may cause than the benefits they bring to public interest.

## Others

Stark Technology Inc. has prepared parent company only financial statements for the years ended December 31, 2022 and 2021, to which we issued an independent auditors' report with unqualified opinion.

(Please refer to notes to consolidated financial statements)

Chairman: Liang, Hsiu-Chung

Manager: Liang, Hsiu-Chung

Head of Accounting: Huang, I-Tzu

Stark Technology Inc. and Subsidiaries  
Notes to Consolidated Financial Statements  
For the Years Ended December 31, 2022 and 2021  
(All amounts in NTD thousands unless otherwise specified)

(I). Organization and Operations

Stark Technology Inc. (the "Company") was incorporated on March 24, 1993. Its main business activities include distribution and maintenance of computers and peripherals; research, design, development, and sale of computer software/hardware, computer system design, and import/export trade for the Company's own products.

Shares of the Company have been listed for trading on "Taiwan Stock Exchange Corporation" since September 2001. The Company's place of registration and main business location is 12F-1, No. 83, Section 2, Dongda Road, Hsinchu City.

(II). Financial Statement Approval Date and Procedures

Consolidated financial statements of the Company and subsidiaries (collectively referred to as the "Group") for the years ended December 31, 2022 and 2021 were approved by the board of directors on February 23, 2023.

(III). Application of new standards, amendments, and interpretations

1. Change of accounting policy resulting from first-time adoption of International Financial Reporting Standards (IFRS)

The Group has adopted the version of IFRS, IAS, IFRIC and interpretations thereof that approved and effected by Financial Supervisory Commission (FSC) for accounting periods on and after January 1, 2022. First-time adoption of the new standards and amendments has had no material impact on the Group.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

2. The Group has not adopted the following IASB-announced and FSC-approved new standards, amendments, guidance, and interpretation as of the release date of the financial reports:

| Item No. | New Standards, Interpretations and Amendments   | Effective Date by International Accounting Standards Board |
|----------|---|--|
| 1        | Amendments to IAS 1 - "Disclosure of Accounting Policies"   | January 1, 2023  |
| 2        | Amendments to IAS 8 - "Definition of Accounting Estimates"  | January 1, 2023  |
| 3        | Amendments to IAS 12 - "Deferred Tax Related to Assets and Liabilities Arising from A Single Transaction" | January 1, 2023  |

(1) Amendments to IAS 1 - "Disclosure of Accounting Policies"

This amendment aims to improve disclosure of accounting policies to provide investors and other primary users of financial statements with more useful information.

(2) Amendments to IAS 8 - "Definition of Accounting Estimates"

This amendment directly defines accounting estimates and makes other amendments to International Accounting Standard 8 "Accounting Policies, Changes in Accounting Estimates and Errors" to assist entities in distinguishing between changes in accounting policies and changes in accounting estimates.

(3) Amendments to IAS 12 - "Deferred Tax Related to Assets and Liabilities Arising from A Single Transaction"

This amendment restricts the scope of exempting recognition of deferred tax in paragraphs 15 and 24 of International Accounting Standard 12 "Income Taxes," so that the exemption does not apply to transactions that generate taxable and deductible temporary differences of the same amount at the time of initial recognition.

All above are the newly issued, revised and amended standards or interpretations that have been issued by the International Accounting Standards Board, approved by the Financial Supervisory Commission and applicable for fiscal years after January 1, 2023. They have no significant impact on the Group.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

3. As of the publication date of financial statements, the Group had not adopted the following IASB-announced new standards, amendments, guidance, and interpretation that were not approved by FSC:

| Item No. | New Standards, Interpretations and Amendments   | Effective Date by International Accounting Standards Board   |
|----------|---|--|
| 1        | Amendments to IFRS 10 - "Consolidated Financial Statements" and IAS 28 - "Investments in Associates and Joint Ventures" regarding "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture" | To be determined by International Accounting Standards Board |
| 2        | IFRS 17, "Insurance Contracts"  | January 1, 2023  |
| 3        | Amendments to IAS 1 - "Classification of Liabilities as Current or Non-current"   | January 1, 2024  |
| 4        | Amendments to IFRS 16 - "Lease Liability in a Sale and Leaseback"   | January 1, 2024  |
| 5        | Amendments to IAS 1 - "Non-Current Liabilities in Contracts"  | January 1, 2024  |

- (1) Amendments to IFRS 10 - "Consolidated Financial Statements" and IAS 28 - "Investments in Associates and Joint Ventures" regarding "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture"

This amendment is intended to address the inconsistent treatments between IFRS 10 - "Consolidated Financial Statements" and IAS 28 - "Investments in Associates and Joint Ventures" in cases where a company loses control in a subsidiary when ownership of that subsidiary is offered as consideration for investing into an associated company or joint venture. IAS 28 states that, when a company contributes non-monetary asset in exchange for equity interest in an associated company or joint venture, the transaction shall be treated as a downstream transaction and any share of gains or losses that arises as a result is eliminated. IFRS 10, however, requires the entirety of gains or losses to be recognized when a company loses control in a subsidiary. This amendment limits the IAS 28 treatment mentioned above, and requires all gains or losses to be recognized when the assets sold or contributed constitute a business defined under IFRS 3.

Meanwhile, IFRS 10 was amended so that, when an investor sells or contributes a subsidiary that does not constitute a business defined under IFRS 3 with its associated company or joint venture, gains or losses that arise as a result shall be recognized only for the share that is not attributed to the investor.

(2) IFRS 17, "Insurance Contracts"

This standard provides a comprehensive model for the treatment of insurance contracts, including accounting practices (from recognition, measurement, presentation to disclosure). The standard uses a general model at its core, and under this model, a group of insurance contracts shall be recognized at initiation as the sum of fulfillment cash flows and contractual service margin; thereafter, book value for the group of insurance contracts shall be presented as the sum of liability for remaining coverage and liability for incurred claims as at each balance sheet date.

In addition to the general model, the standard also introduces treatment for insurance contract with direct participation features (the Variable Fee Approach) and simplified approach for short-term contracts (the Premium Allocation Approach).

This standard was first published in May 2017 and later amended in 2020 and 2021, which postponed the effective date stated in the transition clause by 2 years (from January 1, 2021 to January 1, 2023), introduced additional exemptions, and reduced cost of adoption through the simplified approach. The amendment also made some circumstances easier to interpret. This standard will supersede the transitional standard (i.e. IFRS 4 - "Insurance Contracts") once effected

(3) Amendments to IAS 1 - "Classification of Liabilities as Current or Non-current"

This amendment concerns the classification of liabilities between current and non-current, as stated in paragraphs 69-76 of IAS 1 - "Presentation of Financial Statements."

(4) Amendments to IFRS 16 - "Lease Liability in a Sale and Leaseback"

This amendment for IFRS 16 Leases is intended to ensure the consistency of application of the standard by adding subsequent measurement requirements for a seller-lessee in a sale and leaseback transactions.

(5) Amendments to IAS 1 - "Non-Current Liabilities in Contracts"

This amendment aims to enhance the information provided by the entity regarding long-term debt contracts. The disclosure of contractual obligations that are required to be met within twelve months after the reporting period does not affect the classification of such liabilities as current or non-current at the end of the reporting

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)  
(All amounts in NTD thousands unless otherwise specified)  
period.

All above standards and interpretations announced by IASB but not yet approved by FSC shall become effective on dates announced by FSC. The Group is currently evaluating the potential impacts of newly announced/amended standards and interpretations listed in (1), and is unable to provide reasonable estimate of how the above standards or interpretations may affect the Group. Aside from the above, other newly announced/amended standards and interpretations have no material impact on the Group.

(IV). Summary of Significant Accounting Policies

1. Compliance statement

The consolidated financial statements of the Group for the years ended December 31, 2022 and 2021 have been prepared in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers and the version of IFRS, IAS, IFRIC and interpretations thereof approved and effected by the FSC.

2. Basis of Preparation

The consolidated financial statements have been prepared based on historical cost, except for financial instruments carried at fair value. Unless otherwise specified, all amounts in the consolidated financial statements are presented in NTD thousands.

3. Consolidation overview

Basis of preparation for consolidated financial statements

The Company is considered to exercise control if it is exposed or entitled to variable returns generated by an investee and has the power to influence such return through control over the investee. Specifically, the Company considers itself to exercise control over an investee when all three conditions below are satisfied:

- (1) Power over the investee (i.e. existing rights that give the current ability to direct the relevant activities of the investee)
- (2) Exposure or entitlement to variable returns due to involvement in the investee's operation, and
- (3) Ability to influence returns by exercising authority over the investee

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

If the Company directly or indirectly holds less-than-majority voting rights (or rights of similar nature) in an investee, the Group would evaluate whether it has power over the investee after taking into consideration all relevant facts and circumstances, including:

- (1) Agreement with other voting right holders in the investee
- (2) Power given rise through other agreement
- (3) Voting rights and potential voting rights

When facts or circumstances indicate change in one or several of the three control elements above, the Company would immediately evaluate whether it still exercises control over the investee.

A subsidiary is consolidated into the consolidated financial statements from the day of acquisition (i.e., the day the Company gains control), until the day control is lost on the subsidiary. All subsidiaries adopt accounting periods and accounting policies that align with those of the parent company. All intra-group account balances, transactions, dividends, and unrealized gains or losses on intra-group transactions are eliminated upon consolidation.

Changes in shareholding of subsidiary without losing control are treated as equity transactions.

Total comprehensive income produced by subsidiaries is divided into amounts that are attributable to owners of the Company and amounts that are attributable to non-controlling shareholders, even if the allocation would put non-controlling equity in negative balance.

When the Company loses control in a subsidiary

- (1) All assets (including goodwill) and liabilities of the subsidiary are removed;
- (2) Book value of any non-controlling equity is removed;
- (3) Fair value of consideration received is recognized;
- (4) Fair value of any investment retained is recognized;
- (5) Any gains or losses are recognized in current profit or loss;
- (6) Amounts previously recognized by the parent company as other comprehensive income are reclassified into current profit or loss;

This consolidated financial statement encompasses the following:

4. Foreign currency transactions

The Group's consolidated financial statements are presented in the Company's functional currency (NTD). Each entity within the Group determines its own functional currency, and prepares financial statements using their respective functional currencies.

## Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

Foreign currency transactions by entities of the Group are converted into the functional currency using exchange rates as of the date of transaction. Foreign currency monetary items are converted using closing exchange rate at the end of each reporting period. Foreign currency-denominated non-monetary items measured at fair value are converted using exchange rate as of the valuation date. Foreign currency-denominated non-monetary items carried at historical cost are converted using exchange rate as of the initial transaction date.

Exchange differences arising from settlement or translation of monetary accounts are recognized in profit and loss in the period occurred, except in the following circumstances.

- (1) For foreign currency loans that are undertaken for the purpose of acquiring a qualifying asset, the exchange difference would form part of the borrowing cost if it is treated as an adjustment to interest cost, and capitalized into the cost of the asset.
- (2) Foreign currency items subject to IFRS 9 - "Financial Instruments" are treated using accounting policy on financial instruments.
- (3) For monetary items that make up a part of the reporting entity's net investments in foreign operation, exchange difference is recognized as other comprehensive income at initiation, and subsequently reclassified from equity into profit or loss upon disposal of net investments.

Non-monetary accounts that have gains and losses recognized as other comprehensive income shall also have any exchange component of that gain or loss recognized as other comprehensive income. Non-monetary accounts that have gains and losses recognized in profit and loss shall also have any exchange component of that gain or loss recognized in profit and loss.

### 5. Translation of foreign currency financial statements

When preparing consolidated financial statements, assets and liabilities of foreign operations are converted into NTD using closing exchange rate as at the balance sheet date, whereas income, expenses, and losses are converted using average exchange rate for the current period. Exchange differences arising from financial statement translation are recognized as other comprehensive income; upon disposal of foreign operations, exchange differences previously recognized as other comprehensive income and accumulated under equity from the separate parts are reclassified from equity to profit or loss when recognizing gain/loss on disposal. In a partial disposal of subsidiary containing foreign operation that results in a loss of control, and partial disposal of equity in an associated company or joint agreement containing foreign operation, the disposal treatment shall also

(All amounts in NTD thousands unless otherwise specified)

apply if the remaining equity can be regarded as a financial asset containing foreign operation.

In a partial disposal of subsidiary containing foreign operation that does not result in a loss of control, cumulative exchange differences previously recognized in other comprehensive income are re-attributed to non-controlling equity of such foreign operation, instead of being recognized in profit or loss. In a partial disposal of associated company or joint agreement containing foreign operation where significant influence or joint control is not lost, cumulative exchange differences are reclassified into profit or loss proportionally.

Goodwill arising from acquisition of foreign operations and fair value adjustments to the book value of assets and liabilities are accounted as assets and liabilities of the respective foreign operations, and presented in the functional currency.

6. Classification of current and non-current assets and liabilities

Assets that satisfy any of the following criteria are classified as current assets; assets that are not classified as current are classified as non-current assets:

- (1) Assets that are expected to be realized, or intended to be sold or consumed, in the Group's normal operating cycle.
- (2) Assets that are held mainly for the purpose of trading.
- (3) Assets that are expected to be realized within 12 months after the end of the reporting period.
- (4) Cash or cash equivalents, except those are restricted from being swapped or used to repay liabilities beyond 12 months after the end of the reporting period, and those with restricted uses.

Liabilities that satisfy any of the following criteria are classified as current liabilities; liabilities that are not classified as current are classified as non-current liabilities:

- (1) Liabilities that are expected to be repaid in the Group's normal business cycle.
- (2) Liabilities that are held mainly for the purpose of trading.
- (3) Liabilities that are expected to be repaid within 12 months after the end of the reporting period.
- (4) Liabilities where the repayment terms cannot be unconditionally beyond 12 months after the end of the reporting period. Liabilities with terms that give counterparties the option to be repaid by the issue of equity instruments do not affect their classification.

7. Cash and cash equivalents

Cash and cash equivalent refer to cash on hand, demand deposit, and short-term and highly liquid time deposits or investments (including time deposits with terms equal to or less than 12 months) that are readily convertible into known amounts of cash, and are subject to an insignificant risk of changes in value.

8. Financial instruments

Financial assets and financial liabilities are recognized when the Group becomes a party to a financial instrument contract.

Financial assets and liabilities subject to IFRS 9 - "Financial Instruments" are measured at fair value at initiation. Transaction costs that are directly attributable to the acquisition or issuance of financial assets and liabilities (except for financial assets and liabilities at fair value through profit or loss) are added to or deducted from the fair value of the respective asset/liability.

(1) Recognition and measurement of financial assets

Regular transactions of financial asset are recognized and derecognized using trade date accounting.

The Group classifies financial assets into those that are carried at amortized cost, at fair value through other comprehensive income, and at fair value through profit or loss based on the two considerations below:

- A. Business model for managing the financial assets
- B. Characteristics of contractual cash flow for the financial assets

Financial assets at amortized costs

Financial assets that simultaneously satisfy the two conditions below are carried at amortized cost and presented on balance sheet as notes receivable, accounts receivable, installment accounts receivable, long-term installment accounts receivable, and other receivables:

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

- A. Business model for managing the financial assets: financial asset is held for the purpose of collecting contractual cash flow
- B. Characteristics of contractual cash flow for the financial assets: cash flow is solely used to pay principal and interests on outstanding principal

These financial assets (excluding those that are associated with hedge) are subsequently carried at amortized cost {i.e., the initial amount less principals repaid, plus/less cumulative amortization of differences between the initial amount and the maturity amount (calculated using the effective interest method), and adjusted for loss provisions}. Upon derecognition, amortization, or recognition of impairment gains/losses, the gains or losses are recognized in profit or loss.

Interests calculated using the effective interest method (i.e., by multiplying the book value of financial asset with effective interest rate) or under the following circumstances are recognized in profit or loss:

- A. Purchased or originated credit-impaired financial assets, where interest is calculated by multiplying the cost of financial assets after amortization with credit-adjusted effective interest rate.
- B. Subsequent impairment of financial asset that does not meet the above description, where interest is calculated by multiplying the cost of financial assets after amortization with effective interest rate.

Financial assets at fair value through other comprehensive income

Financial assets that simultaneously satisfy the two criteria below are measured at fair value through other comprehensive income, and presented on the balance sheet as financial assets at fair value through other comprehensive income.

- A. Business model for managing the financial assets: financial asset is held for collecting contractual cash flow and sale
- B. Characteristics of contractual cash flow for the financial assets: cash flow is solely used to pay principal and interests on outstanding principal

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

Gains and losses associated with this type of financial assets are recognized in the following manner:

- A. Prior to derecognition or reclassification, gains and losses are recognized in other comprehensive income, except for impairment gains/losses and foreign exchange gains/losses, which are recognized in profit or loss
- B. Upon derecognition, all cumulative gains/losses previously recognized in other comprehensive income are reclassified from equity to profit or loss and treated as a reclassification adjustment
- C. Interests calculated using the effective interest method (i.e., by multiplying the book value of financial asset with effective interest rate) or under the following circumstances are recognized in profit or loss:
  - (a) Purchased or originated credit-impaired financial assets, where interest is calculated by multiplying the cost of financial assets after amortization with credit-adjusted effective interest rate.
  - (b) Subsequent impairment of financial asset that does not meet the above description, where interest is calculated by multiplying the cost of financial assets after amortization with effective interest rate.

For equity instruments that are subject to IFRS 9 but are neither held for trading nor recognized as acquirer's contingent consideration under IFRS 3 - Business Combinations, a (irrevocable) choice can be made at initial recognition to account for subsequent fair value changes in other comprehensive income. Amounts presented in other comprehensive income cannot be subsequently reclassified into profit or loss (upon disposal of the equity instrument, amounts previously accumulated under other equity item are reclassified directly into retained earnings); these instruments are presented on balance sheet as financial assets at fair value through other comprehensive income. Dividends from investments are recognized in profit or loss, unless the dividends clearly represent a partial recovery of the investment cost.

Financial assets at fair value through profit or loss

With the exception of financial assets that are carried at amortized cost or measured at fair value through other comprehensive income for satisfying the special criteria mentioned above, all other financial assets are measured at fair value through profit or loss, and presented on balance sheet at fair value through profit or loss.

(All amounts in NTD thousands unless otherwise specified)

This category of financial assets is measured at fair value. Gains or losses arising from remeasurement are recognized in profit or loss. The amount of gains and losses recognized in profit or loss includes all dividends or interests collected on the financial asset.

(2) Impairment of financial assets

The Group recognizes and measures the loss provisions for debt instrument investments held at fair value through other comprehensive income and financial assets carried at amortized cost at an amount equal to expected credit loss. Loss provisions on debt instrument investments held at fair value in other comprehensive income are recognized through other comprehensive income and do not reduce the book value of investment.

The Group measures expected credit losses after taking into account of the following:

- A. An unbiased and probability-weighted amount determined after assessing the possible outcomes
- B. Time value of monetary
- C. Rational and verifiable information about past event, current situation, and future economic forecast (that can be obtained on the balance sheet date without incurring excessive cost or input)

Loss provisions are measured using the methods explained below:

- A. At an amount equal to 12-month expected credit loss: applies to financial assets that exhibit no significant increase in credit risk since initial recognition, or those that are considered to be of low credit risk as at the balance sheet date. This method also applies to accounts that had loss provisions measured based on lifetime expected credit losses in the previous reporting period, but no longer meets the condition of having exhibited significant increase in credit risk since initial recognition as at the current balance sheet date.
- B. At an amount equal to lifetime expected credit losses: applies to financial assets that exhibit significant increase in credit risk since initial recognition, or purchase or originated credit-impaired financial assets.
- C. For accounts receivable or contract assets that arise from the transactions defined in IFRS 15, the Group measures loss provisions at an amount equal to lifetime expected credit losses.
- D. For lease receivable that arises from the transactions defined in IFRS 16, the Group

(All amounts in NTD thousands unless otherwise specified)

measures loss provisions at an amount equal to lifetime expected credit losses.

On each balance sheet date, the Group examines financial instruments for any change in default risk between the balance sheet date and the date of initial recognition, and in doing so evaluates whether there is significant increase in the credit risk of financial instrument since initial recognition. Please see Note (XII) for credit risk-related information.

(3) Derecognition of financial assets

Financial assets that satisfy any of the following criteria are derecognized:

- A. When contractual entitlement to receive cash flow from the asset has ended.
- B. When the financial asset has been transferred along with virtually all risks and returns associated with the ownership of the asset.
- C. When control of the asset has been transferred, even if the Group does not transfer or retain virtually all risks and returns associated with the asset.

When a financial asset is derecognized, the difference between book value and the sum of consideration received/receivable plus any cumulative gains or losses previously recognized in other comprehensive income is recognized in profit or loss.

(4) Financial liabilities and equity instruments

Classification of liability and equity

Debt and equity instruments issued by the Group are classified into financial liabilities or equity based on the essence of the contract agreement and definitions of financial liabilities and equity instrument.

Equity instrument

Equity instrument refers to any contract that represents residual interests after the Group deducts all of its liabilities from its assets. Equity instruments issued by the Group are recognized at the amount of proceeds received net of direct issuing costs.

Financial liabilities

Financial liabilities subject to IFRS 9 are classified as financial liabilities at fair value

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

through profit or loss or financial liabilities at amortized cost at initiation.

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities that are held for trading and designated to be measured at fair value through profit or loss.

Financial liabilities are classified as held for trading if it satisfies any of the following criteria:

- A. Acquired mainly for the purpose of being sold in the short term.
- B. Having been recognized at initiation as part of a portfolio of identifiable financial instruments under collective management, and there is evidence to suggest that the portfolio is being traded for short-term profits; or
- C. Exhibits the characteristics of a derivative instrument (except for financial guarantee contracts or derivative instruments designated for effective hedge).

Contracts that contain one or multiple embedded derivative instruments can be designated as hybrid (combined) contracts, and presented as financial liabilities at fair value through profit or loss. These instruments are designated to be measured at fair value through profit or loss at initiation if more relevant information can be obtained in one of the following situations:

- A. Designation would eliminate or significantly reduce discrepancies arising from measurement or recognition; or
- B. A group of financial liabilities or a group of financial assets and liabilities that are managed and evaluated performance based on fair value, as per risk management guidelines or investment strategy that are in written form, and that information of the investment portfolio provided internally to the management of the Group is also based on fair value.

Gains and losses arising from remeasurement of this category of financial liabilities are recognized in profit or loss. The amount of gains and losses recognized in profit or loss includes all interests paid on the financial liability.

Financial liabilities at amortized costs

Financial liabilities at amortized costs include payables and loans, which are subsequently measured using the effective interest rate method after initial recognition. When financial liabilities are derecognized from balance sheet and when amortization

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

is provided using the effective interest rate method, the corresponding gains, losses, and amortizations are recognized in profit or loss.

Calculation of amortized costs takes into consideration discounts or premiums at the time of acquisition and transaction costs.

Derecognition of financial liabilities

Financial liabilities are derecognized from balance sheet when obligations have been relieved, canceled, or voided.

When the Group engages a creditor in a swap of debt instruments with significant discrepant terms, or makes significant modification to some or all terms of existing financial liability (whether due to financial distress or not), the effects are accounted by derecognizing the original liability and recognizing the new liability at the same time. When derecognizing financial liability, differences between the book value and the considerations paid/payable (including non-cash assets transferred or liabilities assumed) are recognized in profit or loss.

(5) Offset of financial assets and liabilities

Financial assets and financial liabilities may be offset against each other and reported in the balance sheet in net amount only when the entity is legally entitled to do so and has the intention to settle assets and liabilities in net amount or to realize the asset and settle the liability at the same time.

9. Fair value assessment

Fair value refers to the price that market participants are able to receive for selling an asset, or the price that has to be paid to transfer a liability, in an orderly transaction on the measurement date. Fair value assessment assumes that the asset/liability is sold/transferred in one of the following markets:

- (1) The principal market for the asset or liability; or
- (2) The most advantageous market for the asset or liability, if the principal market does not exist

The principal or most advantageous market must be one that the Group has access to and is able to transact in.

## Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

Common assumptions that market participants adopt for pricing assets or liabilities are used when assessing fair value of an asset or liability. These assumptions assume that market participants all act in their best economic interest.

Fair value assessment of non-financial assets takes into consideration market participants' intent to make the highest and best use of the asset, or their intent to sell the asset to another market participant that will make the highest and best use in order to generate economic benefits.

The Group assesses fair value by adopting valuation techniques that are appropriate for the given circumstance and for which data can be obtained, while maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

### 10. Inventories

Accounted at acquisition cost; the cost of inventory is calculated using the weighted average method. Inventory is subsequently measured at the lower of cost or net realizable value item by item. Net realizable value refers to the balance of estimated selling price less any costs required to sell inventory under normal circumstances. Allowance for losses on inventory devaluation and obsolescence is made for any inventory that is considered slow-moving or obsolete.

### 11. Property, plant and equipment

Property, plant and equipment are recognized at acquisition cost and presented net of accumulated depreciation and accumulated impairment. The abovementioned cost includes the cost of uninstalling, removing, and restoring property, plant and equipment at the given location, and any interest costs incurred on construction-in-progress. Significant compositions of property, plant, and equipment are depreciated separately. When making regular replacements for major component of property, plant, and equipment, the Group treats the replacement as a separate asset and recognizes depreciation based on the specified useful life and depreciation method. Book values of replaced assets are derecognized from balance sheet in accordance with IAS 16 - "Property, plant and equipment." Major repair costs that satisfy the recognition criteria are treated as replacement costs and recognized as part of the book value of property, plant and equipment. All other repair and maintenance expenditures are recognized in profit or loss.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

Depreciation is provided on a straight-line basis over the estimated useful lives mentioned below:

|                                  |   |
|----------------------------------|---|
| Buildings                        | 51-56 years                                   |
| Accessory equipment of buildings | 6 years                                       |
| Transportation equipment         | 6 years                                       |
| Office equipment                 | 4-6 years                                     |
| Right-of-use assets/lease assets | The lower between lease tenor and useful life |
| Lease improvements               | The lower between lease tenor and useful life |
| Other equipment                  | 2-6 years                                     |

The entity derecognizes property, plant and equipment or any of its major components from balance sheet and recognizes in profit or loss when it disposes the asset or expects no further inflow of economic benefits from utilization or disposal of the asset.

Residual value, useful life, and depreciation method of property, plant and equipment are evaluated at the end of each financial year. If the expected value differs from previous estimates, the difference is treated as a change in accounting estimate.

12. Lease

The Group evaluates whether a contract meets the criteria of (or contains) lease on the day of establishment. A contract is considered as (or contains) lease if it involves a transfer of control over identified assets for a period of time in exchange for consideration. To determine whether a contract transfers the right to control the use of an identified asset for a period of time, the Group evaluates whether the following two conditions are met throughout the entire period of use:

- (1) The user has the right to obtain substantially all of the economic benefits from using the identified asset; and
- (2) The user has the right to determine how identified asset is used.

(All amounts in NTD thousands unless otherwise specified)

For contracts that meet the criteria of (or contain) lease, the Group treats every lease component in the contract as a standalone lease, and accounts for non-lease components separately. For a contract that contains a lease component and one or multiple additional lease or non-lease components, the Group separates relative standalone price of each lease component from total standalone price of non-lease components, and allocates consideration to lease components. Relative standalone prices of lease and non-lease components are determined based on the price received by lessor (or supplier of similar nature) for the particular component (or similar component). If observable standalone prices are not readily available, the Group will maximize the use of observable information to estimate the standalone price.

Where the Group is the lessee

Except for leases that meet the criteria for and are accounted as short-term lease or least of low-value asset, the Group recognizes right-of-use assets and lease liabilities on all lease contracts where it is the lessee.

On the commencement date, the Group measures lease liabilities at the present value of unpaid lease payments outstanding on that day. Lease payments are discounted at the implicit interest rate if it can be determined easily. If the implicit interest rate cannot be determined easily, the lessee's incremental borrowing rate is used instead. Lease payments to be included in the calculation of lease liabilities on the commencement date include the following payments outstanding on that day that are relevant to the right-of-use of the underlying asset over the lease tenor:

- (1) Fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- (2) Variable lease payments that are determined by certain index or rate (which are initially measured using index or rate as at the commencement date);
- (3) Amounts that the lessee expects to pay under guaranteed residual value;
- (4) Exercise price for the purchase option, provided that the Group is reasonably certain to exercise such option; and
- (5) Penalties that have to be paid upon termination of lease, if the lease term reflects the lessee's intent to exercise the termination option.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

After the commencement date, the Group measures lease liabilities at amortized cost basis and uses the effective interest method to increase the book value of lease liabilities to reflect the interest expense on lease liabilities. Lease payments reduce the book value of lease liabilities.

The Group measures right-of-use assets at cost on the commencement date; the cost of right-of-use asset includes:

- (1) Initial measured amount of lease liabilities;
- (2) Any lease payment made on or before the commencement date, less any lease incentive received;
- (3) Any direct cost incurred by the lessee at initiation; and
- (4) Estimated cost for the lessee to dismantle, remove the underlying asset, and restore its original location, or to restore the underlying asset to the state specified in the terms and conditions of the lease agreement.

Right-of-use assets are subsequently measured at cost less accumulated depreciation and accumulated impairment loss; in other words, the cost method is used to measure right-of-use assets.

If ownership of the underlying asset is due to be transferred to the Group at the end of the lease tenor, or if the cost of right-of-use asset already reflects the Group's intent to exercise the option to purchase, the Group shall begin recognizing depreciation on right-of-use assets from the commencement date until the end of useful life. Otherwise, the Group is required to recognize depreciation from the commencement date until the end of useful life of the right-of-use asset or until the end of the lease tenor, whichever the earlier.

The Group adopts IAS 36 - "Asset impairment" to determine whether right-of-use assets exhibit signs of impairment and account for any impairment losses identified.

Except for leases that meet the criteria for and are accounted as short-term lease or lease of low-value asset, the Group recognizes both right-of-use assets and lease liabilities on the balance sheet, and lease-related depreciation and interest expenses on the statement of comprehensive income.

The Group accounts lease payments associated with short-term lease and lease of low-value asset as expense over the lease tenor on a straight-line basis or using an alternative systematic approach.

Where the Group is the lessor

The Group classifies each lease arrangement into an operating lease or financing lease on the contract establishment date. A lease is classified as financial lease if virtually all risks and returns associated with ownership of the underlying asset are transferred; otherwise, the lease is classified as an operating lease. On the commencement date, the Group recognizes assets held under financial lease arrangement on balance sheet, and presents financial lease receivable at the amount of net lease investments.

For contracts that contain both lease component and non-lease component, the Group adopts IFRS 15 and allocates considerations of contracts accordingly.

The Group recognizes lease payments received from operating leases as rental income on a straight-line basis or using alternative systematic basis. In an operating lease, variable lease payments that are not derived from any particular index or rate are recognized as rental income at the time occurred.

13. Intangible asset

Intangible assets that are acquired separately are measured at cost at initiation. For intangible assets acquired through business combination, cost is determined as fair value as of the acquisition date. After initial recognition, book value of intangible assets is subsequently presented at cost less accumulated amortization and accumulated impairment loss. Intangible assets generated internally that do not meet the recognition criteria are not capitalized, but recognized in profit or loss at the time occurred.

Intangible assets are distinguished into those with finite useful lives and those with indefinite useful lives.

Finite useful life intangible assets are amortized over the number of useful years, and subjected to impairment tests if there are signs of impairment. Useful life and method of amortization for finite useful life intangible assets are reviewed at the end of each financial year. If an asset's expected useful life differs from the previous estimate or if there is a change to how future economic benefits are realized, the Group will adjust the period and method of amortization and treat the adjustment as a change in accounting estimate.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

Indefinite useful life intangible assets are not amortized, but are subjected to impairment tests as a standalone asset or as part of the cash-generating unit yearly. Indefinite useful life intangible assets are evaluated each year to determine whether there are events or circumstances that continue to support the assets' useful life are indefinite. If changing from indefinite useful life to finite useful life, that apply will be postponed.

Gains or losses arising from the derecognition of intangible assets are recognized in profit or loss.

Computer software

Cost of computer software is amortized on a straight-line basis over the estimated useful life (1 to 5 years).

|   | Computer software   |
|---|---|
| Useful life                                 | Finite  |
| Amortization method                         | Amortized on a straight-line basis over the estimated useful life |
| Internally generated or externally acquired | Externally acquired   |

14. Impairment on non-financial assets

All assets subject to IAS 36 - "Asset impairment" are evaluated whether there is a sign of impairment at the end of each reporting period. If there is a sign of impairment or impairment tests on particular asset is needed yearly, the Group will conduct the impairment tests as a standalone asset or as part of the cash-generating unit. Impairment losses are recognized if the impairment test shows book value of the asset or cash-generating unit exceeds its recoverable amount. Recoverable amount is the higher between the net fair value and the utilization value.

For assets except for goodwill, the Group conducts regular assessments at the end of each reporting period to determine whether impairment losses recognized in previous periods have reduced or no longer exist. If so, the Group immediately estimates the recoverable amount of the asset or cash-generating unit. Impairment losses are reversed if the recoverable amount increases due to a change in estimated service potential of the underlying asset. However, the asset's book value after reversal of impairment losses cannot exceed the amount of book value less depreciation or amortization before the impairment took place.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)  
(All amounts in NTD thousands unless otherwise specified)

Impairment losses and reversal gains from continuing operations are recognized in profit or loss.

15. Provisions

Provisions are recognized on current obligations (legally or constructive) given rise by a past event, for which the Group is very likely to incur an outflow of economic benefit or resource to settle such an obligation, and that the amount of obligation can be estimated reliably. When the Group expects some or all of its provisions to be reimbursed, the Group will recognize assets separately only when the reimbursement is almost confirmed. In circumstances where time value of money has a significant impact, the provision is discounted using the pre-tax interest rate that appropriately reflects the specific risk characteristics of the liability. When discounting, any increase in the amount of liability due to passage of time is recognized as borrowing cost.

Provisions for warranty

Provisions for warranty are estimated base on the terms of product sale contracts, and the management's best estimate of future economic benefit outflows of warranty obligations (based on historical warranty experience).

16. Revenue recognition

Revenue from contracts with customers mainly involves sale of merchandise and rendering of service. Accounting treatments are as explained below:

Sales of merchandise

The Group recognizes revenue on sale of merchandise when the promised merchandise has been delivered to the customer and that the customer has control of the merchandise (i.e. the customer is able to make use of the merchandise and access virtually all remaining benefits on the merchandise). Most of the merchandises sold are electronic equipment of high unit price, for which revenues are recognized based on prices stated in individual contracts. Other merchandises are often sold with discount (based on sales volume accumulated within a defined period), therefore revenue is recognized at prices stated in individual contracts less estimated discounts. The Group estimates how volume-based discounts affect variable consideration using previous experience and expected value. However, variable consideration is only taken into account if, and to the extent that, it is highly probable that its inclusion will not result in a significant revenue reversal in the future when the uncertainty has been subsequently resolved. Meanwhile, expected volume discount is recognized as refund liabilities in period of agreement.

Warranty represents the Group's assurance that the merchandise supplied will function within customers' expectations, and is recognized according to IAS 37.

The Group sells merchandises with a credit term of 30-120 days. For most contracts, accounts receivables are recognized when the Group transfers control of merchandise and obtains an unconditional entitlement to receive consideration. Such accounts receivable is usually short in duration and there is no significant financial component. For some contracts that merchandise is transferred to customer but does not obtain unconditional entitlement to receive consideration yet, the Group would recognize contractual assets instead. According to IFRS 9, loss provisions on contract assets should be measured based on Lifetime Expected Credit Losses.

Rendering of service

The services provided by the Group are mainly maintenance, warranty, and design. Such services are priced individually or through negotiation, and provided during the contract period. Service income is recognized over time, considering that the Group renders services in a period of time specified in contract and that customers generate benefits from product throughout contract duration, thereby the performance obligation is fulfilled progressively over time, and service income is recognized over time.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

For the majority of the Group's contracts, consideration is collected over equal installments after services are rendered. Contractual assets are recognized when services are rendered to customers without unconditional entitlement to collect consideration. However, in certain contracts where partial consideration is collected from customers in advance at the time of signing, the Group bears the obligation to provide subsequent services and therefore recognizes contractual liabilities.

In the above situation, the reclassification of contractual liabilities into income generally do not exceed one year, and hence has not given rise to significant financing component.

17. Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction, or production of qualifying assets are capitalized into part of the cost of the respective assets. All other borrowing costs are expensed in the period incurred. Borrowing cost includes interest and other costs incurred in relation to the borrowing of capital.

18. Post-employment benefit plans

The Company and domestic subsidiaries' retirement policies apply to all permanent employees. All pension contributions are placed entirely under the management of the Labor Pension Fund Supervisory Committee and deposited into a dedicated pension fund account. Since the above pension fund is being held under the name of the Labor Pension Fund Supervisory Committee, it is completely separate from the Company's and domestic subsidiaries' assets and hence excluded from the consolidated financial statements presented above. For employees of foreign subsidiaries, retirement policy is subject to local regulations.

For employees under the post-employment benefit plans of defined contribution plan, the Company and domestic subsidiaries make monthly pension contributions totaling no less than 6% of employees' salary. The amounts contributed are recognized as current period expense.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

For employees that are subject to post-employment benefit plans of defined benefit plan, provisions are made at the end of the reporting period based on actuarial report using the Projected Unit Credit method. Remeasurement of net defined benefit liabilities (assets) includes return on plan asset and any change in the effect of asset cap, less the amount of net interest on the net defined benefit liabilities (assets) and actuarial gains/losses. Remeasurement of net defined benefit liabilities (assets) is recognized in other comprehensive income in the periods they occur, and recognized immediately into retained earnings. Service costs for the previous period represent changes in the present value of defined benefit obligations due to plan amendment or curtailment, and are recognized as expense on the earlier of the two dates below:

- (1) When the plan is amended or curtailed; and
- (2) When the Group recognizes related restructuring costs or termination benefits.

Net interest on net defined benefit liabilities (assets) is determined by multiplying net defined benefit liabilities (assets) with the discount rate. Both variables are determined at the beginning of annual reporting period, and changes in net defined benefit liabilities (assets) due to contributions and benefit payments during the period are evaluated thereafter.

19. Income tax

Income tax expense (benefit) is the aggregate amount included in the determination of profit or loss for the period in respect of current income tax and deferred income tax.

Current income tax

Current income tax liabilities (assets) for the current and previous periods are measured using statutory or substantively enacted tax rates and tax laws at the end of the reporting period. Current income taxes that arise in relation to accounts recognized in other comprehensive income or directly in equity are also recognized in other comprehensive income or in equity respectively, instead of profit or loss.

Additional income tax for undistributed earnings is recognized as income tax expense on the date when the distribution proposal is approved in the annual shareholders' meeting.

Deferred income tax

Deferred income tax is recognized on temporary differences between the tax basis of assets and liabilities and book value shown in the balance sheet as of the end of the reporting period.

All taxable temporary differences are recognized as deferred income tax liabilities, except for the two circumstances below:

- (1) Initial recognition of goodwill; or initial recognition of assets or liabilities that do not arise from transactions of the consolidated entity, provided that doing so affects neither accounting profit nor taxable profit (loss) at the time of transaction.
- (2) Taxable temporary difference that arises from investment in subsidiaries, provided that the timing of reversal can be controlled and the difference is very unlikely to reverse in the foreseeable future.

Deferred income tax assets are recognized on deductible temporary differences, unused tax losses, and carry forward of unused tax credit to the extent that the Group is likely to earn taxable income to offset them in the future, except for the two circumstances below:

- (1) Deductible temporary difference arising from initial recognition of an asset or liability that is unrelated to transactions of the consolidated entity, provided that doing so affects neither accounting profit nor taxable profit (loss) at the time of transaction;
- (2) Deductible temporary difference arising from investment in subsidiaries, which is recognized only to the extent that the difference is very likely to be reversed in the foreseeable future and that sufficient taxable income can be earned to realize the temporary difference.

Deferred income tax assets and liabilities are measured using tax rate that is expected to apply in the year when the asset is realized or the liability is settled. This tax rate is determined based on the tax rate and tax laws that have been enacted of substantively enacted at the end of the reporting period. Deferred income tax liabilities and assets represent tax impacts of the method by which the entity expects to recover/settle the book value of its assets and liabilities at the end of the reporting period. Deferred income taxes unrelated to any profit or loss account are not recognized in profit or loss, but are instead recognized in other comprehensive income or directly in equity depending on the nature of the transaction. Deferred income tax asset is re-examined and recognized at the end of each reporting period.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

Current portions of deferred current income tax assets and liabilities can be offset against each other only if the entity is legally entitled to do so, and that the deferred income taxes are attributed to the same taxpayer and the same tax authority.

(V). Sources of Uncertainty to Significant Accounting Judgments, Estimates, and Assumptions

When preparing consolidated financial statements, the management is required to make judgments, estimates, and assumptions as at the end of the reporting period, which will affect the amounts of income, expenses, assets, and liabilities reported and disclosure of contingent liabilities. Uncertainties associated with these significant assumptions and estimates may cause the entity to make significant adjustments to the book value of assets or liabilities in the future.

1. Judgment

When applying accounting policies for the preparation of financial statements, the management is required to make several significant judgments.

These include:

Operating lease commitments - where the Group is the lessor

Lease arrangements in which the Group retains significant risk and return associated with property ownership, according to the assessments on the terms of the lease agreement, are accounted as operating leases.

2. Estimates and assumptions

Estimates and assumptions made about the future at the end of the reporting period for significant but uncertain sources of information may result in significant risks for material adjustments to the book value of assets and liabilities in the next financial year. Explanation is as follows:

(1) Fair value of financial instruments

When fair value of a financial asset and financial liability shown on balance sheet cannot be obtained through active market, the fair value will be determined using valuation technique, such as the income approach (e.g., discounted cash flow model) or market approach. Changes in the assumptions used in these models will affect the

(All amounts in NTD thousands unless otherwise specified)

fair value of financial instruments reported. Please see Note (XII) for more details.

(2) Inventories valuation

Due to the fact that inventory is valued at the lower of cost or net realizable value item by item, the Group is required to exercise judgment and make estimates in order to determine the net realizable value of inventory at the end of the reporting period.

Due to rapidly changing technologies, the Group estimates the net realizable value of inventory for normal waste, obsolescence and market value at the end of reporting period and then writes down the cost of inventories to net realizable value. Inventory valuation is estimated primarily based on inventory characteristics, utilization value, historical experience, and market price, and therefore may give rise to significant changes. See Note (VI) for more details.

(3) Post-employment benefit plans

Pension cost and present value of defined benefit obligations of post-employment benefit plans are determined using actuarial valuations. The actuarial valuation involves several different assumptions, including discount rate and expected salary changes. Please see Note (VI) for details on the assumptions used to measure pension cost and defined benefit obligations.

(4) Revenue recognition - sales return and discount

The Group estimates sales return and discount based on historical experience and other known factors, and accounts them as contra items to operating revenues when merchandise is sold. The aforementioned estimates of sales returns and discounts are based on the amount of the accumulated revenue recognized in major reversals is highly unlikely to happen based on the premise. See Note (VI) for more details.

(5) Receivables - estimation of impairment losses

The Group estimates impairment loss of receivables by measuring the lifetime expected credit losses. Credit loss is determined as the present value of differences between contractual cash flow that is due to the Group under contracts (book value) and cash flow the Group expects to receive (after evaluating forward-looking information), but considering that the effect of discounting is insignificant for short-term receivables, credit loss is measured using the undiscounted differences.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

Significant impairment losses may arise if actual cash flow is less than expectation in the future. See Note (VI) for details.

(6) Income tax

Uncertainty of income tax lies in the interpretation of complex tax laws and the amount and timing of future taxable income. Due to the wide range of international business relationships and the long-term nature and complexity of contracts, differences between the actual outcome and the assumptions made previously or future changes to such assumption may necessitate future adjustments to income tax benefits and expenses already recognized. The Group establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it operates. The amount of provision is recognized after taking into account different factors such as: past tax audit experience and the different interpretations of tax law between the subject of tax and the applicable tax authority. Differences in interpretation may give rise to various issues depending on where the Group is located.

Unused tax losses and tax credits carried into subsequent periods and deductible temporary differences are recognized as deferred income tax assets to the extent that the entity is very likely to earn taxable income to offset against. The amount of deferred income tax assets recognizable is determined based on the timing and level of future taxable income and taxable temporary differences, as well as future tax plans and strategies. See Note (VI) for details of deferred income tax assets that the Group had not recognized as at December 31, 2022.

(VI). Notes to Major Accounts

1. Cash and cash equivalents

|                          | December 31, 2022  | December 31, 2021  |
|--------------------------|--------------------|--------------------|
| Cash                     | \$196              | \$196              |
| Demand and check deposit | 1,300,263          | 1,233,979          |
| Time deposit             | 234,165            | 216,735            |
| Total                    | <u>\$1,534,624</u> | <u>\$1,450,910</u> |

2. Financial assets at fair value through profit or loss

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

|   | <u>December 31, 2022</u> | <u>December 31, 2021</u> |
|---|--------------------------|--------------------------|
| Investments in equity instruments at fair value through profit or loss - non-current: |                          |                          |
| Fund  | <u>\$-</u>               | <u>\$-</u>               |

(1) The Group disposed 1 million units of Yuanta Taiwan High-yield Leading Company Fund in November 2021 for a sum of NT\$15,167 thousand; gains on disposal of NT\$2,577 thousand was recognized in other gains and losses in 2021.

(2) None of the Group's financial assets at fair value through profit or loss was placed as collateral.

3. Financial assets at fair value through other comprehensive income

|   | <u>December 31, 2022</u> | <u>December 31, 2021</u> |
|---|--------------------------|--------------------------|
| Investments in equity instruments at fair value through other comprehensive income - non-current: |                          |                          |
| TWSE/TPEX listed shares   | \$86,164                 | \$128,100                |
| Unlisted shares   | <u>35,502</u>            | <u>16,113</u>            |
| Total   | <u>\$121,666</u>         | <u>\$144,213</u>         |

(1) The Group acquired 47 thousand shares of Zero One Technology Co., Ltd., a TWSE-listed company, in February 2021 at a cost of NT\$1,775 thousand. The Group also participated in the cash issue of Zero One Technology Co., Ltd. in December 2021 and acquired 1,007 thousand shares at a cost of NT\$40,296 thousand.

(2) The Group held shares of Energy Trend Co., Ltd that underwent and completed the liquidation procedures on March 8, 2021. The Group obtained the capital reduction of NT\$95 thousand and the dividend income of NT\$8 thousand from the distribution of its remaining surplus, and transferred the accumulated unrealized valuation loss of NT\$191 thousand at the time of disposal from other equity to retained earnings.

(3) The Group acquired 195 thousand shares of Cloud Intelligent Operation Technology Co., Inc, an unlisted company, in the third quarter of 2021 at a cost of NT\$1,950 thousand.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

- (4) The Group acquired 2,000 thousand shares of Ausenior Information Co., Ltd., an unlisted company, in the first quarter of 2022 at a cost of NT\$26,000 thousand.
- (5) The Group acquired 4 thousand shares of stock dividend from retained earnings of Genesis Technology Inc., a TPEX-listed company, in the third quarter of 2022.
- (6) The Group acquired 1 thousand shares of stock dividend from retained earnings of Dimerco Data System Corporation, a TPEX-listed company, in the fourth quarter of 2022.
- (7) LOLA Technology Inc. held by The Group reduced its capital, at a ratio of 45.593%, and refunded a sum of NT\$6,611 thousand on December 8, 2022.
- (8) The Group recognized NT\$10,560 thousand and NT\$3,839 thousand of dividend income for the years ended December 31, 2022 and 2021, respectively from investments in equity instruments at fair value through other comprehensive income held in possession. This income was related to investments that remained in possession as at the balance sheet date.
- (9) None of the Group's financial assets at fair value through other comprehensive income was placed as collateral.

4. Notes receivable

|  | <u>December 31, 2022</u> | <u>December 31, 2021</u> |
|--|--------------------------|--------------------------|
| Notes receivable - arising from operating activities | \$10,342                 | \$5,759                  |
| Less: loss provisions                                | -                        | -                        |
| Net amount   | <u>\$10,342</u>          | <u>\$5,759</u>           |

None of the Group's notes receivable was placed as collateral.

The Group assesses impairment according to IFRS 9. Please see Note (VI).16 for information on loss provisions and Note (XII) for credit risk-related information.

5. Accounts receivable and installment accounts receivable

|                                 | <u>December 31, 2022</u> | <u>December 31, 2021</u> |
|---------------------------------|--------------------------|--------------------------|
| Accounts receivable             | \$517,973                | \$629,315                |
| Installment accounts receivable | 122,010                  | 143,302                  |

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

Less: Unrealized interest income - installment

|                             |           |           |
|-----------------------------|-----------|-----------|
| accounts receivable         | (5,247)   | (9,295)   |
| Subtotal (total book value) | 634,736   | 763,322   |
| Less: loss provisions       | (4,801)   | (16,257)  |
| Total                       | \$629,935 | \$747,065 |

Expected recovery of installment accounts receivable is as follows:

|                     | December 31, 2022 | December 31, 2021 |
|---------------------|-------------------|-------------------|
| No more than 1 year | \$82,403          | \$69,336          |
| 1 to 2 years        | 30,592            | 45,218            |
| 2 years and above   | 9,015             | 28,748            |
| Total               | \$122,010         | \$143,302         |

None of the Group's accounts receivable was placed as collateral. Credit terms granted to customers are generally 30 days to 120 days after the end of the month of acceptance inspection.

The Group had accounts receivable and installment accounts receivable balance outstanding at NT\$634,736 thousand and NT\$763,322 thousand as at December 31, 2022 and 2021, respectively. See Note (VI).16 for information on loss provisions and Note (XII) for credit risk-related information.

6. Inventories

|                             | December 31, 2022 | December 31, 2021 |
|-----------------------------|-------------------|-------------------|
| Net inventory - merchandise | \$2,530,729       | \$1,991,209       |

Cost of inventory, consultation, and maintenance recognized as expenses for the years ended December 31, 2022 and 2021 were NT\$4,994,017 thousand and NT\$4,980,918 thousand respectively. These amounts included NT\$1,227 thousand of loss on inventory devaluation and obsolescence and NT\$1,183 thousand of gain on reversal of inventory devaluation and obsolescence for the years ended December 31, 2022 and 2021, respectively. As at December 31, 2022 and 2021, the Group had provisions on inventory devaluation outstanding at NT\$5,117 thousand and NT\$3,890 thousand, respectively.

None of the above inventory was pledged as collateral.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)  
 (All amounts in NTD thousands unless otherwise specified)

7. Prepayments

|                             | December 31, 2022 | December 31, 2021 |
|-----------------------------|-------------------|-------------------|
| Prepaid purchases           | \$586,943         | \$450,172         |
| Prepayments for investments | 8,000             | -                 |
| Other prepaid expenses      | 68,698            | 43,102            |
| Total                       | <u>\$663,641</u>  | <u>\$493,274</u>  |

8. Property, plant and equipment

|  | December 31, 2022 | December 31, 2021 |
|--|-------------------|-------------------|
| Owner-occupied property, plant and equipment | <u>\$440,151</u>  | <u>\$446,238</u>  |

| End of the period                 | \$7,427                                    | \$14,720                                   |

Warranty

This provision was made by estimating future product warranty claims, which involved use of historical experience, the management's judgment and other known factors.

13. Post-employment benefit plans

Defined Contribution Plans

The retirement policy that the Company and domestic subsidiaries have established in accordance with the "Labor Pension Act" introduces a defined contribution plan. According to the Labor Pension Act, the Company and domestic subsidiaries are required to make monthly pension fund contributions at an amount no less than 6% of employee's monthly salary. The Company and domestic subsidiaries have established a set of employee retirement policy according to the Labor Pension Act, and has been making monthly contributions to employees' pension fund accounts held with the Bureau of Labor Insurance at 6% of salary.

Subsidiaries located in Mainland China are bound to comply with local government regulations by making contributions equal to a certain percentage of employees' gross salary to the pension fund. These contributions are paid to relevant government departments, and are saved in dedicated accounts of each employee.

Other foreign subsidiaries of the Group are bound to make pension contributions to the appropriate pension fund management institution in accordance with local laws.

The amounts of recognized pension expenses related to defined contribution plan for the years ended December 31, 2022 and 2021 were NT\$28,244 thousand and NT\$27,482 thousand respectively.

Defined Benefit Plans

The pension policy that the Company and domestic subsidiaries have established in accordance with the "Labor Standards Act" introduces a defined benefit plan. Employees' pension benefits were paid based on their years of service and their average salaries during the one month when retirement is approved. Employees are awarded 2 pension basis points for every year of service under (including) 15 years, and 1 pension basis point for every year of service above 15 years, subject to a maximum of 45 pension basis points. The Company and domestic subsidiaries make monthly pension contributions equivalent to 2% of employees' monthly gross salaries in accordance with the Labor Standards Act. These contributions are deposited into the dedicated account held with the Bank of Taiwan in the name of Labor Pension Fund Supervisory Committee. The Company and subsidiaries also evaluate the balance of the above-mentioned labor pension fund account before the end of each year. In the event that the account is estimated to be short of balance to pay the amount of estimated pension benefits to workers who are expected to meet their retirement criteria in the following year, the Company and domestic subsidiaries are required to reimburse the shortfall in one contribution before the end of March the following year.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)  
(All amounts in NTD thousands unless otherwise specified)

Assets are allocated according to Ministry of Labor's Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund. Fund assets are managed through a combination of self-management and mandate, using both active and passive medium-to-longer term investment strategies. The Ministry of Labor has imposed risk limits and control measures on market, credit, and liquidity risks, so that fund assets are not exposed to excessive risk while being given the flexibility to achieve target returns. Plan assets can only be allocated to investments that offer annual yields higher than the 2-year time deposit rate quoted by local banks. Shortfalls may be reimbursed by the public treasury subject to approval of the authority. Since the Company is not involved in the operation and management of the fund, it is unable to disclose the fair value of plan assets according to IAS 19 Section 142.

As at December 31, 2022, the Group expected to make contributions totaling NT\$3,137 thousand to the defined benefit plan in the next year.

As at December 31, 2022 and 2021, weighted average duration of the Group's defined benefit obligations was 5 years and 9 years, respectively.

A breakdown of defined benefit plan costs recognized in profit or loss is explained in the chart below:

|  | For the year<br>ended December<br>31, 2022 | For the year<br>ended December<br>31, 2021 |
|--|--|--|
| Service costs for the current period                     | \$2,884                                    | \$2,886                                    |
| Net interest on net defined benefit liabilities (assets) | 232  | 130  |
| Service costs for the previous period                    | -  | 8,236                                      |
| Total  | <u>\$3,116</u>                             | <u>\$11,252</u>                            |

Reconciliation between present value of defined benefit obligations and fair value of plan assets:

|   | December 31, 2022 | December 31, 2021 | January 1, 2021  |
|---|-------------------|-------------------|------------------|
| Present value of defined benefit obligations  | \$155,339         | \$159,873         | \$150,208        |
| Fair value of plan assets                     | <u>(128,891)</u>  | <u>(125,636)</u>  | <u>(115,294)</u> |
| Net defined benefit liabilities - non-current | <u>\$26,448</u>   | <u>\$34,237</u>   | <u>\$34,914</u>  |

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

Below are the main assumptions used for the Company's defined benefit plan:

|                               | December 31, 2022 | December 31, 2021 |
|-------------------------------|-------------------|-------------------|
| Discount rate                 | 1.17%             | 0.68%             |
| Expected salary increase rate | 1.00%             | 1.00%             |

Sensitivity analysis per major actuarial assumption:

|   | For the year ended<br>December 31, 2022          |  | For the year ended<br>December 31, 2021          |  |
|---|--|--|--|--|
|   | Increase in<br>defined<br>benefit<br>obligations | Decrease in<br>defined<br>benefit<br>obligations | Increase in<br>defined<br>benefit<br>obligations | Decrease in<br>defined<br>benefit<br>obligations |
| 0.5% increase in the<br>discount rate             | \$-  | \$3,777  | \$-  | \$5,396  |
| 0.5% decrease in the<br>discount rate             | 4,197  | -  | 9,379  | -  |
| 0.5% rise in the expected<br>salary increase rate | 4,177  | -  | 9,298  | -  |
| 0.5% fall in the expected<br>salary increase rate | -  | 3,801  | -  | 5,405  |

The above-mentioned sensitivity analysis shows how reasonable changes in a single actuarial estimate (e.g.: discount rate or expected salary) may affect defined benefit obligations while other assumptions remain unchanged. However, there are limitations to this approach, as some actuarial assumptions are intercorrelated and it is rare to see only one actuarial assumption change in practice.

Methodology and assumption for sensitivity analysis of current period are consistent with those of the previous period.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)  
(All amounts in NTD thousands unless otherwise specified)

14. Equity

(1) Ordinary share

The Company had authorized capital of NT\$3,400,000 thousand (20,000 thousand shares of which were reserved for the exercise of employee warrants) as at December 31, 2022 and 2021. Each share carries a face value of NT\$10 and can be issued in multiple offerings. Paid-up capital amounted to NT\$1,063,603 thousand and outstanding shares totaled 106,360 thousand on all dates. Each share is entitled to one voting right and the right to receive dividends.

(2) Capital surplus

|  | December 31, 2022 | December 31, 2021 |
|--|-------------------|-------------------|
| Premium on consolidation                   | \$148,259         | \$148,259         |
| Premium on conversion of convertible bonds | 18,255            | 18,255            |
| Total                                      | <u>\$166,514</u>  | <u>\$166,514</u>  |

According to regulations, capital surplus cannot be used for any purpose other than reimbursing previous losses. If the Company has no cumulative losses, capital surpluses that arise from shares issued at premium and gifts received may be capitalized into share capital, up to a certain percentage of paid-in capital per year; these capital surpluses may also be distributed in cash among shareholders at the current ownership percentage.

(3) Earnings appropriation and dividend policy

According to the Articles of Incorporation, annual surpluses concluded by the Company are first subject to taxation and reimbursement of previous losses, followed by a 10% provision for legal reserve (unless legal reserves have accumulated to an amount equal to share capital). Any surpluses remaining shall then be subject to provision or reversal of special reserve, as the laws may require. The residual balance can then be added to unappropriated earnings carried from previous years and retained or distributed to shareholders as a form of profit sharing, subject to resolution in a shareholder meeting.

Shareholders' profit sharing can be paid in cash or shares; however, the cash portion shall be no less than 10% of total dividends.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

The Company operates in the high-tech industry and is susceptible to the industry's enterprise life cycle. Dividends shall be allocated after taking into consideration several factors including: current and future investment environment, capital requirement, domestic/foreign competition, capital budget, shareholders' expectations, balanced dividends, and the Company's long-term financial plan. Dividend distribution plans are to be proposed by the board of directors and presented for final resolution in shareholder meeting on a yearly basis.

The Company will be required to provide additional special reserves to make up for the shortfall between the balance of special reserves provided during the first-time adoption of IFRS and the net balance of other contra equity items in years it decides to distribute available earnings. If there is any subsequent reversal of the net decrease in other equity, the reversed part of the net decrease in other equity may be reversed to the special reserve, and be distributed to investors.

In accordance with the order via a letter issued by the FSC on March 31, 2021 referenced Jin-Guan-Zheng-Fa No. 1090150022, if the International Financial Reporting Standards is adopted for the first time, for the unrealized revaluation value addition and cumulative translation adjustment (benefit) in the account which are transferred to retained earnings due to the adoption of the exemption item of IFRS 1 "First Adoption of IFRS" on the conversion date, a special reserve shall be allocated. Subsequently, when the Company uses, disposes of, or reclassifies the relevant assets, it may reverse the proportion of the original special reserve for distribution of earnings.

As at December 31, 2022, the Company had NT\$144 thousand of special reserve that were provided due to first-time adoption of IFRS.

The Company's 2022 and 2021 earnings appropriation proposal and dividends per share were proposed and resolved during the board of directors meeting held on February 23, 2023 and annual general meeting held on May 27, 2022, respectively. Details are as presented below:

|                   | <u>Earnings appropriation plan</u> |             | <u>Dividends per share (NTD)</u> |             |
|-------------------|------------------------------------|-------------|----------------------------------|-------------|
|                   | <u>2022</u>                        | <u>2021</u> | <u>2022</u>                      | <u>2021</u> |
| Legal reserve     | \$73,885                           | \$63,872    |                                  |             |
| Cash dividends on |                                    |             |                                  |             |
| ordinary shares   | 665,815                            | 597,745     | \$6.26                           | \$5.62      |

Please refer to Note (VI).18 for the amount of employee remuneration and director remuneration recognized and the basis of estimation.

(2) Contract balance

A. Contract assets - current

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

|   | <u>December 31, 2022</u> | <u>December 31, 2021</u> | <u>January 1, 2021</u> |
|---|--------------------------|--------------------------|------------------------|
| Sales of merchandise and rendering of service | \$252,812                | \$215,639                | \$351,222              |
| Less: loss provisions                         | <u>(3,859)</u>           | <u>(11,248)</u>          | <u>(12,524)</u>        |
| Total   | <u>\$248,953</u>         | <u>\$204,391</u>         | <u>\$338,698</u>       |

Major changes in the balance of contract assets for the years ended December 31, 2022 and 2021 are explained below:

|   | <u>For the year<br/>ended December<br/>31, 2022</u> | <u>For the year<br/>ended December<br/>31, 2021</u> |
|---|---|---|
| Amount of beginning balance reclassified into accounts receivable in the current period | <u>\$(196,981)</u>                                  | <u>\$(326,606)</u>                                  |
| Changes were measured based on level of completion                                      | <u>\$234,154</u>                                    | <u>\$191,023</u>                                    |

The Group assesses impairment according to IFRS 9. Please see Note (VI).16 for information on loss provisions and Note (XII) for credit risk-related information.

B. Contract liabilities - current

|   | <u>December 31, 2022</u> | <u>December 31, 2021</u> | <u>January 1, 2021</u> |
|---|--------------------------|--------------------------|------------------------|
| Sales of merchandise and rendering of service | <u>\$1,492,594</u>       | <u>\$1,173,794</u>       | <u>\$1,229,208</u>     |

Major changes in the balance of contract liabilities for the years ended December 31, 2022 and 2021 are explained below:

|  | <u>For the year<br/>ended December<br/>31, 2022</u> | <u>For the year<br/>ended December<br/>31, 2021</u> |
|--|---|---|
| Amount of beginning balance reclassified into revenue in the current period                                      | <u>\$(930,476)</u>                                  | <u>\$(969,228)</u>                                  |
| Current increase in advanced receipt (less amounts incurred and reclassified into revenue in the current period) | <u>\$1,249,276</u>                                  | <u>\$913,814</u>                                    |

(3) Allocation of transaction price into unfulfilled contractual obligations

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)  
(All amounts in NTD thousands unless otherwise specified)

As at December 31, 2022, the Group had allocated NT\$5,875,132 thousand of transaction price into unfulfilled (including partially unfulfilled) contractual obligations; 84.13% of which are expected to be recognized as revenue in 2023, whereas the remainder will be recognized as revenue on and after 2024.

(4) Assets recognized from costs of acquiring and fulfilling customer contracts

None.

16. Expected credit impairment reversal gain

|   | For the year<br>ended December<br>31, 2022 | For the year<br>ended December<br>31, 2021 |
|---|--|--|
| Expected credit impairment (loss) reversal gain |  |  |
| Contract assets                                 | \$105                                      | \$126                                      |
| Accounts receivable                             | 2,114                                      | 3,458                                      |
| Installment accounts receivable                 | 1,045                                      | (1,045)                                    |
| Total   | <u>\$3,264</u>                             | <u>\$2,539</u>                             |

Please see Note (XII) for credit risk-related information.

All of the Group's contract assets and receivables (including notes receivable, accounts receivable, and installment accounts receivable) have loss provisions measured based on Lifetime Expected Credit Losses. Credit loss is recognized as the difference between the book value of contract assets/accounts receivable and the present value of expected cash flow (prospective information). For short-term receivables, however, credit loss is not measured using present value difference as the effect of discounting is insignificant. Loss provisions as at December 31, 2022 and 2021 are explained below:

Contract assets and accounts receivables are divided into groups based on counterparties' credit rating, location, and industry, and a provision matrix is used to measure loss provisions. Relevant details are presented below:

Note 1: All notes receivable and contract assets are not past due; loss provisions are measured based on Lifetime expected credit losses.

Note 2: The Group measures loss provision for individual counterparties based on Lifetime Expected Credit Losses. Credit loss is recognized as the difference between the book value of contract assets/accounts receivable and the present value of expected cash flow.

Changes in loss provisions on contract assets, accounts receivable, and installment accounts receivable for the years ended December 31, 2022 and 2021 are explained below:

|   | Contract assets | Accounts receivable | Installment accounts receivable |
|---|-----------------|---------------------|---------------------------------|
| January 1, 2022                                     | \$11,248        | \$8,163             | \$8,094                         |

17. Lease

(1) The Group as lessee

The Group leases several types of asset, including buildings, transportation equipment, and office equipment. Lease tenor of each contract is from 1 to 10 years.

Effects of leases on the Group's financial position, financial performance, and cash flow are explained below:

A. Amounts recognized in the balance sheet

(a) Right-of-use assets

Book value of right-of-use assets

|                          | <u>December 31, 2022</u> | <u>December 31, 2021</u> |
|--------------------------|--------------------------|--------------------------|
| Buildings                | \$12,449                 | \$19,471                 |
| Transportation equipment | 12,434                   | 2,904                    |
| Office equipment         | 1,135                    | 1,424                    |
| Total                    | <u>\$26,018</u>          | <u>\$23,799</u>          |

Right-of-use assets increased by NT\$16,734 thousand and NT\$4,957 thousand for the years ended December 31, 2022 and 2021, respectively.

(b) Lease liabilities

|                   | <u>December 31, 2022</u> | <u>December 31, 2021</u> |
|-------------------|--------------------------|--------------------------|
| Lease liabilities | <u>\$26,370</u>          | <u>\$24,444</u>          |
| Current           | \$10,456                 | \$12,101                 |
| Non - current     | 15,914                   | 12,343                   |
| Total             | <u>\$26,370</u>          | <u>\$24,444</u>          |

Pursuant to the Articles of Incorporation, profits concluded from a financial year are subject to employee remuneration of no less than 3% and director remuneration of no more than 5%. However, profits must first be taken to offset against cumulative losses if any. Distribution of employee remuneration mentioned above can be made in cash or in shares. This decision must be resolved in a board meeting with more than two-thirds of the board present, voted in favor by more than half of all attending directors, and subsequently reported in shareholder meeting. Please visit the "Market Observation Post System" for more information regarding employee/director remuneration resolved in board of director meetings.

Employee remuneration and director remuneration for the year ended December 31, 2022 were estimated at NT\$67,000 thousand and NT\$3,300 thousand, respectively, based on the Company's profitability and the percentages stated in the Articles of Incorporation. Employee remuneration and director/supervisor remuneration for the year ended December 31, 2021 were estimated at NT\$37,100 thousand and NT\$0 thousand, respectively, based on profitability of that particular year. The abovementioned amounts were presented under salary expense at the time of estimation, and if the actual amount resolved by the board of

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

directors differs from the estimate, the difference will be recognized as gain or loss for the next year.

The board of directors passed a resolution on February 23, 2023 to pay the 2022 employee remuneration and director remuneration at NT\$67,000 thousand and NT\$3,300 thousand, respectively, in cash; these amounts were indifferent from the expenses previously recognized in the 2022 financial statements.

The board of directors passed a resolution on February 25, 2022 to pay the 2021 employee remuneration and director/supervisor remuneration at NT\$37,100 thousand and NT\$0 thousand, respectively, in cash; these amounts were indifferent from the expenses previously recognized in the 2021 financial statements.

22. Earnings per share (EPS)

Amount of basic earnings per share is calculated by dividing current net income attributable to parent company's ordinary shareholders by weighted average outstanding ordinary shares for the current period.

Amount of diluted earnings per share is calculated by dividing current net income attributable to parent company's ordinary shareholders by weighted average outstanding ordinary shares for the current period, including all potential dilutive ordinary shares assuming total conversion.

(VIII). Pledged assets

The Group had placed the following assets as collaterals:

| Item                                 | Book value        |                   | Details of debts secured |
|--------------------------------------|-------------------|-------------------|--------------------------|
|                                      | December 31, 2022 | December 31, 2021 |                          |
| Other financial assets - current     | \$15,372          | \$9,013           | Performance guarantee    |
| Other financial assets - non-current | 4,796             | 6,842             | Performance guarantee    |
| Total                                | \$20,168          | \$15,855          |                          |

(IX). Significant contingent liabilities and unrecognized contract commitments

Unrecognized contract commitments

1. The Company had engaged financial institutions to provide NT\$99,387 thousand of performance and customs guarantee for various projects.
2. The Company had issued NT\$15,398 thousand of guaranteed notes to customers and

banks to secure sales and borrowing limits.

Contingency

1. FUJIFILM Business Innovation Taiwan Co., Ltd. (hereinafter referred to as Fujifilm) filed a complaint against the Company's vice president surnamed Gao and other individuals for violating the Securities and Exchange Act, which is currently in the judiciary proceedings as a criminal case by the Taiwan Taipei District Court.
2. The Company received a complaint of criminal incidental civil lawsuit to the above-mentioned criminal case filed by the Taiwan Taipei District Court. Fujifilm filed a criminal incidental civil lawsuit against other companies, individuals, the Company and the Company's vice president surnamed Gao, a total of 15 defendants, requesting if one of the 15 defendants pays all or part of the damages, the other defendants are exempted from the obligation to pay within the scope of the payment. For the above-mentioned criminal incidental civil lawsuit filed by Fujifilm against the Company, the Company will appoint a lawyer to handle it. This is a civil lawsuit incidental to a criminal case, which will usually be transferred to the civil court after the first-instance criminal judgment, and there will be no civil procedure for the time being.
3. The Company received a complaint of civil lawsuit filed by the Taiwan Taipei District Court. Fujifilm filed a civil lawsuit against other companies, individuals, the Company and the Company's vice president surnamed Gao, a total of 18 defendants, requesting if one of the 18 defendants pays all or part of the damages, the other defendants are exempted from the obligation to pay within the scope of the payment.

For the above-mentioned civil lawsuit filed by Fujifilm against the Company, the Company will appoint a lawyer to handle it.

As at December 31, 2022, the Company has assessed that the aforementioned events will not have a significant impact on the Company's current operations.

(X). Losses from Major Disasters

None.

(XI). Significant Subsequent Events

None.

2. Purpose and policy of financial risk management

The Group has set its financial risk management goals to primarily manage market risks, credit risks, and liquidity risks relating to operating activities. The abovementioned risks are identified, measured, and managed according to the Group's policies and risk preference.

The Group has implemented appropriate policies, procedures, and internal controls for the management of financial risks mentioned above. All important financial activities are subject to review by the board of directors and audit committee in accordance with rules and the internal control system. The Group is required to duly comply with its financial risk management rules when carrying out financial management activities.

3. Market risk

Changes in the market price of financial instruments is the type of market risk that the Group is most concerned with. Market risk may cause fluctuation in the fair value or cash flow of financial instruments, and mainly includes exchange rate risk, interest rate risk, and other price risk.

In practice, however, it is extremely rare to see only one risk variable changing at one time. Although risk variables tend to be correlated to some degree, the sensitivity analysis below has not taken into consideration the inter-correlation of risk variables.

Exchange rate risk

The Group's exchange rate risk exposure is mainly associated with operating activities (when the currency of income or expense is different from the Group's functional currency) and net investments in foreign operations.

Some of the Group's foreign currency receivables and foreign currency payables are denominated in the same currencies, which create natural hedge to some extent. However, the Group did not adopt hedge accounting as natural hedge does not conform with the requirements for hedge accounting. Meanwhile, net investments in foreign operations represent strategic investments, therefore the Group did not hedge this exposure.

Sensitivity analysis for exchange rate risk is conducted on monetary items denominated in key foreign currencies as at the balance sheet date, and the analysis evaluates how a strengthening/weakening of foreign currency affects the Group's profits and equity. Exchange rate risks of the Group are mainly attributed to the volatility of USD and RMB

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

currencies. Sensitivity analysis for the two currencies is provided below:

If NTD strengthened/weakened against USD by 1%, profits for the years ended December 31, 2022 and 2021 would have increased/decreased by NT\$25 thousand and decreased/increased by NT\$19 thousand, respectively, whereas equity would have decreased/increased NT\$137 thousand and NT\$136 thousand, respectively.

If NTD strengthened/weakened against RMB by 1%, profits for the years ended December 31, 2022 and 2021 would have decreased/increased by NT\$439 thousand and NT\$397 thousand, respectively, and there would be no effect whatsoever on equity.

Interest rate risk

Interest rate risk refers to fluctuations in the fair value or future cash flow of a financial instrument due to changes in market interest rate. The Group's exposure to interest rate risk arises mainly from loans borrowed at floating rate. However, given that the Group currently has no such loan outstanding, it is not exposed to any material interest rate risk.

Equity price risk

The Group holds TWSE/TPEX listed as well as unlisted equity securities; the fair value of investments may be affected by uncertainties associated with the future value. All TWSE/TPEX listed and unlisted equity securities held by the Group are classified as equity instruments at fair value through other comprehensive income. The Group manages equity price risk of equity securities through diversified investment and by setting investment limits on single and a portfolio of instruments. Information on portfolio of equity securities has to be provided to the Group's management on a regular basis; the board of directors is required to verify and approve all decisions concerning investment of equity securities.

A 10% rise/fall in the price of TWSE/TPEX listed shares held as investments in equity instruments at fair value through other comprehensive income would have affected the Group's equity by NT\$8,616 thousand and NT\$12,810 thousand for the years ended December 31, 2022 and 2021, respectively.

4. Credit risk management

Credit risk refers to the possibility of financial losses suffered due to counterparties

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

becoming unable to fulfill contractual obligations. The Group's credit risk exposure mainly arises from operating activities (primarily accounts receivable and notes receivable) and financing activities (primarily bank deposits and financial instruments).

All departments of the Group manage credit risks according to prevailing policies, procedures, and controls. Counterparty credit risk is evaluated after taking into consideration each counterparty's financial position, external credit rating, historical transactions, the current economic environment, and the Group's internal rating standards, etc. The Group uses credit enhancement tools (such as advanced receipt and insurance) at appropriate times to minimize credit risk of specific counterparties.

The Group's top 10 customers accounted for 20% and 33% of total contract assets and accounts receivable balance as at December 31, 2022 and 2021, respectively. Judging by the above, there was no concentration of credit risk in the Group's contract assets and accounts receivable.

The Finance Department manages credit risk of bank deposits and other financial instruments according to group policies. All counterparties of the Group are approved according to internal control procedures, and consist entirely of reputable banks, investment-grade financial institutions, companies, and government agencies, hence no major credit risk exists.

The Group assesses expected credit losses according to IFRS 9. Information relating to credit risk assessment is presented below:

| Credit risk grade             | Indicator | Method of measuring<br>expected credit loss | Total book value  |                   |
|-------------------------------|-----------|---|-------------------|-------------------|
|                               |           |   | December 31, 2022 | December 31, 2021 |
| Simplified<br>Approach (Note) | (Note)    | Lifetime Expected Credit<br>Losses          | \$897,890         | \$984,720         |

Note: The Group adopts the Simplified Approach (loss provision is measured based on Lifetime Expected Credit Losses); the assessment covers contract assets, notes receivable, accounts receivable, and installment accounts receivable.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)  
(All amounts in NTD thousands unless otherwise specified)

5. Liquidity risk management

The Group uses cash and cash equivalents, marketable securities, bank loans, leases, and contracts to maintain financial flexibility.

The following table shows maturity of financial liabilities as stated in contract terms and conditions. The dates represent the earliest times at which the Group may be required to make repayments, whereas the amounts are undiscounted and include agreed interests. Undiscounted amounts of floating interest cash flow are estimated using yield curve as at the balance sheet date.

| Non - cash movement | -                | -                  | 5,584             | 5,584           |
| Cash flow           | 70,000           | 317                | (17,024)          | 53,293          |
| December 31, 2021   | <u>\$70,000</u>  | <u>\$3,138</u>     | <u>\$24,444</u>   | <u>\$97,582</u> |

7. Fair value of financial instruments

(1) Fair value assessment techniques and assumptions

Fair value refers to the price that market participants are able to receive for selling an asset, or the price that has to be paid to transfer a liability, in an orderly transaction on the measurement date. The Group has adopted the following techniques and assumptions when measuring and disclosing fair values of financial assets and liabilities:

- A. Book value of cash and cash equivalents, receivables, payables, and other current liabilities closely resemble their fair value due to their short maturity.
- B. Financial assets and liabilities that are traded on active markets at standard terms and conditions shall have fair value determined by market quotation (e.g. TWSE/TPEX listed shares, beneficiary certificates, and bonds).
- C. Equity instruments without active market (e.g. privately placed shares of TWSE/TPEX listed companies, shares of unlisted public and private companies without active market) shall have fair value estimated using the market approach, which infers fair values from transaction price or other relevant information (such as discount for lack of liquidity, P/E and P/B ratios of similar companies etc.) of same or comparable equity instruments.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

D. For debt instruments without quotation in active market, bank loans, and other non-current liabilities, fair value is determined by counterparty's quotation or through the use of valuation technique. The valuation technique takes a discounted cash flow approach, and assumptions such as interest rate and discount rate are established in reference to instruments of similar nature.

(2) Fair value of financial instruments carried at cost after amortization

Book value of financial assets and liabilities carried at amortized costs closely resemble their fair value.

(3) Fair value hierarchy for financial instruments

See Note (XII).8 for information relating to fair value hierarchy for financial instruments.

8. Fair value hierarchy

(1) Definition of fair value hierarchy

For all assets and liabilities measured or disclosed at fair value, fair value measurement is categorized in their entirety in the level of the lowest level input that is significant to the entire measurement. The different levels of inputs used are explained below:

Level 1 input: Quotations that can be obtained from an active market (unadjusted) on the measurement date for asset or liability of equivalent nature.

Level 2 input: Inputs that can be observed directly or indirectly on an asset or liability, except for quotations covered in level 1 input.

Level 3 input: Inputs that cannot be observed for an asset or liability.

Assets and liabilities that are recognized on financial statements on a recurring basis shall have classification reassessed on each balance sheet date to determine if transfer of fair value hierarchy has taken place.

(2) Information on fair value hierarchy

The Company did not have any asset that is measured at fair value on a non-recurring basis. Hierarchy of assets and liabilities with recurring fair value measurement is

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)

(All amounts in NTD thousands unless otherwise specified)

explained below:

December 31, 2022:

|   | Level 1  | Level 2 | Level 3  | Total     |
|---|----------|---------|----------|-----------|
| Financial assets at fair value:   |          |         |          |           |
| Financial assets at fair value<br>through other comprehensive<br>income |          |         |          |           |
| Stock   | \$86,164 | \$-     | \$35,502 | \$121,666 |

December 31, 2021:

|   | Level 1   | Level 2 | Level 3  | Total     |
|---|-----------|---------|----------|-----------|
| Financial assets at fair value:   |           |         |          |           |
| Financial assets at fair value<br>through other comprehensive<br>income |           |         |          |           |
| Stock   | \$128,100 | \$-     | \$16,113 | \$144,213 |

Transfer of fair value input between level 1 and level 2

There had been no transfer of fair value input between level 1 and level 2 for the years ended December 31, 2022 and 2021 that involved assets or liabilities with fair value measured on a recurring basis.

Transfer of level 3 input for fair value measured on a recurring basis

There had been no transfer of level 3 input that involved assets or liabilities with fair value measured on a recurring basis in current period.

Information on the use of significant unobservable inputs in level 3 fair value measurement

The following significant unobservable inputs were used for level 3 measurement of assets with fair value measured on a recurring basis:

December 31, 2022:

Due to the broad diversity of functional currencies used for transactions by members of the Group, the Group was unable to disclose exchange gains/losses on monetary financial assets and liabilities separately for each significant foreign currency. The Group incurred NT\$29,381 thousand and NT\$3,124 thousand of gains on currency exchange for the years ended December 31, 2022 and 2021, respectively.

10. Capital management

The primary goals of the Group's capital management are to maintain robust credit rating and sound capital ratios in ways that support business operation and maximization of shareholders' equity. The Group manages and adjusts capital structure based on changes in economic circumstances. The Group maintains and adjusts capital structure through: adjustment of dividend payment, refund of share capital, or issuance of new shares.

| 1                      | Stark Inforcom Inc.                                    | The Company             | 4                     | \$237,925   | \$19,500                                | \$19,500   | \$19,500                          | -   | 0.62%  | \$475,850   | -   | Y   | -  |

Note 1: Explanation to the serial number column:

1. 0 for the Company.
2. Investees are numbered in sequential order starting from 1; serial number should be consistent for the same company.

Note 2: The relationship between endorsement/guarantee providers and guaranteed parties are classified as follows:

1. Business that the Company has business dealing with.
2. Business in which the Company holds more than 50% direct or indirect voting interest.
3. Business that holds more than 50% direct or indirect voting interest in the Company.
4. Business in which the Company holds more than 90% direct or indirect voting rights.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)  
(All amounts in NTD thousands unless otherwise specified)

5. Peer or partner of a construction contract that the Company is in need to provide cross guarantees for.
6. Investee of a joint investment arrangement for which the Company and other shareholders have issued endorsements/guarantees proportionate to ownership interest.
7. Peer of a property pre-sale contract for which the Company has issued performance guarantee in accordance with the Consumer Protection Act.

Note 3: According to subsidiaries' endorsement and guarantee procedures, endorsements/guarantees to a single business shall not exceed 50% of current net equity; total endorsements/guarantees to external parties shall not exceed 100% of current net equity. According to parent company's endorsement and guarantee procedures, endorsements/guarantees to any single subsidiary in which the Company holds more than 90% ownership interest shall not exceed 50% of net equity shown in the Company's latest financial statements, whereas endorsements/guarantees to other external parties shall not exceed 10% of the Company's net equity per entity or 50% of the Company's net equity on an aggregate basis, as shown in the latest financial statements.

Note 4: Represents the maximum balance of endorsement/guarantee during the year.

Note 5: Represents board of directors approved amount. If the Chairman has been authorized by the board of directors to make decisions according to Subparagraph 8, Article 12 of Regulations Governing Loaning of Funds and Making of Endorsements/Guarantees by Public Companies, the column shall represent Chairman-approved amount.

Note 6: Represents the actual amount utilized by the guaranteed/endorsed within the endorsement/guarantee limit.

Note 7: Specify "Y" only for: endorsement/guarantee from a TWSE/TPEX listed parent to a subsidiary, endorsement/guarantee from a subsidiary to a TWSE/TPEX listed parent, or endorsement/guarantee to the Mainland China area.

Notes to Consolidated Financial Statements of Stark Technology Inc. and Subsidiaries (Continued)  
(All amounts in NTD thousands unless otherwise specified)

Note 1: Business dealings between the parent company and subsidiaries are indicated in the serial number column. The numbering rule is explained below:

1. 0 for parent company.
2. Each subsidiary is numbered in sequential order starting from 1.

Note 2: Related party transactions are distinguished into one of three categories, as shown below:

1. Parent to subsidiary.
2. Subsidiary to parent.
3. Subsidiary to subsidiary.

Note 3: Calculation for business dealings as a percentage of total consolidated revenues or total assets is explained as follows: for balance sheet items, percentage of period-end balance is calculated relative to consolidated total assets; for profit or loss items, percentage of end-of-period cumulative amount is calculated relative to consolidated total revenues.

Note 4: Key transactions presented in this chart are determined by the Company based on principles of materiality.

4. Information on major shareholders: Disclosure requirements not met.

(XIV). Segment Information

The Group generates revenues mainly from distribution and maintenance of computers and peripherals; research, design, development, and sale of computer software/hardware, and computer system design. The Group's decision makers evaluate performance of the company and allocate resources accordingly. The Group has consolidated all of its operations into one single reporting segment due to the fact that they share similar economic characteristics and exhibit comparable long-term financial performance. Segment information is prepared using the same basis and significant accounting policies stated in Note (IV).

1. Regional information

(1) Income from external customers:

|                | For the year<br>ended December<br>31, 2022 | For the year<br>ended December<br>31, 2021 |

V.The CPA audited standalone financial statements for the most recent year

Stark Technology Inc.  
Independent Auditor's Report

To stakeholders of Stark Technology Inc.:

**Opinion**

We have audited the parent company only balance sheet of Stark Technology Inc. as at December 31, 2022 and 2021, and the parent company only statement of comprehensive income, parent company only statement of changes in equity, parent company only statement of cash flow, and the accompanying footnotes (including summary of key accounting policies) for the periods January 1 to December 31, 2022 and 2021.

We found that none of the material disclosures of the parent company only financial statements mentioned above exhibited any misstatement that did not conform with Regulations Governing the Preparation of Financial Reports by Securities Issuers, or compromised the fair view of the parent company only financial position of Stark Technology Inc. as at December 31, 2022 and 2021, and the parent company only financial performance and cash flow for the periods January 1 to December 31, 2022 and 2021.

**Basis for Opinion**

We conducted our audits in accordance with Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the audit principles. Our responsibilities as an auditor under the abovementioned standards are explained in the Responsibilities paragraph. All relevant personnel of the accounting firm have followed CPA code of ethics and maintained independence from Stark Technology Inc. when performing their duties. We believe that the evidence obtained provide an adequate and appropriate basis for our opinion.

**Key Audit Matters**

Key audit matters are matters that we considered to be the most important, based on professional judgment, when auditing for the year ended December 31, 2022 parent company only financial statements of Stark Technology Inc. These issues have already been addressed when we audited and formed our opinions on the parent company only financial statements. Therefore, we do not provide opinions separately for individual matters.

Recognition of service income

Stark Technology Inc. reported NT\$1,845,431 thousand of service income for the year ended December 31, 2022, representing 32% of total operating revenues and is considered material to the parent company only financial statements. This income is mostly the result of consultation and maintenance services rendered, and given the complexity of contract terms, income is recognized based on the extent of service rendered over the contract tenor. It is therefore necessary to exercise judgment over the scope of performance obligations and the timing of fulfillment, and we consider the amount of income recognized and the recognition approach taken to be key audit issues. Audit procedures that we have taken for the key audit issue mentioned above included (but were not limited to): evaluating the appropriateness of accounting policy on service income recognition, testing the effectiveness of the internal control system that the management has created for recognizing service income, analyzing gross profit margin by service category, executing transaction detail tests including sample examination of service contracts and invoices, and identifying performance obligations, cost-

sharing arrangements, and timing of fulfillment for the contracts involved. These actions enabled us to determine whether transactions were recognized at the correct timing. We also reviewed the appropriateness of revenue disclosure mentioned in Notes IV and VI of the parent company only financial statements.

### **Responsibilities of the Management and Those Charged with Governance for Parent Company Only Financial Statements**

Responsibilities of the management were to prepare and ensure fair presentation of parent company only financial statements in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and to exercise proper internal control practices that are relevant to the preparation of parent company only financial statements so that the parent company only financial statements are free of material misstatements, whether caused by fraud or error.

The management's responsibilities when preparing parent company only financial statements also involved: assessing the ability of Stark Technology Inc. to operate, disclose information, and account for transactions as a going concern unless the management intends to liquidate or cease business operations, or is compelled to do so with no alternative solution.

The governance body of Stark Technology Inc. (including the Audit Committee) is responsible for supervising the financial reporting process.

### **Auditor's Responsibilities for the Audit of Parent Company Only Financial Statements**

The purposes of our audit were to obtain reasonable assurance of whether the parent company only financial statements were prone to material misstatements, whether caused by fraud or error, and to issue a report of our audit opinions. We considered assurance to be reasonable only if it is highly credible. However, audit tasks conducted in accordance with audit principles do not necessarily guarantee detection of all material misstatements within the parent company only financial statements. Misstatements can arise from fraud or error. Misstatements are considered material if the individual amount or aggregate total is reasonably expected to affect economic decisions of the financial statement user.

When conducting audits in accordance with audit principles, we exercised judgments and raised doubts as deemed professionally appropriate. We also performed the following tasks as an auditor:

1. Identifying and assessing risks of material misstatement within the parent company only financial statements that are attributed to fraud or error; designing and executing appropriate response measures for the identified risks; and obtaining adequate and appropriate audit evidence to support audit opinions. Fraud may involve conspiracy, forgery, intentional omission, untruthful declaration, or breach of internal control, and our audit did not find any material misstatement where the risk of fraud is greater than the risk of error.
2. Obtaining necessary understanding on internal controls relevant to audit and designing audit procedures that are appropriate under the prevailing circumstances, but not for the purpose of providing opinion on the effectiveness of internal control system of Stark Technology Inc.
3. Assessing the appropriateness of accounting policies adopted by the management, and the rationality of accounting estimates and related disclosures made.
4. Forming conclusions regarding the appropriateness of management's decision to account for the business as a going concern, and whether there are doubts or uncertainties about the ability of Stark Technology Inc. to operate as a going concern, based on the audit evidence

obtained. We are bound to remind parent company only financial statement users to pay attention to relevant disclosures in the notes to those statements within our audit report if material uncertainties exist in regards to the aforementioned events or circumstances, and amend audit opinions when the disclosures are no longer appropriate. Our conclusions are based on the audit evidence obtained up to the date of audit report. However, future events or change of circumstances may still render Stark Technology Inc. no longer capable of operating as a going concern.

5. Assessing the overall presentation, structure, and contents of the parent company only financial statements (including related footnotes), and whether certain transactions and events are presented appropriately in the parent company only financial statements.
6. Obtaining sufficient and appropriate audit evidence on financial information of entities within the Company, and expressing opinions on parent company only financial statements. Our responsibilities as auditor are to instruct, supervise, and execute audits and form audit opinions on the Company.

We have communicated with the governance body about the scope, timing, and significant findings (including significant defects in internal control identified during the audit) of our audit.

We have also provided the governance body with a declaration of independence stating that all relevant personnel of the accounting firm have complied with CPA code of ethics, and communicated with the governance body on all matters that may affect the auditor's independence (including relevant protection measures).

We have identified the key audit matters after communicating with the governance body regarding the year ended December 31, 2022 parent company only financial statements of Stark Technology Inc. These issues have been addressed in our audit report except for: 1. Certain topics that are prohibited by law from disclosing to the public; or 2. Under extreme circumstances, topics that we decide not to communicate in the audit report because of higher negative impacts they may cause than the benefits they bring to public interest.

Stark Technology Inc.  
Notes to Parent Company Only Financial Statements  
For the Years Ended December 31, 2022 and 2021  
(All amounts in NTD thousands unless otherwise specified)

(I) Organization and Operations

Stark Technology Inc. (the "Company") was incorporated on March 24, 1993. Its main business activities include distribution and maintenance of computers and peripherals; research, design, development, and sale of computer software/hardware, computer system design, and import/export trade for the Company's own products.

Shares of the Company have been listed for trading on "Taiwan Stock Exchange Corporation" since September 2001. The Company's place of registration and main business location is 12F-1, No. 83, Section 2, Dongda Road, Hsinchu City.

(II) Financial Statement Approval Date and Procedures

Parent company only financial statements of the Company for the years ended December 31, 2022 and 2021 were approved by the board of directors on February 23, 2023.

(III) Application of new standards, amendments, and interpretations

1. Change of accounting policy resulting from first-time adoption of International Financial Reporting Standards (IFRS)

The Company has adopted the version of IFRS, IAS, IFRIC and interpretations thereof that approved and effected by Financial Supervisory Commission (FSC) for accounting periods on and after January 1, 2022. First-time adoption of the new standards and amendments has had no material impact on the Company.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

2. The Company has not adopted the following IASB-announced and FSC-approved new standards, amendments, guidance, and interpretation as of the release date of the financial reports:

| Item No. | New Standards, Interpretations and Amendments   | Effective Date by International Accounting Standards Board |
|----------|---|--|
| 1        | Amendments to IAS 1 - "Disclosure of Accounting Policies"   | January 1, 2023  |
| 2        | Amendments to IAS 8 - "Definition of Accounting Estimates"  | January 1, 2023  |
| 3        | Amendments to IAS 12 - "Deferred Tax Related to Assets and Liabilities Arising from A Single Transaction" | January 1, 2023  |

(1) Amendments to IAS 1 - "Disclosure of Accounting Policies"

This amendment aims to improve disclosure of accounting policies to provide investors and other primary users of financial statements with more useful information.

(2) Amendments to IAS 8 - "Definition of Accounting Estimates"

This amendment directly defines accounting estimates and makes other amendments to International Accounting Standard 8 "Accounting Policies, Changes in Accounting Estimates and Errors" to assist entities in distinguishing between changes in accounting policies and changes in accounting estimates.

(3) Amendments to IAS 12 - "Deferred Tax Related to Assets and Liabilities Arising from A Single Transaction"

This amendment restricts the scope of exempting recognition of deferred tax in paragraphs 15 and 24 of International Accounting Standard 12 "Income Taxes," so that the exemption does not apply to transactions that generate taxable and deductible temporary differences of the same amount at the time of initial recognition.

All above are the newly issued, revised and amended standards or interpretations that have been issued by the International Accounting Standards Board, approved by the Financial Supervisory Commission and applicable for fiscal years after January 1, 2023. They have no significant impact on the Company.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

3. As of the publication date of financial statements, the Company had not adopted the following IASB-announced new standards, amendments, guidance, and interpretation that were not approved by FSC:

| Item No. | New Standards, Interpretations and Amendments   | Effective Date by International Accounting Standards Board   |
|----------|---|--|
| 1        | Amendments to IFRS 10 - "Consolidated Financial Statements" and IAS 28 - "Investments in Associates and Joint Ventures" regarding "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture" | To be determined by International Accounting Standards Board |
| 2        | IFRS 17, "Insurance Contracts"  | January 1, 2023  |
| 3        | Amendments to IAS 1 - "Classification of Liabilities as Current or Non-Current"   | January 1, 2024  |
| 4        | Amendments to IFRS 16 - "Lease Liability in a Sale and Leaseback"   | January 1, 2024  |
| 5        | Amendments to IAS 1 - "Non-Current Liabilities in Contracts"  | January 1, 2024  |

- (1) Amendments to IFRS 10 - "Consolidated Financial Statements" and IAS 28 - "Investments in Associates and Joint Ventures" regarding "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture"

This amendment is intended to address the inconsistent treatments between IFRS 10 - "Consolidated Financial Statements" and IAS 28 - "Investments in Associates and Joint Ventures" in cases where a company loses control in a subsidiary when ownership of that subsidiary is offered as consideration for investing into an associated company or joint venture. IAS 28 states that, when a company contributes non-monetary asset in exchange for equity interest in an associated company or joint venture, the transaction shall be treated as a downstream transaction and any share of gains or losses that arises as a result is eliminated. IFRS 10, however, requires the entirety of gains or losses to be recognized when a company loses control in a subsidiary. This amendment limits the IAS 28 treatment mentioned above, and requires all gains or losses to be recognized when the assets sold or contributed constitute a business defined under IFRS 3.

Meanwhile, IFRS 10 was amended so that, when an investor sells or contributes a subsidiary that does not constitute a business defined under IFRS 3 with its associated company or joint venture, gains or losses that arise as a result shall be recognized only for the share that is not attributed to the investor.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

(2) IFRS 17, "Insurance Contracts"

This standard provides a comprehensive model for the treatment of insurance contracts, including accounting practices (from recognition, measurement, presentation to disclosure). The standard uses a general model at its core, and under this model, a group of insurance contracts shall be recognized at initiation as the sum of fulfillment cash flows and contractual service margin; thereafter, book value for the Company of insurance contracts shall be presented as the sum of liability for remaining coverage and liability for incurred claims as at each balance sheet date.

In addition to the general model, the standard also introduces treatment for insurance contract with direct participation features (the Variable Fee Approach) and simplified approach for short-term contracts (the Premium Allocation Approach).

This standard was first published in May 2017 and later amended in 2020 and 2021, which postponed the effective date stated in the transition clause by 2 years (from January 1, 2021 to January 1, 2023), introduced additional exemptions, and reduced cost of adoption through the simplified approach. The amendment also made some circumstances easier to interpret. This standard will supersede the transitional standard (i.e. IFRS 4 - "Insurance Contracts") once effected

(3) Amendments to IAS 1 - "Classification of Liabilities as Current or Non-Current"

This amendment concerns the classification of liabilities between current and non-current, as stated in paragraphs 69-76 of IAS 1 - "Presentation of Financial Statements."

(4) Amendments to IFRS 16 - "Lease Liability in a Sale and Leaseback"

This amendment for IFRS 16 Leases is intended to ensure the consistency of application of the standard by adding subsequent measurement requirements for a seller-lessee in a sale and leaseback transactions.

(5) Amendments to IAS 1 - "Non-Current Liabilities in Contracts"

This amendment aims to enhance the information provided by the entity regarding long-term debt contracts. The disclosure of contractual obligations that are required to be met within twelve months after the reporting period does not affect the classification of such liabilities as current or non-current at the end of the reporting period.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

All above standards and interpretations announced by IASB but not yet approved by FSC shall become effective on dates announced by FSC. The Company is currently evaluating the potential impacts of newly announced/amended standards and interpretations listed in (1), and is unable to provide reasonable estimate of how the above standards or interpretations may affect the Company. Aside from the above, other newly announced/amended standards and interpretations have no material impact on the Company.

(IV) Summary of Significant Accounting Policies

1. Compliance statement

Parent company only financial statements of the Company for the years ended December 31, 2022 and 2021 have been prepared in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers."

2. Basis of Preparation

The Company has prepared the parent company only financial statements in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers." According to Article 21 of Regulations Governing the Preparation of Financial Reports by Securities Issuers, the amount of current profit/loss and other comprehensive income attributable to parent company shareholders should be consistent between parent company only and consolidated financial statements; the amount of equity attributable to parent company shareholders should also be consistent between parent company only and consolidated financial statements. For this reason, investments in subsidiaries are presented as "Investments accounted for using equity method" in the parent company only financial statements, with valuation adjustments made as necessary.

The parent company only financial statements have been prepared based on historical cost, except for financial instruments carried at fair value. Unless otherwise specified, all amounts in the parent company only financial statements are presented in NTD thousands.

3. Foreign currency transactions

The parent company only financial statements are presented using the Company's functional currency (NTD).

Foreign currency transactions are converted into the functional currency using exchange rates as of the date of transaction. Foreign currency monetary items are converted using

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

closing exchange rate at the end of each reporting period. Foreign currency-denominated non-monetary items measured at fair value are converted using exchange rate as of the valuation date. Foreign currency-denominated non-monetary items carried at historical cost are converted using exchange rate as of the initial transaction date.

Exchange differences arising from settlement or translation of monetary accounts are recognized in profit and loss in the period occurred, except in the following circumstances.

- (1) For foreign currency loans that are undertaken for the purpose of acquiring a qualifying asset, the exchange difference would form part of the borrowing cost if it is treated as an adjustment to interest cost, and capitalized into the cost of the asset.
- (2) Foreign currency items subject to IFRS 9 - "Financial Instruments" are treated using accounting policy on financial instruments.
- (3) For monetary items that make up a part of the reporting entity's net investments in foreign operation, exchange difference is recognized as other comprehensive income at initiation, and subsequently reclassified from equity into profit or loss upon disposal of net investments.

Non-monetary accounts that have gains and losses recognized as other comprehensive income shall also have any exchange component of that gain or loss recognized as other comprehensive income. Non-monetary accounts that have gains and losses recognized in profit and loss shall also have any exchange component of that gain or loss recognized in profit and loss.

4. Translation of foreign currency financial statements

Each foreign operation of the Company determines its own functional currency, and presents financial statements in the functional currency chosen. When preparing parent company only financial statements, assets and liabilities of foreign operations are converted into NTD using closing exchange rate as at the balance sheet date, whereas income, expenses, and losses are converted using average exchange rate for the current period. Exchange differences arising from financial statement translation are recognized as other comprehensive income; upon disposal of foreign operations, exchange differences previously recognized as other comprehensive income and accumulated under equity from separate parts are reclassified from equity to profit or loss when recognizing gain/loss on disposal. In a partial disposal of subsidiary containing foreign operation that results in a loss of control, and partial disposal

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

of equity in an associated company or joint agreement containing foreign operation, the disposal treatment shall also apply if the remaining equity can be regarded as a financial asset containing foreign operation.

In a partial disposal of subsidiary containing foreign operation that does not result in a loss of control, cumulative exchange differences previously recognized in other comprehensive income are re-attributed to non-controlling equity of such foreign operation, instead of being recognized in profit or loss. In a partial disposal of associated company or joint agreement containing foreign operation where significant influence or joint control is not lost, cumulative exchange differences are reclassified into profit or loss proportionally.

5. Classification of current and non-current assets and liabilities

Assets that satisfy any of the following criteria are classified as current assets; assets that are not classified as current are classified as non-current assets:

- (1) Assets that are expected to be realized, or intended to be sold or consumed, in the Company's normal operating cycle.
- (2) Assets that are held mainly for the purpose of trading.
- (3) Assets that are expected to be realized within 12 months after the reporting period.
- (4) Cash or cash equivalents, except those are restricted from being swapped or used to repay liabilities beyond 12 months after the end of the reporting period, and those with restricted uses.

Liabilities that satisfy any of the following criteria are classified as current liabilities; liabilities that are not classified as current are classified as non-current liabilities:

- (1) Liabilities that are expected to be repaid in the Company's normal operating cycle.
- (2) Liabilities that are held mainly for the purpose of trading.
- (3) Liabilities that are expected to be repaid within 12 months after the reporting period.
- (4) Liabilities where the repayment terms cannot be unconditionally beyond 12 months after the reporting period. Liabilities with terms that give counterparties the option to be repaid by the issue of equity instruments do not affect their classification.

6. Cash and cash equivalents

Cash and cash equivalent refer to cash on hand, demand deposit, and short-term and highly liquid time deposits or investments (including time deposits with terms equal to or less than

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

12 months) that are readily convertible into known amounts of cash, and are subject to an insignificant risk of changes in value.

7. Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to a financial instrument contract.

Financial assets and liabilities subject to IFRS 9 - "Financial Instruments" are measured at fair value at initiation. Transaction costs that are directly attributable to the acquisition or issuance of financial assets and liabilities (except for financial assets and liabilities at fair value through profit or loss) are added to or deducted from the fair value of the respective asset/liability.

(1) Recognition and measurement of financial assets

Regular transactions of financial asset are recognized and derecognized using trade date accounting.

The Company classifies financial assets into those that are carried at amortized cost, at fair value through other comprehensive income, and at fair value through profit or loss based on the two considerations below:

- A. Business model for managing the financial assets
- B. Characteristics of contractual cash flow for the financial assets

Financial assets at amortized costs

Financial assets that simultaneously satisfy the two conditions below are carried at amortized cost and presented on balance sheet as notes receivable, accounts receivable, installment accounts receivable, long-term installment accounts receivable, and other receivables:

- A. Business model for managing the financial assets: financial asset is held for the purpose of collecting contractual cash flow
- B. Characteristics of contractual cash flow for the financial assets: cash flow is solely used to pay principal and interests on outstanding principal

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

These financial assets (excluding those that are associated with hedge) are subsequently carried at amortized cost {i.e. the initial amount less principals repaid, plus/less cumulative amortization of differences between the initial amount and the maturity amount (calculated using the effective interest method), and adjusted for loss provisions}. Upon derecognition, amortization, or recognition of impairment gains/losses, the gains or losses are recognized in profit or loss.

Interests calculated using the effective interest method (i.e. by multiplying the book value of financial asset with effective interest rate) or under the following circumstances are recognized in profit or loss:

- A. Purchased or originated credit-impaired financial assets, where interest is calculated by multiplying the cost of financial assets after amortization with credit-adjusted effective interest rate.
- B. Subsequent impairment of financial asset that does not meet the above description, where interest is calculated by multiplying the cost of financial assets after amortization with effective interest rate.

Financial assets at fair value through other comprehensive income

Financial assets that simultaneously satisfy the two criteria below are measured at fair value through other comprehensive income, and presented on the balance sheet as financial assets at fair value through other comprehensive income.

- A. Business model for managing the financial assets: financial asset is held for collecting contractual cash flow and sale
- B. Characteristics of contractual cash flow for the financial assets: cash flow is solely used to pay principal and interests on outstanding principal

Gains and losses associated with this type of financial assets are recognized in the following manner:

- A. Prior to derecognition or reclassification, gains and losses are recognized in other comprehensive income, except for impairment gains/losses and foreign exchange gains/losses, which are recognized in profit or loss
- B. Upon derecognition, all cumulative gains/losses previously recognized in other comprehensive income are reclassified from equity to profit or loss and treated as a reclassification adjustment

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

C. Interests calculated using the effective interest method (i.e. by multiplying the book value of financial asset with effective interest rate) or under the following circumstances are recognized in profit or loss:

- (a) Purchased or originated credit-impaired financial assets, where interest is calculated by multiplying the cost of financial assets after amortization with credit-adjusted effective interest rate.
- (b) Subsequent impairment of financial asset that does not meet the above description, where interest is calculated by multiplying the cost of financial assets after amortization with effective interest rate.

For equity instruments that are subject to IFRS 9 but are neither held for trading nor recognized as acquirer's contingent consideration under IFRS 3 - Business Combinations, a (irrevocable) choice can be made at initial recognition to account for subsequent fair value changes in other comprehensive income. Amounts presented in other comprehensive income cannot be subsequently reclassified into profit or loss (upon disposal of the equity instrument, amounts previously accumulated under other equity item are reclassified directly into retained earnings); these instruments are presented on balance sheet as financial assets at fair value through other comprehensive income. Dividends from investments are recognized in profit or loss, unless the dividends clearly represent a partial recovery of the investment cost.

Financial assets at fair value through profit or loss

With the exception of financial assets that are carried at amortized cost or measured at fair value through other comprehensive income for satisfying the special criteria mentioned above, all other financial assets are measured at fair value through profit or loss, and presented on balance sheet at fair value through profit or loss.

This category of financial assets is measured at fair value. Gains or losses arising from remeasurement are recognized in profit or loss. The amount of gains and losses recognized in profit or loss includes all dividends or interests collected on the financial asset.

(2) Impairment of financial assets

The Company recognizes and measures the loss provisions for debt instrument investments held at fair value through other comprehensive income and financial assets carried at amortized cost at an amount equal to expected credit loss. Loss provisions on debt instrument investments held at fair value in other comprehensive income are

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

recognized in other comprehensive income and do not reduce the book value of investment.

The Company measures expected credit losses after taking into account of the following:

- A. An unbiased and probability-weighted amount determined after assessing the possible outcomes
- B. Time value of monetary
- C. Rational and verifiable information about past event, current situation, and future economic forecast (that can be obtained on the balance sheet date without incurring excessive cost or input)

Loss provisions are measured using the methods explained below:

- A. At an amount equal to 12-month expected credit loss: applies to financial assets that exhibit no significant increase in credit risk since initial recognition, or those that are considered to be of low credit risk as at the balance sheet date. This method also applies to accounts that had loss provisions measured based on lifetime expected credit losses in the previous reporting period, but no longer meets the condition of having exhibited significant increase in credit risk since initial recognition as at the current balance sheet date.
- B. At an amount equal to lifetime expected credit losses: applies to financial assets that exhibit significant increase in credit risk since initial recognition, or purchase of originated credit-impaired financial assets.
- C. For accounts receivable or contractual assets that arise from the transactions defined in IFRS 15, the Company measures loss provisions at an amount equal to lifetime expected credit losses.
- D. For lease receivable that arises from the transactions defined in IFRS 16, the Company measures loss provisions at an amount equal to lifetime expected credit losses.

On each balance sheet date, the Company examines financial instruments for any change in default risk between the balance sheet date and the date of initial recognition, and in doing so evaluates whether there is significant increase in the credit risk of financial instrument since initial recognition. Please see Note XII for credit risk-related information.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

(3) Derecognition of financial assets

Financial assets that satisfy any of the following criteria are derecognized:

- A. When contractual entitlement to receive cash flow from the asset has ended.
- B. When the financial asset has been transferred along with virtually all risks and returns associated with the ownership of the asset.
- C. When control of the asset has been transferred, even if the Company does not transfer or retain virtually all risks and returns associated with the asset.

When a financial asset is derecognized, the difference between book value and the sum of consideration received/receivable plus any cumulative gains or losses previously recognized in other comprehensive income is recognized in profit or loss.

(4) Financial liabilities and equity instruments

Classification of liability and equity

Debt and equity instruments issued by the Company are classified into financial liabilities or equity based on the essence of the contract agreement and definitions of financial liabilities and equity instrument.

Equity instrument

Equity instrument refers to any contract that represents residual interests after the Company deducts all of its liabilities from its assets. Equity instruments issued by the Company are recognized at the amount of proceeds received net of direct issuing costs.

Financial liabilities

Financial liabilities subject to IFRS 9 are classified as financial liabilities at fair value through profit or loss or financial liabilities at amortized cost at initiation.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities that are held for trading and designated to be measured at fair value through profit or loss.

Financial liabilities are classified as held for trading if it satisfies any of the following criteria:

- A. Acquired mainly for the purpose of being sold in the short term.
- B. Having been recognized at initiation as part of a portfolio of identifiable financial instruments under collective management, and there is evidence to suggest that the portfolio is being traded for short-term profits; or
- C. Exhibits the characteristics of a derivative instrument (except for financial guarantee contracts or derivative instruments designated for effective hedge).

Contracts that contain one or multiple embedded derivative instruments can be designated as hybrid (combined) contracts, and presented as financial liabilities at fair value through profit or loss. These instruments are designated to be measured at fair value through profit or loss at initiation if more relevant information can be obtained in one of the following situations:

- A. Designation would eliminate or significantly reduce discrepancies arising from measurement or recognition; or
- B. A group of financial liabilities or a group of financial assets and liabilities that are managed and evaluated performance based on fair value, as per risk management guidelines or investment strategy that are in written form, and that information of the investment portfolio provided internally to the management of the Company is also based on fair value.

Gains and losses arising from remeasurement of this category of financial liabilities are recognized in profit or loss. The amount of gains and losses recognized in profit or loss includes all interests paid on the financial liability.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Financial liabilities at amortized costs

Financial liabilities at amortized costs include payables and loans, which are subsequently measured using the effective interest rate method after initial recognition. When financial liabilities are derecognized from balance sheet and when amortization is provided using the effective interest rate method, the corresponding gains, losses, and amortizations are recognized in profit or loss.

Calculation of amortized costs takes into consideration discounts or premiums at the time of acquisition and transaction costs.

Derecognition of financial liabilities

Financial liabilities are derecognized from balance sheet when obligations have been relieved, canceled, or voided.

When the Company engages a creditor in a swap of debt instruments with significant discrepant terms, or makes significant modification to some or all terms of existing financial liability (whether due to financial distress or not), the effects are accounted by derecognizing the original liability and recognizing the new liability at the same time. When derecognizing financial liability, differences between the book value and the considerations paid/payable (including non-cash assets transferred or liabilities assumed) are recognized in profit or loss.

(5) Offset of financial assets and liabilities

Financial assets and financial liabilities may be offset against each other and reported in the balance sheet in net amount only when the entity is legally entitled to do so and has the intention to settle assets and liabilities in net amount or to realize the asset and settle the liability at the same time.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

8. Fair value assessment

Fair value refers to the price that market participants are able to receive for selling an asset, or the price that has to be paid to transfer a liability, in an orderly transaction on the measurement date. Fair value assessment assumes that the asset/liability is sold/transferred in one of the following markets:

- (1) The principal market for the asset or liability; or
- (2) The most advantageous market for the asset or liability, if the principal market does not exist

The principal or most advantageous market must be one that the Company has access to and is able to transact in.

Common assumptions that market participants adopt for pricing assets or liabilities are used when assessing fair value of an asset or liability. These assumptions assume that market participants all act in their best economic interest.

Fair value assessment of non-financial assets takes into consideration market participants' intent to make the highest and best use of the asset, or their intent to sell the asset to another market participant that will make the highest and best use in order to generate economic benefits.

The Company assesses fair value by adopting valuation techniques that are appropriate for the given circumstance and for which data can be obtained, while maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

9. Inventories

Accounted at acquisition cost; the cost of inventory is calculated using the weighted average method. Inventory is subsequently measured at the lower of cost or net realizable value item by item. Net realizable value refers to the balance of estimated selling price less any costs required to sell inventory under normal circumstances. Allowance for losses on inventory devaluation and obsolescence that is considered slow-moving or obsolete.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

10. Investments accounted for using the equity method

The Company accounts for subsidiaries in accordance with Article 21 of Regulations Governing the Preparation of Financial Reports by Securities Issuers, and presents them as "investments accounted for using the equity method" with valuation adjustments made as deemed necessary so that the amount of current profit/loss and other comprehensive income attributable to parent company shareholders are consistent between parent company only and consolidated financial statements, and that the amount of equity attributable to parent company shareholders are also consistent between parent company only and consolidated financial statements. These adjustments primarily take into consideration the consolidation treatments for subsidiary investments mentioned in IFRS 10 - "Consolidated Financial Statements" and differences in applicable IFRS rules for different reporting entities, and may involve debiting or crediting accounts such as "investments accounted for using the equity method," "share of profit or loss from subsidiaries, associated companies, and joint ventures accounted for using the equity method," and "share of other comprehensive income from subsidiaries, associated companies, and joint ventures accounted for using the equity method."

11. Property, plant and equipment

Property, plant and equipment are recognized at acquisition cost and presented net of accumulated depreciation and accumulated impairment. The abovementioned cost includes the cost of uninstalling, removing, and restoring property, plant and equipment at the given location, and any interest costs incurred on construction-in-progress. Significant compositions of property, plant, and equipment are depreciated separately. When making regular replacements for major component of property, plant, and equipment, the Company treats the replacement as a separate asset and recognizes depreciation based on the specified useful life and depreciation method. Book values of replaced assets are derecognized from balance sheet in accordance with IAS 16 - "Property, plant and equipment." Major repair costs that satisfy the recognition criteria are treated as replacement costs and recognized as part of the book value of property, plant and equipment. All other repair and maintenance expenditures are recognized in profit or loss.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Depreciation is provided on a straight-line basis over the estimated useful lives mentioned below:

|                                  |   |
|----------------------------------|---|
| Buildings                        | 51-56 years                                   |
| Accessory equipment of buildings | 6 years                                       |
| Transportation equipment         | 6 years                                       |
| Office equipment                 | 4-6 years                                     |
| Right-of-use assets/lease assets | The lower between lease tenor and useful life |
| Lease improvements               | The lower between lease tenor and useful life |
| Other equipment                  | 2-6 years                                     |

The entity derecognizes property, plant and equipment or any of its major components from balance sheet and recognizes in profit or loss when it disposes the asset or expects no further inflow of economic benefits from utilization or disposal of the asset.

Residual value, useful life, and depreciation method of property, plant and equipment are evaluated at the end of each financial year. If the expected value differs from previous estimates, the difference is treated as a change in accounting estimate.

## 12. Lease

The Company evaluates whether a contract meets the criteria of (or contains) lease on the day of establishment. A contract is considered as (or contains) lease if it involves a transfer of control over identified assets for a period of time in exchange for consideration. To determine whether a contract transfers the right to control the use of an identified asset for a period of time, the Company evaluates whether the following two conditions are met throughout the entire period of use:

- (1) The user has the right to obtain substantially all of the economic benefits from using the identified asset; and
- (2) The user has the right to determine how identified asset is used.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

For contracts that meet the criteria of (or contain) lease, the Company treats every lease component in the contract as a standalone lease, and accounts for non-lease components separately. For a contract that contains a lease component and one or multiple additional lease or non-lease components, the Company separates relative standalone price of each lease component from total standalone price of non-lease components, and allocates consideration to lease components. Relative standalone prices of lease and non-lease components are determined based on the price received by lessor (or supplier of similar nature) for the particular component (or similar component). If observable standalone prices are not readily available, the Company will maximize the use of observable information to estimate the standalone price.

Where the Company is the lessee

Except for leases that meet the criteria for and are accounted as short-term lease or lease of low-value asset, the Company recognizes right-of-use assets and lease liabilities on all lease contracts where it is the lessee.

On the commencement date, the Company measures lease liabilities at the present value of unpaid lease payments outstanding on that day. Lease payments are discounted at the implicit interest rate if it can be determined easily. If the implicit interest rate cannot be determined easily, the lessee's incremental borrowing rate is used instead. Lease payments to be included in the calculation of lease liabilities on the commencement date include the following payments outstanding on that day that are relevant to the right-of-use of the underlying asset over the lease tenor:

- (1) Fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- (2) Variable lease payments that are determined by certain index or rate (which are initially measured using index or rate as at the commencement date);
- (3) Amounts that the lessee expects to pay under guaranteed residual value;
- (4) Exercise price for the purchase option, provided that the Company is reasonably certain to exercise such option; and
- (5) Penalties that have to be paid upon termination of lease, if the lease term reflects the lessee's intent to exercise the termination option.

After the commencement date, the Company measures lease liabilities at amortized cost basis and uses the effective interest method to increase the book value of lease liabilities to reflect the interest expense on lease liabilities. Lease payments reduce the book value of

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

lease liabilities.

The Company measures right-of-use assets at cost on the commencement date; the cost of right-of-use asset includes:

- (1) Initial measured amount of lease liabilities;
- (2) Any lease payment made on or before the commencement date, less any lease incentive received;
- (3) Any direct cost incurred by the lessee at initiation; and
- (4) Estimated cost for the lessee to dismantle, remove the underlying asset, and restore its original location, or to restore the underlying asset to the state specified in the terms and conditions of the lease agreement.

Right-of-use assets are subsequently measured at cost less accumulated depreciation and accumulated impairment loss; in other words, the cost method is used to measure right-of-use assets.

If ownership of the underlying asset is due to be transferred to the Company at the end of the lease tenor, or if the cost of right-of-use asset already reflects the Company's intent to exercise the option to purchase, the Company shall begin recognizing depreciation on right-of-use assets from the commencement date until the end of useful life. Otherwise, the Company is required to recognize depreciation from the commencement date until the end of useful life of the right-of-use asset or until the end of the lease tenor, whichever the earlier.

The Company adopts IAS 36 - "Asset impairment" to determine whether right-of-use assets exhibit signs of impairment and account for any impairment losses identified.

Except for leases that meet the criteria for and are accounted as short-term lease or lease of low-value asset, the Company recognizes both right-of-use assets and lease liabilities on the balance sheet, and lease-related depreciation and interest expenses on the statement of comprehensive income.

The Company accounts lease payments associated with short-term lease and lease of low-value asset as expense over the lease tenor on a straight-line basis or using an alternative systematic approach.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Where the Company is the lessor

The Company classifies each lease arrangement into an operating lease or financing lease on the contract establishment date. A lease is classified as financial lease if virtually all risks and returns associated with ownership of the underlying asset are transferred; otherwise, the lease is classified as an operating lease. On the commencement date, the Company recognizes assets held under financial lease arrangement on balance sheet, and presents financial lease receivable at the amount of net lease investments.

For contracts that contain both lease component and non-lease component, the Company adopts IFRS 15 and allocates considerations of contracts accordingly.

The Company recognizes lease payments received from operating leases as rental income on a straight-line basis or using alternative systematic basis. In an operating lease, variable lease payments that are not derived from any particular index or rate are recognized as rental income at the time occurred.

13. Intangible asset

Intangible assets that are acquired separately are measured at cost at initiation. For intangible assets acquired through business combination, cost is determined as fair value as of the acquisition date. After initial recognition, book value of intangible assets is subsequently presented at cost less accumulated amortization and accumulated impairment loss. Intangible assets generated internally that do not meet the recognition criteria are not capitalized, but recognized in profit or loss at the time occurred.

Intangible assets are distinguished into those with finite useful lives and those with indefinite useful lives.

Finite useful life intangible assets are amortized over the number of useful years, and subjected to impairment tests if there are signs of impairment. Useful life and method of amortization for finite useful life intangible assets are reviewed at the end of each financial year. If an asset's expected useful life differs from the previous estimate or if there is a change to how future economic benefits are realized, the Company will adjust the period and method of amortization and treat the adjustment as a change in accounting estimate.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Indefinite useful life intangible assets are not amortized, but are subjected to impairment tests as a standalone asset or as part of the cash-generating unit yearly. Indefinite useful life intangible assets are evaluated each year to determine whether there are events or circumstances that continue to support the assets' useful life are indefinite. If changing from indefinite useful life to finite useful life that apply will be postponed.

Gains or losses arising from the derecognition of intangible assets are recognized in profit or loss.

Computer software

Cost of computer software is amortized on a straight-line basis over the estimated useful life (1 to 5 years).

|   | Computer software   |
|---|---|
| Useful life                                 | Finite  |
| Amortization method                         | Amortized on a straight-line basis over the estimated useful life |
| Internally generated or externally acquired | Externally acquired   |

14. Impairment on non-financial assets

All assets subject to IAS 36 - "Asset impairment" are evaluated whether there is a sign of impairment at the end of each reporting period. If there is a sign of impairment or a yearly impairment tests on particular asset is needed, the Company will conduct the impairment tests as a standalone asset or as part of the cash-generating unit. Impairment losses are recognized if the impairment test shows book value of the asset or cash-generating unit exceeds its recoverable amount. Recoverable amount is the higher between the net fair value and the utilization value.

For assets except for goodwill, the Company conducts regular assessments at the end of each reporting period to determine whether impairment losses recognized in previous periods have reduced or no longer exist. If so, the Company immediately estimates the recoverable amount of the asset or cash-generating unit. Impairment losses are reversed if the recoverable amount increases due to a change in estimated service potential of the underlying asset. However, the asset's book value after reversal of impairment losses cannot exceed the amount of book value less depreciation or amortization before the impairment took place.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Impairment losses and reversal gains from continuing operations are recognized in profit or loss.

15. Provisions

Provisions are recognized on current obligations (legally or constructive) given rise by a past event, for which the Company is very likely to incur an outflow of economic benefit or resource to settle such an obligation, and that the amount of obligation can be estimated reliably. When the Company expects some or all of its provisions to be reimbursed, the Company will recognize assets separately only when the reimbursement is almost confirmed. In circumstances where time value of money has a significant impact, the provision is discounted using the pre-tax interest rate that appropriately reflects the specific risk characteristics of the liability. When discounting, any increase in the amount of liability due to passage of time is recognized as borrowing cost.

Provisions for warranty

Provisions for warranty are estimated base on the terms of product sale contracts, and the management's best estimate of future economic benefit outflows of warranty obligations (based on historical warranty experience).

16. Revenue recognition

Revenue from contracts with customers mainly involves sale of merchandise and rendering of service. Accounting treatments are as explained below:

Sales of merchandise

The Company recognizes revenue on sale of merchandise when the promised merchandise has been delivered to the customer and that the customer has control of the merchandise (i.e. the customer is able to make use of the merchandise and access virtually all remaining benefits on the merchandise). Most of the merchandises sold are electronic equipment of high unit price, for which revenues are recognized based on prices stated in individual contracts. Other merchandises are often sold with discount (based on sales volume accumulated within a defined period), therefore revenue is recognized at prices stated in individual contracts less estimated discounts. The Company estimates how volume-based discounts affect variable consideration using previous experience and expected value.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

However, variable consideration is only taken into account if, and to the extent that, it is highly probable that its inclusion will not result in a significant revenue reversal in the future when the uncertainty has been subsequently resolved. Meanwhile, expected volume discount is recognized as refund liabilities in period of agreement.

Warranty represents the Company's assurance that the merchandise supplied will function within customers' expectations, and is recognized according to IAS 37.

The Company sells merchandises with a credit term of 30-120 days. For most contracts, accounts receivable is recognized when the Company transfers control of merchandise and obtains an unconditional entitlement to receive consideration. Such accounts receivable is usually short in duration and there is no significant financial component. For some contracts that merchandise is transferred to customer but does not obtain unconditional entitlement to receive consideration yet, the Company would recognize contract assets instead. According to IFRS9, loss provisions on contract assets should be measured based on Lifetime Expected Credit Losses.

Rendering of service

The services provided by the Company are mainly maintenance, warranty, and design. Such services are priced individually or through negotiation, and provided during the contract period. Service income is recognized over time, considering that the Company renders services in a period of time specified in contract and customers generate benefits from product throughout contract duration, thereby the performance obligation is fulfilled progressively over time, and service income is recognized over time.

For the majority of the Company's contracts, consideration is collected over equal installments after services are rendered. Contractual assets are recognized when services are rendered to customers without unconditional entitlement to collect consideration. However, in certain contracts where partial consideration is collected from customers in advance at the time of signing, the Company bears the obligation to provide subsequent services and therefore recognizes contractual liabilities.

In the above situation, the reclassification of contractual liabilities into income generally do not exceed one year, and hence has not given rise to significant financing component.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

17. Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction, or production of qualifying assets are capitalized into part of the cost of the respective assets. All other borrowing costs are expensed in the period incurred. Borrowing cost includes interest and other costs incurred in relation to the borrowing of capital.

18. Post-employment benefit plans

The Company's retirement policy applies to all permanent employees. All pension contributions are placed entirely under the management of the Labor Pension Supervisory Committee and deposited into a dedicated pension fund account. Since the above pension fund is being held under the name of the Labor Pension Supervisory Committee, it is completely separate from the Company's assets and hence excluded from the parent company only financial statements presented above.

For employees under the Post-employment benefit plans of defined contribution plan, the Company makes monthly pension contributions totaling no less than 6% of employees' salary. The amounts contributed are recognized as current period expense.

For employees that are subject to Post-employment benefit plans of defined benefit plan, provisions are made at the end of the reporting period based on actuarial report using the Projected Unit Credit method. Remeasurement of net defined benefit liabilities (assets) includes return on plan asset and any change in the effect of asset cap, less the amount of net interest on the net defined benefit liabilities (assets) and actuarial gains/losses. Remeasurement of net defined benefit liabilities (assets) is recognized in other comprehensive income in the periods they occur, and recognized immediately into retained earnings. Service costs for the previous period represent changes in the present value of defined benefit obligations due to plan amendment or curtailment, and are recognized as expense on the earlier of the two dates below:

- (1) When the plan is amended or curtailed; and
- (2) When the Company recognizes related restructuring costs or termination benefits.

Net interest on net defined benefit liabilities (assets) is determined by multiplying net defined benefit liabilities (assets) with the discount rate. Both variables are determined at the beginning of annual reporting period, and changes in net defined benefit liabilities (assets) due to contributions and benefit payments during the period are evaluated thereafter.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

19. Income tax

Income tax expense (benefit) is the aggregate amount included in the determination of profit or loss for the period in respect of current income tax and deferred income tax.

Current income tax

Current income tax liabilities (assets) for the current and previous periods are measured using statutory or substantively enacted tax rates and tax laws at the end of the reporting period. Current income taxes that arise in relation to accounts recognized in other comprehensive income or directly in equity are also recognized in other comprehensive income or in equity respectively instead of profit or loss.

Additional income tax for undistributed earnings is recognized as income tax expense on the date when the distribution proposal is approved in the shareholder's meeting.

Deferred income tax

Deferred income tax is recognized on temporary differences between the tax basis of assets and liabilities and book value shown in the balance sheet as of the end of the reporting period.

All taxable temporary differences are recognized as deferred income tax liabilities, except for the two circumstances below:

- (1) Initial recognition of goodwill; or initial recognition of assets or liabilities that do not arise from transactions of the corporate entity, provided that doing so affects neither accounting profit nor taxable profit (loss) at the time of transaction.
- (2) Taxable temporary difference that arises from investment in subsidiaries, provided that the timing of reversal can be controlled and the difference is very unlikely to reverse in the foreseeable future.

Deferred income tax assets are recognized on deductible temporary differences, unused tax losses, and carry forward of unused tax credit to the extent that the Company is likely to earn taxable income to offset them in the future, except for the two circumstances below:

- (1) Deductible temporary difference arising from initial recognition of an asset or liability that is unrelated to transactions of the corporate entity, provided that doing so affects neither accounting profit nor taxable profit (loss) at the time of transaction;

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

- (2) Deductible temporary difference arising from investment in subsidiaries, which is recognized only to the extent that the difference is very likely to be reversed in the foreseeable future and that sufficient taxable income can be earned to realize the temporary difference.

Deferred income tax assets and liabilities are measured using tax rate that is expected to apply in the year when the asset is realized or the liability is settled. This tax rate is determined based on the tax rate and tax laws that have been enacted or substantively enacted at the end of the reporting period. Deferred income tax liabilities and assets represent tax impacts of the method by which the entity expects to recover/settle the book value of its assets and liabilities at the end of the reporting period. Deferred income taxes unrelated to any profit or loss account are not recognized in profit or loss, but are instead recognized in other comprehensive income or directly in equity depending on the nature of the transaction. Deferred income tax asset is re-examined and recognized at the end of each reporting period.

Current portions of deferred income tax assets and liabilities can be offset against each other only if the entity is legally entitled to do so, and that the deferred income taxes are attributed to the same taxpayer and the same tax authority.

(V) Sources of Uncertainty to Significant Accounting Judgments, Estimates, and Assumptions

When preparing parent company only financial statements, the management is required to make judgments, estimates, and assumptions as at the end of the reporting period, which will affect the amounts of income, expenses, assets, and liabilities reported and disclosure of contingent liabilities. Uncertainties associated with these significant assumptions and estimates may cause the entity to make significant adjustments to the book value of assets or liabilities in the future.

1. Judgment

When applying accounting policies for the preparation of financial statements, the management is required to make several significant judgments.

These include:

Operating lease commitments - where the Company is the lessor

Lease arrangements in which the Company retains significant risk and return associated with property ownership, according to the assessments on the terms of the lease agreement, are

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

accounted as operating leases.

2. Estimates and assumptions

Estimates and assumptions made about the future at the end of the reporting period for significant but uncertain sources of information may result in significant risks for material adjustments to the book value of assets and liabilities in the next financial year. Explanation is as follows:

(1) Fair value of financial instruments

When fair value of a financial asset and financial liability shown on balance sheet cannot be obtained through active market, the fair value will be determined using valuation technique, such as the income approach (e.g. discounted cash flow model) or market approach. Changes in the assumptions used in these models will affect the fair value of financial instruments reported. Please see Note XII for more details.

(2) Inventories valuation

Due to the fact that inventory is valued at the lower of cost or net realizable value item by item, the Company is required to exercise judgment and estimates to determine the net realizable value of inventory at the end of the reporting period.

Due to rapidly changing technologies, the Company estimates the net realizable value of inventory for normal waste, obsolescence and market value at the end of reporting period and then writes down the cost of inventories to net realizable value. Inventory valuation is estimated primarily based on inventory characteristics, utilization value, historical experience, and market price, and therefore may give rise to significant changes. See Note VI for more details.

(3) Post-employment benefit plans

Pension cost and present value of defined benefit obligations of Post-employment benefit plans are determined using actuarial valuations. The actuarial valuation involves several different assumptions, including: discount rate and expected salary changes. Please see Note VI for details on the assumptions used to measure pension cost and defined benefit obligations.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

(4) Revenue recognition - sales return and discount

The Company estimates sales return and discount based on historical experience and other known factors, and accounts them as contra items to operating revenues when merchandise is sold. The aforementioned estimates of sales return and discounts are based on the amount of the accumulated revenue recognized in major reversals is highly unlikely to happen based on the premise. See Note VI for more details.

(5) Receivables - estimation of impairment losses

The Company estimates impairment loss of receivables by measuring the lifetime expected credit losses. Credit loss is determined as the present value of differences between contractual cash flow that is due to the Company under contracts (book value) and cash flow the Company expects to receive (after evaluating forward-looking information), but considering that the effect of discounting is insignificant for short-term receivables, credit loss is measured using the undiscounted differences. Significant impairment losses may arise if actual cash flow is less than expectation in the future. See Note VI for details.

(6) Income tax

Uncertainty of income tax lies in the interpretation of complex tax laws and the amount and timing of future taxable income. Due to the wide range of international business relationships and the long-term nature and complexity of contracts, differences between the actual outcome and the assumptions made previously or future changes to such assumption may necessitate future adjustments to income tax benefits and expenses already recognized. The Company establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it operates. The amount of provision is recognized after taking into account different factors such as: past tax audit experience and the different interpretations of tax law between the subject of tax and the applicable tax authority. Differences in interpretation may give rise to various issues depending on where the Company is located.

Unused tax losses and tax credits carried into subsequent periods and deductible temporary differences are recognized as deferred income tax assets to the extent that the entity is very likely to earn taxable income to offset against. The amount of deferred income tax assets recognizable is determined based on the timing and level of future taxable income and taxable temporary differences, as well as future tax plans and strategies. See Note VI for details of deferred income tax assets that the Company had not recognized as at December 31, 2022.

| Total  | <u>\$54,291</u>          | <u>\$53,471</u>          |

(1) The Company held shares of Energy Trend Co., Ltd that underwent and completed the liquidation procedures on March 8, 2021. The Company obtained the capital reduction of NT\$50 thousand and the dividend income of NT\$4 thousand from the distribution of

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

its remaining surplus, and transferred the accumulated unrealized valuation loss of NT\$101 thousand at the time of disposal from other equity to retained earnings.

- (2) The Company acquired 195 thousand shares of Cloud Intelligent Operation, an unlisted company, in the third quarter of 2021, at a cost of NT\$1,950 thousand.
- (3) The Company acquired 2,000 thousand shares of Ausenior Information Co., Ltd., an unlisted company, in the first quarter of 2022, at a cost of NT\$26,000 thousand.
- (4) The Company recognized NT\$3,014 thousand and 1,819 thousand of dividend income for the years ended December 31, 2022 and 2021, respectively from investment in equity instruments at fair value through other comprehensive income held in possession. This income was related to investments that remained in possession as at the balance sheet date.
- (5) None of the Company's financial assets at fair value through other comprehensive income was placed as collateral.

4. Notes receivable

|  | December 31, 2022 | December 31, 2021 |
|--|-------------------|-------------------|
| Notes receivable - arising from operating activities | \$10,342          | \$3,885           |
| Less: loss provisions                                | -                 | -                 |
| Total  | <u>\$10,342</u>   | <u>\$3,885</u>    |

None of the Company's notes receivables was placed as collateral.

The Company assesses impairment according to IFRS 9. Please see Note VI.17 for information on loss provisions and Note XII for credit risk-related information.

5. Accounts receivable and installment accounts receivable

|  | December 31, 2022 | December 31, 2021 |
|--|-------------------|-------------------|
| Accounts receivable                            | \$369,602         | \$328,168         |
| Installment accounts receivable                | 120,677           | 139,132           |
| Less: Unrealized interest income - installment | (5,144)           | (9,019)           |

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

|                                       |           |           |
|---------------------------------------|-----------|-----------|
| accounts receivable                   |           |           |
| Accounts receivable - related parties | 452       | 2,157     |
| Subtotal (total book value)           | 485,587   | 460,438   |
| Less: loss provisions                 | (3,911)   | (13,914)  |
| Total                                 | \$481,676 | \$446,524 |

Expected recovery of installment accounts receivable is as follows:

|                     | December 31, 2022 | December 31, 2021 |
|---------------------|-------------------|-------------------|
| No more than 1 year | \$81,740          | \$66,724          |
| 1 to 2 years        | 30,165            | 44,330            |
| 2 years and above   | 8,772             | 28,078            |
| Total               | \$120,677         | \$139,132         |

None of the Company's accounts receivable was placed as collateral. Credit terms granted to customers are generally 30 days to 120 days after the end of the month of acceptance inspection.

The Company had accounts receivable and installment accounts receivable balance outstanding at NT\$485,587 thousand on December 31, 2022 and NT\$460,438 thousand on December 31, 2021. See Note VI.17 for information on loss provisions and Note XII for credit risk-related information.

6. Inventories

|                             | December 31, 2022 | December 31, 2021 |
|-----------------------------|-------------------|-------------------|
| Net inventory - merchandise | \$2,198,171       | \$1,772,741       |

Cost of inventory, consultation, and maintenance recognized as expenses for the years ended December 31, 2022 and 2021 were NT\$4,289,958 thousand and NT\$3,821,276 thousand respectively. These amounts included NT\$1,481 thousand of inventory devaluation and obsolescence losses for the year ended December 31, 2022, and NT\$1,328 thousand of gain on reversal of inventory devaluation and obsolescence for the year ended December 31, 2021, respectively.

Provisions for inventory devaluation and obsolescence as at December 31, 2022 and 2021 were reported at NT\$4,756 thousand and NT\$3,275 thousand, respectively.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

None of the above inventory was pledged as collateral.

7. Prepayments

|                        | <u>December 31, 2022</u> | <u>December 31, 2021</u> |
|------------------------|--------------------------|--------------------------|
| Prepaid purchases      | \$527,572                | \$365,037                |
| Other prepaid expenses | 57,713                   | 37,842                   |
| Total                  | <u>\$585,285</u>         | <u>\$402,879</u>         |

8. Investments accounted for using the equity method

Details of the Company's investments accounted for using the equity method:

| Name of investee                       | <u>December 31, 2022</u> |                                   | <u>December 31, 2021</u> |                                   |
|--|--------------------------|-----------------------------------|--------------------------|-----------------------------------|
|  | <u>Amount</u>            | <u>Percentage of shareholding</u> | <u>Amount</u>            | <u>Percentage of shareholding</u> |
| Stark Technology Inc. (USA)            | \$11,574                 | 100%                              | \$11,646                 | 100%                              |

14. Post-employment benefit plans

Defined Contribution Plans

The retirement policy that the Company has established in accordance with the "Labor Pension Act" introduces a defined contribution plan. According to the Labor Pension Act, the Company is required to make monthly pension fund contributions at an amount no less than 6% of employee's monthly salary. The Company has established a set of employee retirement policy according to the Labor Pension Act, and has been making monthly contributions to employees' pension fund accounts held with the Bureau of Labor Insurance at 6% of salary.

The amounts of recognized pension expenses related defined to contribution plan for the years ended December 31, 2022 and 2021 were NT\$24,328 thousand and NT\$22,874 thousand respectively.

Defined Benefit Plans

The pension policy that the Company has established in accordance with the "Labor Standards Act" introduces a defined benefit plan. Employees' pension benefits were paid based on their years of service and their average salaries during the one month when retirement is approved. Employees are awarded 2 pension basis points for every year of service under (including) 15 years, and 1 pension basis point for every year of service above 15 years, subject to a maximum of 45 pension basis points. The Company makes monthly pension contributions equivalent to 2% of employees' monthly gross salaries in accordance with the Labor Standards Act. These contributions are deposited into the dedicated account held with the Bank of Taiwan in the name of Labor Pension Fund Supervisory Committee. The Company also evaluates the balance of the above-mentioned labor pension fund account before the end of each year. In the event that the account is estimated to be short of balance to pay the amount of estimated pension benefits to workers who are expected to meet their retirement criteria in the following year, the Company is required to reimburse the shortfall in one contribution before the end of March the following year.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Assets are allocated according to Ministry of Labor's Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund. Fund assets are managed through a combination of self-management and mandate, using both active and passive medium-to-longer term investment strategies. The Ministry of Labor has imposed risk limits and control measures on market, credit, and liquidity risks, so that fund assets are not exposed to excessive risk while being given the flexibility to achieve target returns. Plan assets can only be allocated to investments that offer annual yields higher than the 2-year time deposit rate quoted by local banks. Shortfalls may be reimbursed by the public treasury subject to approval of the authority. Since the Company is not involved in the operation and management of the fund, it is unable to disclose the fair value of plan assets according to IAS 19 Section 142. As at December 31, 2022, the Company expected to make contributions totaling NT\$3,137 thousand to the defined benefit plan in the next year.

As at December 31, 2022 and 2021, weighted average duration of the Company's defined benefit obligations was 5 years and 9 years, respectively.

A breakdown of defined benefit plan costs recognized through profit or loss is explained in the chart below:

|  | For the year<br>ended December<br>31, 2022 | For the year<br>ended December<br>31, 2021 |
|--|--|--|
| Service costs for the current period                     | \$2,884                                    | \$2,886                                    |
| Net interest on net defined benefit liabilities (assets) | 232  | 130  |
| Service costs for the previous period                    | -  | 8,236                                      |
| Total  | <u>\$3,116</u>                             | <u>\$11,252</u>                            |

Reconciliation between present value of defined benefit obligations and fair value of plan assets:

|   | <u>December 31, 2022</u> | <u>December 31, 2021</u> | <u>January 1, 2021</u> |
|---|--------------------------|--------------------------|------------------------|
| Present value of defined benefit obligations  | \$155,339                | \$159,873                | \$150,208              |
| Fair value of plan assets                     | <u>(128,891)</u>         | <u>(125,636)</u>         | <u>(115,294)</u>       |
| Net defined benefit liabilities - non-current | <u>\$26,448</u>          | <u>\$34,237</u>          | <u>\$34,914</u>        |

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Below are the main assumptions used for the Company's defined benefit plan:

|                                  | December 31, 2022 | December 31, 2021 |
|----------------------------------|-------------------|-------------------|
| Discount rate                    | 1.17%             | 0.68%             |
| Expected rate of salary increase | 1.00%             | 1.00%             |

Sensitivity analysis per major actuarial assumption:

|  | 2022                                    |   | 2021                                    |   |
|--|---|---|---|---|
|  | Increase in defined benefit obligations | Decrease in defined benefit obligations | Increase in defined benefit obligations | Decrease in defined benefit obligations |
| 0.5% increase in the discount rate             | \$-                                     | \$3,777                                 | \$-                                     | \$5,396                                 |
| 0.5% decrease in the discount rate             | 4,197                                   | -                                       | 9,379                                   | -                                       |
| 0.5% rise in the expected salary increase rate | 4,177                                   | -                                       | 9,298                                   | -                                       |
| 0.5% fall in the expected salary increase rate | -                                       | 3,801                                   | -                                       | 5,405                                   |

The above-mentioned sensitivity analysis shows how reasonable changes in a single actuarial estimate (e.g.: discount rate or expected salary) may affect defined benefit obligations while other assumptions remain unchanged. However, there are limitations to this approach, as some actuarial assumptions are intercorrelated and it is rare to see only one actuarial assumption change in practice.

Methodology and assumption for sensitivity analysis of current period is consistent with those of the previous period.

## 15. Equity

### (1) Ordinary share

The Company had authorized capital of NT\$3,400,000 thousand (20,000 thousand shares of which were reserved for the exercise of employee warrants) as at December 31, 2022 and December 31, 2021. Each share carries a face value of NT\$10 and can be issued in multiple offerings. Paid-up capital amounted to NT\$1,063,603 thousand and outstanding shares totaled 106,360 thousand on all two dates. Each share is entitled to one voting right and the right to receive dividends.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

(2) Capital surplus

|  | December 31, 2022 | December 31, 2021 |
|--|-------------------|-------------------|
| Premium on consolidation                   | \$148,259         | \$148,259         |
| Premium on conversion of convertible bonds | 18,255            | 18,255            |
| Total                                      | <u>\$166,514</u>  | <u>\$166,514</u>  |

According to regulations, capital surplus cannot be used for any purpose other than reimbursing previous losses. If the Company has no cumulative losses, capital surpluses that arise from shares issued at premium and gifts received may be capitalized into share capital, up to a certain percentage of paid-in capital per year; these capital surpluses may also be distributed in cash among shareholders at the current ownership percentage.

(3) Earnings appropriation and dividend policy

According to the Articles of Incorporation, annual surpluses concluded by the Company are first subject to taxation and reimbursement of previous losses, followed by a 10% provision for legal reserve (unless legal reserves have accumulated to an amount equal to share capital). Any surpluses remaining shall then be subject to provision or reversal of special reserve, as the laws may require. The residual balance can then be added to unappropriated earnings carried from previous years and retained or distributed to shareholders as a form of profit sharing, subject to resolution in a shareholder meeting.

Shareholders' profit sharing can be paid in cash or shares; however, the cash portion shall be no less than 10% of total dividends.

The Company operates in the high-tech industry and is susceptible to the industry's enterprise life cycle. Dividends shall be allocated after taking into consideration several factors including: current and future investment environment, capital requirement, domestic/foreign competition, capital budget, shareholders' expectations, balanced dividends, and the Company's long-term financial plan. Dividend distribution plans are to be proposed by the board of directors and presented for final resolution in shareholder meeting on a yearly basis.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

The Company will be required to provide additional special reserves to make up for the shortfall between the balance of special reserves provided during the first-time adoption of IFRS and the net balance of other contra equity items in years it decides to distribute available earnings. If there is any subsequent reversal of the net decrease in other equity, the reversed part of the net decrease in other equity may be reversed to the special reserve, and be distributed to investors.

In accordance with the order via a letter issued by the FSC on March 31, 2021 referenced Jin-Guan-Zheng-Fa No. 1090150022, if the International Financial Reporting Standards is adopted for the first time, for the unrealized revaluation value addition and cumulative translation adjustment (benefit) in the account which are transferred to retained earnings due to the adoption of the exemption item of IFRS 1 "First Adoption of IFRS" on the conversion date, a special reserve shall be allocated. Subsequently, when the company uses, disposes of, or reclassifies the relevant assets, it may reverse the proportion of the original special reserve for distribution of earnings.

As at December 31, 2022, the Company had NT\$144 thousand of special reserve that were provided due to first-time adoption of IFRS.

The Company's 2022 and 2021 earnings appropriation proposal and dividends per share were proposed and resolved during the board of directors meeting held on February 23, 2023 and annual general meeting held on May 27, 2022, respectively. Details are as presented below:

|                                      | Earnings appropriation plan |          | Dividends per share (NTD) |        |
|--------------------------------------|-----------------------------|----------|---------------------------|--------|
|                                      | 2022                        | 2021     | 2022                      | 2021   |
| Legal reserve                        | \$73,885                    | \$63,872 |                           |        |
| Cash dividends on<br>ordinary shares | 665,815                     | 597,745  | \$6.26                    | \$5.62 |

Please refer to Note VI.19 for the amount of employee remuneration and director remuneration recognized and the basis of estimation.

(4) Non-controlling interests: None.

Timing of revenue recognition:

|                    |                    |                    |
|--------------------|--------------------|--------------------|
| At a point in time | \$3,949,429        | \$3,547,764        |
| Over time          | 1,845,431          | 1,575,325          |
| Total              | <u>\$5,794,860</u> | <u>\$5,123,089</u> |

(2) Contract balance

A. Contract assets - current

|   | December 31, 2022 | December 31, 2021 | January 1, 2021  |
|---|-------------------|-------------------|------------------|
| Sales of merchandise and rendering of service | \$244,763         | \$187,000         | \$291,268        |
| Less: loss provisions                         | (3,794)           | (11,027)          | (12,173)         |
| Total   | <u>\$240,969</u>  | <u>\$175,973</u>  | <u>\$279,095</u> |

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Major changes in the balance of contract assets for the years ended December 31, 2022 and 2021 are explained below:

|  | For the year<br>ended December<br>31, 2022 | For the year<br>ended December<br>31, 2021 |
|--|--|--|
| Amount of beginning balance reclassified<br>into accounts receivable in the current period | <u>\$(168,563)</u>                         | <u>\$(268,800)</u>                         |
| Changes were measured based on level of<br>completion                                      | <u>\$226,326</u>                           | <u>\$164,532</u>                           |

The Company assesses impairment according to IFRS 9. Please see Note VI.17 for information on loss provisions and Note XII for credit risk-related information.

B. Contract liabilities - current

|  | December 31, 2022  | December 31, 2021 | January 1, 2021  |
|--|--------------------|-------------------|------------------|
| Sales of merchandise and<br>rendering of service | <u>\$1,307,406</u> | <u>\$972,764</u>  | <u>\$981,388</u> |

Major changes in the balance of contract liabilities for the years ended December 31, 2022 and 2021 are explained below:

|  | For the year<br>ended December<br>31, 2022 | For the year<br>ended December<br>31, 2021 |
|--|--|--|
| Amount of beginning balance reclassified<br>into revenue in the current period   | <u>\$(784,588)</u>                         | <u>\$(783,463)</u>                         |
| Current increase in advanced receipt (less<br>amounts incurred and reclassified into<br>revenue in the current period) | <u>\$1,119,230</u>                         | <u>\$774,839</u>                           |

(3) Allocation of transaction price into unfulfilled contractual obligations

As at December 31, 2022, the Company had allocated NT\$5,212,201 thousand of transaction price into unfulfilled (including partially unfulfilled) contractual obligations; 84.21% of which are expected to be recognized as revenue in 2023, whereas the remainder will be recognized as revenue on and after 2024.

| Total   | <u>\$1,651</u>                             | <u>\$(1,188)</u>                           |

Please see Note XII for credit risk-related information.

All of the Company's contract assets and receivable (including notes receivable, accounts receivable, and installment accounts receivable) have loss provisions measured based on Lifetime Expected Credit Losses. Credit loss is recognized as the difference between the book value of contract assets/accounts receivable and the present value of expected cash flow (prospective information). For short-term receivables, however, credit loss is not measured using present value difference as the effect of discounting is insignificant. Loss provisions as at December 31, 2022 and 2021 are explained below:

Contract assets and accounts receivables are divided into groups based on counterparties' credit rating, location, and industry, and a provision matrix is used to measure loss provisions. Relevant details are presented below:

Note 1: All notes receivable and contract assets are not past due; loss provisions are measured based on Lifetime expected credit losses.

Note 2: The Company measures loss provision for individual counterparties based on Lifetime Expected Credit Losses. Credit loss is recognized as the difference between the book value of contract assets/accounts receivable and the present value of expected cash flow.

Changes in loss provisions on contractual assets, notes receivable, and accounts receivable for the years ended December 31, 2022 and 2021 are explained below:

|   | Contract assets | Accounts receivable | Installment accounts receivable |
|---|-----------------|---------------------|---------------------------------|
| January 1, 2022                                     | \$11,027        | \$5,820             | \$8,094                         |

(All amounts in NTD thousands unless otherwise specified)

|                   | Contract assets | Accounts receivable | Installment accounts receivable |
|-------------------|-----------------|---------------------|---------------------------------|
| December 31, 2021 | \$11,027        | \$5,820             | \$8,094                         |

18. Lease

(1) Where the Company is the lessee

The Company leases several types of asset, including buildings, transportation equipment, and office equipment. Lease tenor of each contract is from 1 to 10 years.

Effects of leases on the Company's financial position, financial performance, and cash flow are explained below:

A. Amounts recognized in the balance sheet

(a) Right-of-use assets

Book value of right-of-use assets

|                          | December 31, 2022 | December 31, 2021 |
|--------------------------|-------------------|-------------------|
| Buildings                | \$11,824          | \$17,974          |
| Transportation equipment | 12,435            | 2,904             |
| Office equipment         | 1,135             | 1,424             |
| Total                    | \$25,394          | \$22,302          |

Right-of-use assets increased by NT\$16,734 thousand and NT\$3,304 thousand for the years ended December 31, 2022 and 2021, respectively.

(b) Lease liabilities

|                   | December 31, 2022 | December 31, 2021 |
|-------------------|-------------------|-------------------|
| Lease liabilities | \$25,729          | \$22,943          |
| Current           | \$9,815           | \$11,232          |
| Non - current     | 15,914            | 11,711            |
| Total             | \$25,729          | \$22,943          |

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Please see Note VI.20(4) - Financial cost for interest expenses on lease liabilities for the year ended December 31, 2022, and Note XII.5 - Liquidity risk management for maturity analysis of lease liabilities as at December 31, 2022.

B. Amount recognized in statement of comprehensive income

Depreciation of right-of-use assets

|                          | For the year<br>ended December<br>31, 2022 | For the year<br>ended December<br>31, 2021 |
|--------------------------|--|--|
| Buildings                | \$8,850                                    | \$8,724                                    |
| Transportation equipment | 4,041                                      | 4,223                                      |
| Office equipment         | 751  | 2,396                                      |
| Total                    | <u>\$13,642</u>                            | <u>\$15,343</u>                            |

C. Income, expenses, and losses relating to lease activities as a lessee

|                          | For the year<br>ended December<br>31, 2022 | For the year<br>ended December<br>31, 2021 |
|--------------------------|--|--|
| Short-term lease expense | <u>\$2,805</u>                             | <u>\$2,550</u>                             |

D. Cash outflow relating to lease activities as a lessee

The Company incurred NT\$17,216 thousand and NT\$18,510 thousand of lease-related cash outflow for the years ended December 31, 2022 and 2021.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Note:

1. As of December 31, 2022 and 2021, the company had 577 and 546 employees respectively; the number of directors without concurrent role as employee was 6 in 2022 and 7 in 2021.
2. Average employee benefit expenses recognized for the years ended December 31, 2022 and 2021 totaled NT\$1,336 thousand and NT\$1,223 thousand, respectively.
3. Average employee salary expenses recognized for the years ended December 31, 2022 and 2021 totaled NT\$1,174 thousand and NT\$1,040 thousand, respectively.
4. Change in average employee salary expenses was calculated at 13%.
5. The Company's salary and remuneration policy is as follows:

(1) Employees:

The Company has developed competitive overall remuneration policies after taking into account the company's overall remuneration positioning in the market, with the reference to the results of industry remuneration surveys, comprehensively consideration of the internal fairness and external competitiveness of the organization, to secure the Company's competitive advantage with respect to human

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

resource.

A. Industry survey on salary policy

The purpose of industry survey on salary policy is to understand changes in the external labor market to ensure the Company can maintain its salary level at a certain degree of external competitiveness. Based on the survey outcome, the Company evaluates differences between its current salary payment level and the market level, as basis for the adjustments of salary level and salary combination form and structure.

B. Internal fairness of salary policy

Based on employees' job category, professional knowledge and technology, job scope and relative contribution to the Company's value, the Company flexibly designs an overall reward policy that offers a combination of financial and non-financial rewards. This policy uses bonus incentives as a means to raise the company's operation, teams, and individual performance.

(2) Directors:

According to the Company's Articles of Incorporation: when the Company makes a profit for the year, the remuneration to directors shall not be higher than 5% of the balance. The board of directors is authorized to determine the level of remuneration to directors based on individual participation and contribution to the Company's operations, and in reference to the usual level of industry peers. In addition, there is regular travel allowance for directors.

Independent directors are compensated primarily based on operating result and their individual contributions to the company's performance, which are positively related to the individual responsibilities for operation of the Company and overall performance. The Company has maintained operating and profit performance above a certain level, and exhibits relatively low risk. Independent directors are paid fixed amount of service fee for every meeting attended. Compensation policies are examined whenever deemed appropriate to conform with actual operating conditions and relevant regulations, and to seek the balance between the Company's sustainable operation and risk control.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

(3) Managers:

According to the Company's Articles of Incorporation, when the Company makes a profit for the year, the remuneration to employee shall not be higher than 3% of the balance. Managers' remuneration includes salary and bonus. The amount of remuneration paid to each manager is determined by the Remuneration Committee after taking into consideration their education and career background, authority and responsibilities of the position, individual performance, overall contribution to corporate operations, overall performance of the Company, and peer levels. The compensation procedures shall proceed according to Article 29 of the Company Act.

Pursuant to the Articles of Incorporation, profits concluded from a financial year are subject to employee remuneration of no less than 3% and director remuneration of no more than 5%. However, profits must first be taken to offset against cumulative losses if any. Distribution of employee remuneration mentioned above can be made in cash or in shares. This decision must be resolved in a board meeting with more than two-thirds of the board present, voted in favor by more than half of all attending directors, and subsequently reported in shareholder meeting. Please visit the "Market Observation Post System" for more information regarding employee/director remuneration resolved in board of director meetings.

Employee remuneration and director remuneration for 2022 were estimated at NT\$67,000 thousand and NT\$3,300 thousand, respectively, based on the Company's profitability and the percentages stated in the Articles of Incorporation. Employee remuneration and director/supervisor remuneration for the year ended December 31, 2021 were estimated at NT\$37,100 thousand and NT\$0 thousand, respectively, based on profitability of that particular year. The abovementioned amounts were presented under salary expense at the time of estimation, and if the actual amount resolved by the board of directors differs from the estimate, the difference will be recognized as gain or loss for the next year.

The board of directors passed a resolution on February 23, 2023 to pay the 2022 employee remuneration and director remuneration at NT\$67,000 thousand and NT\$3,300 thousand, respectively, in cash; these amounts were indifferent from the expenses previously recognized in the 2022 financial statements.

The board of directors passed a resolution on February 25, 2022 to pay the 2021 employee remuneration and director/supervisor remuneration at NT\$37,100 thousand and NT\$0 thousand, respectively, in cash; these amounts were indifferent from the expenses previously recognized in the 2021 financial statements.

Items not recognized as deferred income tax asset

As at December 31, 2022 and 2021, the entity had NT\$956 thousand and NT\$660 thousand, respectively, that were not recognized as deferred income tax assets.

Assessment of income tax return

As at December 31, 2022, the Company's income tax returns had been certified up to 2020.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

23. Earnings per share (EPS)

Amount of basic earnings per share is calculated by dividing current net income attributable to parent company's ordinary shareholders by weighted average outstanding ordinary shares for the current period.

Amount of diluted earnings per share is calculated by dividing current net income attributable to parent company's ordinary shareholders by weighted average outstanding ordinary shares for the current period, including all potential dilutive ordinary shares assuming total conversion.

|   | For the year<br>ended December<br>31, 2022 | For the year<br>ended December<br>31, 2021 |
|---|--|--|

| Other financial assets - current     | \$7,651           | \$1,365           | Performance guarantee    |
| Other financial assets - non-current | 4,796             | 6,842             | Performance guarantee    |
| Total                                | <u>\$12,447</u>   | <u>\$8,207</u>    |                          |

(IX) Significant contingent liabilities and unrecognized contract commitments

Unrecognized contract commitments

1. The Company had engaged financial institutions to provide NT\$28,052 thousand of performance and customs guarantee for various projects.
2. The Company had issued NT\$15,398 thousand of guaranteed notes to customers and banks to secure sales and borrowing limits.

Contingency

1. FUJIFILM Business Innovation Taiwan Co., Ltd. (hereinafter referred to as Fujifilm) filed a complaint against the Company's vice president surnamed Gao and other individuals for violating the Securities and Exchange Act, which is currently in the judiciary proceedings as a criminal case by the Taiwan Taipei District Court.
2. The Company received a complaint of criminal incidental civil lawsuit to the above-mentioned criminal case filed by the Taiwan Taipei District Court. Fujifilm filed a criminal incidental civil lawsuit against other companies, individuals, the Company and the Company's vice president surnamed Gao, a total of 15 defendants, requesting if one of the 15 defendants pays all or part of the damages, the other defendants are exempted from the obligation to pay within the scope of the payment. For the above-mentioned criminal incidental civil lawsuit filed by Fujifilm against the Company, the Company will appoint a lawyer to handle it. This is a civil lawsuit incidental to a criminal case, which will usually be transferred to the civil court after the first-instance criminal judgment, and there will be no civil procedure for the time being.
3. The Company received a complaint of civil lawsuit filed by the Taiwan Taipei District

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Court. Fujifilm filed a civil lawsuit against other companies, individuals, the Company and the Company's vice president surnamed Gao, a total of 18 defendants, requesting if one of the 18 defendants pays all or part of the damages, the other defendants are exempted from the obligation to pay within the scope of the payment.

For the above-mentioned civil lawsuit filed by Fujifilm against the Company, the Company will appoint a lawyer to handle it.

As at December 31, 2022, the Company has assessed that the aforementioned events will not have a significant impact on the Company's current operations.

(X) Losses from Major Disasters

None.

(XI) Significant Subsequent Events

None.

| Total   | <u>\$1,278,987</u>       | <u>\$985,675</u>         |

2. Purpose and policy of financial risk management

The Company has set its financial risk management goals to primarily manage market risks, credit risks, and liquidity risks relating to operating activities. The abovementioned risks are identified, measured, and managed according to the Company's policies and risk preference.

The Company has implemented appropriate policies, procedures, and internal controls for the management of financial risks mentioned above. All important financial activities are subject to review by the board of directors and Audit Committee in accordance with rules and the internal control system. The Company is required to duly comply with its financial risk management rules when carrying out financial management activities.

3. Market risk

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Changes in the market price of financial instruments is the type of market risk that the Company is most concerned with. Market risk may cause fluctuation in the fair value or cash flow of financial instruments, and mainly includes exchange rate risk, interest rate risk, and other price risk.

In practice, however, it is extremely rare to see only one risk variable changing at one time. Although risk variables tend to be correlated to some degree, the sensitivity analysis below has not taken into consideration the inter-correlation of risk variables.

Exchange rate risk

The Company's exchange rate risk exposure is mainly associated with operating activities (when the currency of income or expense is different from the Company's functional currency) and net investments in foreign operations.

Some of the Company's foreign currency receivables and foreign currency payables are denominated in the same currencies, which create natural hedge to some extent. However, the Company did not adopt hedge accounting as natural hedge does not conform with the requirements for hedge accounting. Meanwhile, net investments in foreign operations represent strategic investments, therefore the Company did not hedge this exposure.

Sensitivity analysis for exchange rate risk is conducted on monetary items denominated in key foreign currencies as at the balance sheet date, and the analysis evaluates how a strengthening/weakening of foreign currency affects the Company's profits and equity. Exchange rate risks of the Company are mainly attributed to the volatility of USD currency. Sensitivity analysis for the currency is provided below:

If NTD strengthened/weakened against USD by 1%, profits for the years ended December 31, 2022 and 2021 would have increased/decreased by NT\$24 thousand and decreased/increased NT\$22 thousand, whereas equity would have decreased/increased NT\$137 thousand and NT\$136 thousand, respectively.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Interest rate risk

Interest rate risk refers to fluctuations in the fair value or future cash flow of a financial instrument due to changes in market interest rate. The Company's exposure to interest rate risk arises mainly from loans borrowed at floating rate. However, given that the Company currently has no such loan outstanding, it is not exposed to any material interest rate risk.

Equity price risk

The Company holds TWSE/TPEX listed as well as unlisted equity securities; the fair value of investments may be affected by uncertainties associated with the future value. All TWSE/TPEX listed and unlisted equity securities held by the Company are classified as equity instruments at fair value through other comprehensive income. The Company manages equity price risk of equity securities through diversified investment and by setting investment limits on single and a portfolio of instruments. Information on portfolio of equity securities has to be provided to the Company's management on a regular basis; the board of directors is required to verify and approve all decisions concerning investment of equity securities.

A 10% rise/fall in the price of TWSE/TPEX listed shares held as investments in equity instruments at fair value through other comprehensive income would have affected the Company's equity by NT\$2,634 thousand and NT\$5,152 thousand for the years ended December 31, 2022 and 2021, respectively.

4. Credit risk management

Credit risk refers to the possibility of financial losses suffered due to counterparties becoming unable to fulfill contractual obligations. The Company's credit risk exposure mainly arises from operating activities (primarily accounts receivable and notes receivable) and financing activities (primarily bank deposits and financial instruments).

All departments of the Company manage credit risks according to prevailing policies, procedures, and controls. Counterparty credit risk is evaluated after taking into consideration each counterparty's financial position, external credit rating, historical transactions, the current economic environment, and the Company's internal rating standards, etc. The Company uses credit enhancement tools (such as advanced receipt and insurance) at appropriate times to minimize credit risk of specific counterparties.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

The Company's top 10 customers accounted for 16% of total contract assets and accounts receivable balance as at December 31, 2022, and 2021. Judging by the above, there was no concentration of credit risk in the Company's contract assets and accounts receivable.

The Finance Department manages credit risk of bank deposits and other financial instruments according to Company policies. All counterparties of the Company are approved according to internal control procedures, and consist entirely of reputable banks, investment-grade financial institutions, companies, and government agencies, hence no major credit risk exists.

The Company assesses expected credit losses according to IFRS 9. Information relating to credit risk assessment is presented below:

| Credit risk grade             | Indicator | Method of<br>measuring expected<br>credit loss | Total book value  |                   |
|-------------------------------|-----------|--|-------------------|-------------------|
|                               |           |  | December 31, 2022 | December 31, 2021 |
| Simplified<br>approach (Note) | (Note)    | Lifetime expected<br>credit losses             | \$740,692         | \$651,323         |

Note: The Company adopts the simplified approach (loss provision is measured based on Lifetime expected credit losses); the assessment covers contract assets, notes receivable, accounts receivable, and installment accounts receivable.

## 5. Liquidity risk management

The Company uses cash and cash equivalents, marketable securities, bank loans, leases, and contracts to maintain financial flexibility.

The following table shows maturity of financial liabilities as stated in contract terms and conditions. The dates represent the earliest times at which the Company may be required to make repayments, whereas the amounts are undiscounted and include agreed interests. Undiscounted amounts of floating interest cash flow are estimated using yield curve as at the balance sheet date.

| December 31, 2021   | <u>\$70,000</u>  | <u>\$2,696</u>     | <u>\$22,943</u>   | <u>\$95,639</u> |

7. Fair value of financial instruments

(1) Fair value assessment techniques and assumptions

Fair value refers to the price that market participants are able to receive for selling an asset, or the price that has to be paid to transfer a liability, in an orderly transaction on the measurement date. The Company has adopted the following techniques and assumptions when measuring and disclosing fair values of financial assets and liabilities:

- A. Book value of cash and cash equivalents, receivables, payables, and other current liabilities closely resemble their fair value due to their short maturity.
- B. Financial assets and liabilities that are traded on active markets at standard terms and conditions shall have fair value determined by market quotation (e.g. TWSE/TPEX listed shares, beneficiary certificates, and bonds).
- C. Equity instruments without active market (e.g. privately placed shares of TWSE/TPEX listed companies, shares of unlisted public and private companies without active market) shall have fair value estimated using the market approach, which infers fair values from transaction price or other relevant information (such as discount for lack of liquidity, P/E and P/B ratios of similar companies etc.) of same or comparable equity instruments.
- D. For debt instruments without quotation in active market, Short-term loans, and other non-current liabilities, fair value is determined by counterparty's quotation or through the use of valuation technique. The valuation technique takes a discounted cash flow approach, and assumptions such as interest rate and discount rate are established in reference to instruments of similar nature.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

(2) Fair value of financial instruments carried at cost after amortization

Book value of financial assets and liabilities carried at amortized costs closely resemble their fair value.

(3) Fair value hierarchy for financial instruments

See Note XII.8 for information relating to fair value hierarchy for financial instruments.

8. Fair value hierarchy

(1) Definition of fair value hierarchy

For all assets and liabilities measured or disclosed at fair value, fair value measurement is categorized in their entirety in the level of the lowest level input that is significant to the entire measurement. The different levels of inputs used are explained below:

Level 1 input: Quotations that can be obtained from an active market (unadjusted) on the measurement date for asset or liability of equivalent nature.

Level 2 input: Inputs that can be observed directly or indirectly on an asset or liability, except for quotations covered in level 1 input.

Level 3 input: Inputs that cannot be observed for an asset or liability.

Assets and liabilities that are recognized on financial statements on a recurring basis shall have classification reassessed on each balance sheet date to determine if transfer of fair value hierarchy has taken place.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

(2) Information on fair value hierarchy

The Company did not have any asset that is measured at fair value on a non-recurring basis. Hierarchy of assets and liabilities with recurring fair value measurement is explained below:

December 31, 2022:

|  | Level 1  | Level 2 | Level 3  | Total    |
|--|----------|---------|----------|----------|
| Financial assets<br>measured at fair value:  |          |         |          |          |
| Equity instruments<br>measured at fair<br>value through other<br>comprehensive<br>income |          |         |          |          |
| Stock  | \$26,341 | \$-     | \$27,950 | \$54,291 |

December 31, 2021:

|  | Level 1  | Level 2 | Level 3 | Total    |
|--|----------|---------|---------|----------|
| Financial assets<br>measured at fair value:  |          |         |         |          |
| Equity instruments<br>measured at fair<br>value through other<br>comprehensive<br>income |          |         |         |          |
| Stock  | \$51,521 | \$-     | \$1,950 | \$53,471 |

Transfer of fair value input between level 1 and level 2

There had been no transfer of fair value input between level 1 and level 2 for the years ended December 31, 2022 and 2021 that involved assets or liabilities with fair value measured on a recurring basis.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

(3) Mandatory disclosure of fair value hierarchy for items not measured at fair value: None.

9. Significant foreign currency-denominated financial assets and liabilities

The Company had the following significant foreign currency-denominated financial assets and liabilities:

|   | Unit: thousand    |               |           |
|---|-------------------|---------------|-----------|
|   | December 31, 2022 |               |           |

| Monetary items:                                   |                   |               |           |
| USD   | 150               | 27.61         | 4,131     |

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Due to the broad diversity of functional currencies used, the Company was unable to disclose exchange gains/losses on monetary financial assets and liabilities separately for each significant foreign currency. The Company incurred NT\$27,444 thousand and NT\$3,504 thousand of gains on currency exchange for the years ended December 31, 2022 and 2021, respectively.

10. Capital management

The primary goals of the Company's capital management are to maintain robust credit rating and sound capital ratios in ways that support business operation and maximization of shareholders' equity. The Company manages and adjusts capital structure based on changes in economic circumstances. The Company maintains and adjusts capital structure through: adjustment of dividend payment, refund of share capital, or issuance of new shares.

Note 1: Explanation to the serial number column:

1. 0 for the Company.
2. Investees are numbered in sequential order starting from 1; serial number should be consistent for the same company.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Note 2: The relationship between endorsement/guarantee providers and guaranteed parties are classified as follows:

1. Business that the Company has business dealing with.
2. Business in which the Company holds more than 50% direct or indirect voting interest.
3. Business that holds more than 50% direct or indirect voting interest in the Company.
4. Business in which the Company holds more than 90% direct or indirect voting rights.
5. Peer or partner of a construction contract that the Company is in need to provide cross guarantees for.
6. Investee of a joint investment arrangement for which the Company and other shareholders have issued endorsements/guarantees proportionate to ownership interest.
7. Peer of a property pre-sale contract for which the Company has issued performance guarantee in accordance with the Consumer Protection Act.

Note 3: According to subsidiaries' endorsement and guarantee procedures, endorsements/guarantees to a single business shall not exceed 50% of current net equity; total endorsements/guarantees to external parties shall not exceed 100% of current net equity. According to parent company's endorsement and guarantee procedures, endorsements/guarantees to any single subsidiary in which the Company holds more than 90% ownership interest shall not exceed 50% of net equity shown in the Company's latest financial statements, whereas endorsements/guarantees to other external parties shall not exceed 10% of the Company's net equity per entity or 50% of the Company's net equity on an aggregate basis, as shown in the latest financial statements.

Note 4: Represents the maximum balance of endorsement/guarantee during the year.

Note 5: Represents board of directors approved amount. If the Chairman has been authorized by the board of directors to make decisions according to Subparagraph 8, Article 12 of Regulations Governing Loaning of Funds and Making of Endorsements/Guarantees by Public Companies, the column shall represent Chairman-approved amount.

Note 6: Represents the actual amount utilized by the guaranteed/endorsed within the endorsement/guarantee limit.

Note 7: Specify "Y" only for: endorsement/guarantee from a TWSE/TPEX listed parent to a subsidiary, endorsement/guarantee from a subsidiary to a TWSE/TPEX listed parent, or endorsement/guarantee to the Mainland China area.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

Note 1: Business dealings between the parent company and subsidiaries are indicated in the serial number column. The numbering rule is explained below:

1. 0 for parent company.
2. Each subsidiary is numbered in sequential order starting from 1.

Note 2: Related party transactions are distinguished into one of three categories, as shown below:

1. Parent to subsidiary.
2. Subsidiary to parent.
3. Subsidiary to subsidiary.

Note 3: Calculation for business dealings as a percentage of total consolidated revenues or total assets is explained as follows: for balance sheet items, percentage of period-end balance is calculated relative to consolidated total assets; for profit or loss items, percentage of end-of-period cumulative amount is calculated relative to consolidated total revenues.

Note 4: Key transactions presented in this chart are determined by the Company based on principles of materiality.

Notes to Parent Company Only Financial Statements of Stark Technology Inc. (continued)  
(All amounts in NTD thousands unless otherwise specified)

| Total liabilities  | 2,766,996   | 3,382,971   | 615,975       | 22.26   |
| Equity attributable to owners of the parent company  | 3,019,873   | 3,125,327   | 105,454       | 3.49    |
| Share capital  | 1,063,603   | 1,063,603   | -             | -       |
| Capital surplus  | 166,514     | 166,514     | -             | -       |
| Retained earnings  | 1,752,625   | 1,893,728   | 141,103       | 8.05    |
| Other equity interests   | 37,131      | 1,482       | (35,649)      | (96.01) |
| Treasury stock   | -           | -           | -             | -       |
| Non-controlling interest   | -           | -           | -             | -       |
| Total equity   | 3,019,873   | 3,125,327   | 105,454       | 3.49    |
| The main reasons for the changes by more than 20% and the amount of change by NT\$10 million or more and the impacts are explained as follows:   |             |             |               |         |
| 1. Current liabilities increased: this is mainly due to the increase in short-term loans, contract liabilities - current, accounts payable and current income tax liabilities in 2022.               |             |             |               |         |
| 2. Increase in total liabilities: this is mainly due to the increase in current liabilities in 2022.   |             |             |               |         |
| 3. Decrease in other equities: this is mainly due to the effect of unrealized gain (loss) on the investment in equity instruments measured at fair value through other comprehensive income in 2022. |             |             |               |         |

## II. Review and analysis of financial performance

### (I) Comparison table and analysis of financial performance

Unit: NTD thousand

| Account \ Year   | Amount in 2021 | Amount of 2022 | Increase/decrease in amount | Change ratio % |
|--|----------------|----------------|-----------------------------|----------------|
| Net operating revenue  | 6,579,554      | 6,728,995      | 149,441                     | 2.27           |
| Operating cost   | 4,980,918      | 4,994,017      | 13,099                      | 0.26           |
| Operating margin   | 1,598,636      | 1,734,978      | 136,342                     | 8.53           |
| Operating expenses   | 838,103        | 931,366        | 93,263                      | 11.13          |
| Operating income   | 760,533        | 803,612        | 43,079                      | 5.66           |
| Non-operating income and expenses  | 37,814         | 105,698        | 67,884                      | 179.52         |
| Income before income tax   | 798,347        | 909,310        | 110,963                     | 13.90          |
| Income tax expenses  | 160,185        | 174,139        | 13,954                      | 8.71           |
| Net income   | 638,162        | 735,171        | 97,009                      | 15.20          |
| Other comprehensive income for the current period (net of income tax)  | 10,048         | (31,972)       | (42,020)                    | (418.19)       |
| Total comprehensive income for the period  | 648,210        | 703,199        | 54,989                      | 8.48           |
| Net income attributable to shareholders of the parent  | 638,162        | 735,171        | 97,009                      | 15.20          |
| Net income attributable to non-controlling interest  | -              | -              | -                           | -              |
| Total comprehensive income attributable to shareholders of the parent  | 648,210        | 703,199        | 54,989                      | 8.48           |
| Comprehensive income attributable to non-controlling equity  | -              | -              | -                           | -              |
| The main reasons for changes of more than 20% and the amount of changes of NT\$10 million or more in the period before and after and the impact analysis are as follows:   |                |                |                             |                |
| 1. Increase in non-operating income and expenses: this is mainly due to the increase in dividend income, other income and foreign currency exchange gains in 2022.   |                |                |                             |                |
| 2. Other comprehensive income for the current period (net of income tax) decreased in the current period: this is mainly due to the unrealized evaluation loss on the investment in equity instruments measured at fair value through other comprehensive income in 2022 and the other comprehensive loss of subsidiaries, affiliated companies and joint ventures under the equity method are more. |                |                |                             |                |

### (II). Analysis of changes in gross profit: Gross profit between prior periods with no more than 20% change was excluded from the analysis.

III. Review and analysis of cash flow:

(I) Analysis and description of cash flow changes in the most recent year:

Unit: NTD thousand

| Item                               | 2021      | 2022      | Changes in amount | Change ratio % |
|------------------------------------|-----------|-----------|-------------------|----------------|
| Operating activities               | 561,057   | 675,609   | 114,552           | 20.42          |
| Investment activities              | (56,027)  | (67,835)  | (11,808)          | 21.08          |
| Financing activities               | (404,056) | (530,259) | (126,203)         | 31.23          |
| Effects of exchange rate variation | 1,532     | 6,199     | 4,667             | 304.63         |
| Total                              | 102,506   | 83,714    | (18,792)          | (18.33)        |

- (1) Net cash inflows from operating activities increased by NT114,552 thousand from the previous period, mainly due to the increase in profit in 2022, resulting in the increase in net cash inflows from the previous period.
- (2) Net cash outflow from investing activities increased by NT\$11,808 thousand from the previous period. This is mainly due to the increase in cash outflow from the previous period as a result of the increase in more refundable deposits and other financial assets for the current period.
- (3) Net cash outflow from financing activities increased by NT\$126,203 thousand from the previous period. It is mainly due to the increase in bank borrowings and the distribution of more cash dividends, resulting in the increase in net cash outflow of the current period.
- (4) As a result of the above, the net cash inflow of the current period decreased by NT\$18,792 thousand from the previous period.

(II) Liquidity analysis for the most recent 2 years

| Item \ Year  | 2021  | 2022  | Increase/decrease (%) |
|--|-------|-------|-----------------------|
| Cash Flow Ratio (%)  | 21.05 | 20.63 | (2.00)                |
| Cash Flow Adequacy Ratio (%)   | 60.34 | 55.97 | (7.24)                |
| Cash Flow Reinvestment Ratio (%)   | 3.29  | 2.36  | (28.27)               |
| Explanation of increase/decrease ratio:<br>The decrease in cash reinvestment ratio from the previous period was a result of the increase in net cash inflow from operating activities, distribution of cash dividends, and working capital for the current period. |       |       |                       |

## (III) Liquidity analysis for the coming year:

Unit: NTD thousand

| Cash balance at beginning of period<br>① | Expected annual net cash flow from operating activities<br>② | Projected cash outflow for the year<br>③ | Projected cash surplus (deficit)<br>① + ② - ③ | Remedies for cash deficits |                    |
|--|--|--|---|----------------------------|--------------------|
|  |  |  |   | Investment Plan            | Financial Planning |
| \$1,534,624                              | \$560,213  | \$650,191                                | \$1,444,646                                   | \$-                        | \$-                |

## (1) Analysis of cash flow changes:

- A. Operating activities: Net cash inflow from operating activities is generated due to the expected stable profit.
- B. Investing activities: Net cash outflow from investing activities will arise due to the expected purchase of fixed assets.
- C. Financing activities: The net cash outflow from financing activities arises due to the estimated distribution of cash dividends and remuneration to directors, and so on.

In conclusion, the Company expects to have NT\$1,444,646 thousand in cash remaining.

## (2) Remedial measures for projected cash deficit and liquidity analysis: Not applicable.

## IV. Effect of major capital expenditures on finance and business matters in the most recent year: None.

## V. Re-investment policies, main causes of profit or loss, improvement plans in the previous year, and investment plans in the coming year:

The Company's reinvestment policy is mainly to expand market and strategic alliance. Please refer to page 391 for gains and losses. There is no investment plan for the upcoming one year.

## VI. Risk management analysis and evaluation

## (I) Risk management organizational structure and responsible unit

| Department Name               | Powers and responsibilities  |
|-------------------------------|--|
| Office of Chairman and CEO    | Responsible for planning business decisions, including the balanced growth of industries and pulses, to achieve operational results and efficiency, in order to reduce strategic risks.  |
| Audit Office                  | The internal control system and the implementation of various operating procedures are reviewed regularly to reasonably ensure the correctness of the operating procedures and reduce the possibility of risk occurrence.  |
| Business Operations Center    | Responsible for developing markets, extending credit to customers, monitoring market trends, and striving to achieve business goals and reduce operational risks.  |
| Customer Service Center       | Combine employees' technical direction with the market to support business promotion with comprehensive services to reduce the risk of customer churn.   |
| Marketing Center              | Responsible for collecting and creating market information, coordinating production and sales, product distribution, forecasting of inventory and flow, and analyzing market price competition to reduce the risk of unsalable products.   |
| Finance and Accounting Center | Responsible for the dispatch and utilization of financial funds, pay attention to changes in exchange rates and interest rates, and implement hedging mechanism in a timely manner to reduce the Company's financial risks. Accurate and timely presentation of financial statements and information disclosure in order to reduce risks to investors. |

|                                     |   |
|-------------------------------------|---|
| Administration and Materials Center | To ensure the safety of the Company's assets and reduce operational risks, regular electrical equipment inspections are carried out on a yearly basis and is responsible for asset preservation and management. Purchase of relevant adequate insurance policies such as commercial fire insurance (including fire insurance and theft insurance), commercial property floater insurance, and public liability insurance. It is to reduce losses and maintain normal operations.  |
| Human Resource and Education Center | Responsible for employees' or suppliers' human rights issues, including but not limited to risks that may arise from labor-management relations, the prohibition of child labor and forced labor, and multiple employment opportunities, and company talents development management. Enhance labor-management communication channels to drive harmonious relations, lower recruitment and retain talents, talent development mechanisms and various topics that may generate risks.<br>In order to meet the society's expectation for joint charity activities or fund-raising with non-profit organizations, the Company shall choose a non-profit organization that is decent and has proper philosophy to reduce the possibility of litigation and disputes, and thereby reduce the risk of disputes over legal liabilities. |
| Legal Resource Division             | Review contracts, provide in-house legal consultation, and resolve legal disputes.  |
| Information Department              | Responsible for the overall planning and implementation of ERP information equipment and network, and maintaining network information security control and protection measures in order to reduce network operation and information security risks.   |

(II) Impacts of changes in interest rates, effect of exchange rate changes, and inflation in the most recent year up to the publication date of the annual report and future countermeasures:

1. Foreign exchange gains and losses and interest receipts and expenses for the most recent 2 years and as of the publication date of this annual report

Unit: NTD thousand

| Item                          | 2021      | 2022      | As of March 31, 2023 |
|-------------------------------|-----------|-----------|----------------------|
| Exchange gains (losses) A     | 3,124     | 29,381    | (6,722)              |
| Interest revenue (expenses) B | 11,438    | 11,668    | 999                  |
| Operating revenue C           | 6,579,554 | 6,728,995 | 1,716,192            |
| Operating income D            | 760,533   | 803,612   | 238,047              |
| A/C                           | 0.0005    | 0.0044    | (0.0039)             |
| A/D                           | 0.0041    | 0.0366    | (0.0282)             |
| B/C                           | 0.0017    | 0.0017    | 0.0006               |
| B/D                           | 0.0150    | 0.0145    | 0.0042               |

Source of data: These are the financial statements audited verified by CPAs for the years ended December 31, 2022 and 2021, and reviewed by CPAs for those of Q1 of 2022.

- (1) The increase in exchange gains in 2022 compared to 2021 was mainly due to the increase in exchange gains in 2022 from the previous period due to the increase in the Company's net assets in foreign currency in 2021.
  - (2) The decrease in net interest income in 2022 from 2021 is mainly due to the increase in the interest income in 2022 from the previous period.
  - (3) As of March 31, 2023, decrease in exchange gain on translation for the entire year from 2022. This is mainly due to the 2023 Q1 reduction in foreign currency net assets and the exchange rate fluctuations with appreciation in NTD resulting in exchange losses in 2023 Q1.
  - (4) The decrease in the translation of the net interest income for the entire year ended March 31, 2023 compared to 2022 is mainly due to the decrease in lease interest income and bank interest income in the first quarter of 2023.
  2. Inflation in the most recent year and up to the publication date of this annual report did not materially affect the Company's profit or loss.
  3. Specific measures taken by the Company in response to effect of exchange rate changes, interest rates, and inflation:
    - (1). For some products, purchase and sales are priced in US dollars. In order to reduce the effect of exchange rate changes fluctuations on profits, in addition to reaching agreements with major suppliers to pay for purchase in US dollars, the Company complies with the "Procedure for Derivatives Transactions" According to the regulation, companies may engage in hedging derivative transactions in order to avoid foreign exchange risks after proper evaluation and authorization.
    - (2). Responsible personnel regularly collect market exchange and interest rate information, as well as absorb professional information on hedging instruments in the market, so as to execute hedging operations in a timely manner.
- (III) Policies on engaging in high-risk investments, highly leveraged investments, loans to others, endorsements and guarantees, and transactions of derivative instruments in the most recent year to the day this annual report was printed; main reasons for profit or loss and countermeasures to be taken in the future:
1. Engagement in high-risk investments, highly leveraged investments, loans to others, endorsements/guarantees in the most recent year, up till the publication date of this annual report: None.
  2. The Company only engages in hedging transactions in derivatives and has not engaged in forward foreign exchange contracts in the most recent year.
  3. Main reasons for profit or loss and countermeasures in the future: The Company has not engaged in derivative investment in the most recent year and up to the publication date of this annual report.

- (IV) R&D plans, current status of uncompleted R&D plans, required R&D expenses, expected time of completion of mass production, and major factors affecting the success of R&D in the most recent year and up to the date of publication of this annual report:

| R&D plans  | The current progress of the R&D plan that has yet not been completed | R&D expenses to be invested | Estimated time of completion | The main factors affecting the success of R&D in the future  |
|--|--|-----------------------------|------------------------------|--|
| Development and practice of EAR ZT zero trust security interconnection technology platform | 10%  | NT\$24,000 thousand         | April 2025                   | <ol style="list-style-type: none"> <li>1.
